retirement System

May 8th, 2020

Petition for Reconsideration.

I, Connie Domingos doesn't agreed that I'm not disabled. In fact when I applied for my disability retirement the person who helped me told me since I was already receiving SSI that I would surly get the retirement disability cause its much harder to qualify for SSI rather than retirement disability. All I no is im telling the truth and there's no way possible I can perform work duties. I have chronic pain and as of right now I will be having back surgery very soon. I also suffer from depression, anxiety, High blood pressure, fibromalgia, Sleep disorder. severe headaches, memory loss, Severe arthritis, Cervical disc disease, hypertension and lipedema, edema, insomnia, left leg constant pain and burning. Severe nerve damage, tremors, Severe chronic neck, back, leg pain, dizzyness, blured vision. Constipation. in fact a few days a week I Cant even get out of bed.
