Our Beliefs & Strategy | Highlights

Our Total Fund investment strategy and processes reflect our Investment Beliefs and Governance & Sustainability Strategy in many ways. For example, we:

- Systematically assess our strategies to ensure alignment with our performance and funded status goals
- Are intentional in where and how we take investment risk
- Manage liquidity at the Total Fund level so we can navigate market disruptions and take advantage of market opportunities
- Understand risk is multi-faceted, and that our investment decision-making processes must consider different risks

Investment Office Strategic Plan Objectives – 4 Ps

Portfolio

- Construct a Total Fund portfolio positioned to generate the required rate of return over the long term, by ensuring effective allocation of risk, leverage and liquidity

Processes

- Institutionalize transparent, disciplined and clear investment decision-making processes to increase organizational effectiveness and support a culture of accountability

People

- Work as one team, with a culture of trust, respect, and accountability to effectively manage one well regarded Total Fund

Performance

- Achieve relative outperformance in service of delivering our long-term projected rate of return

Key Accomplishments | 2020-2021

- Working remotely through the pandemic
- Private asset strategic reviews
- Asset Liability Management (ALM) with Actuarial Office and Financial Office (underway)
- Leverage and liquidity management
- Technology and Data Strategy
- Total Fund governance review

Key Initiatives | 2021-2022

- Conclude ALM (with Actuarial Office and Financial Office)
- Continue deploying private assets at scale
- Continue Technology and Data Strategy
- Continue Total Fund Management

Economic Update | Review

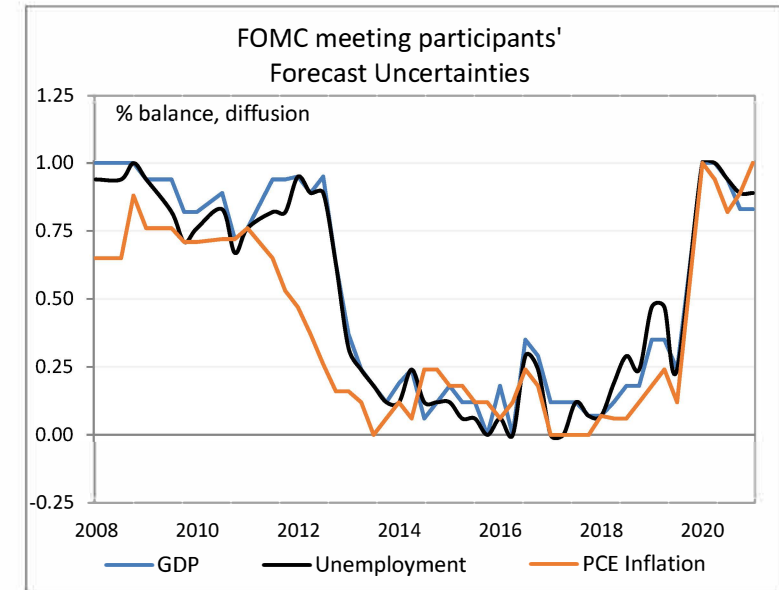

US and global economies outperformed relative to expectations

Expectations for H2 2021 economic growth have improved.

Expectations for US 2022 growth are consolidating around historical averages.

Uncertainty over future outcomes remains elevated.

The dispersion of global macroeconomic outcomes still high.

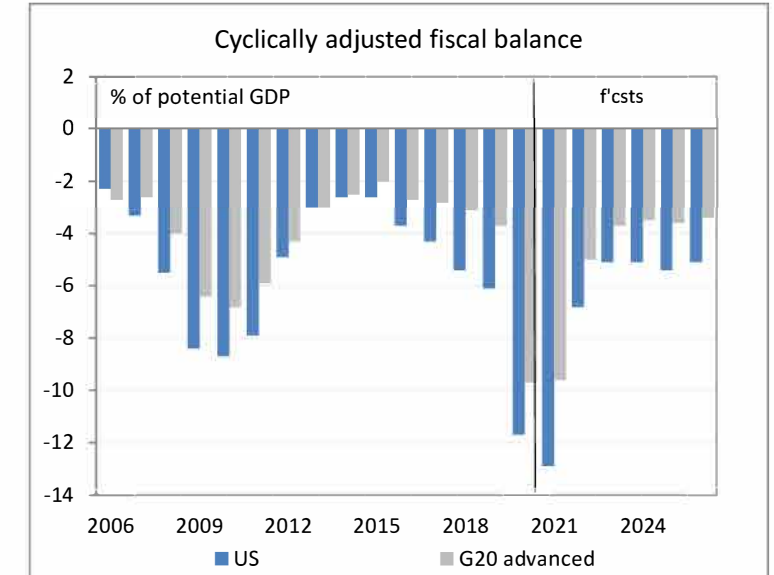

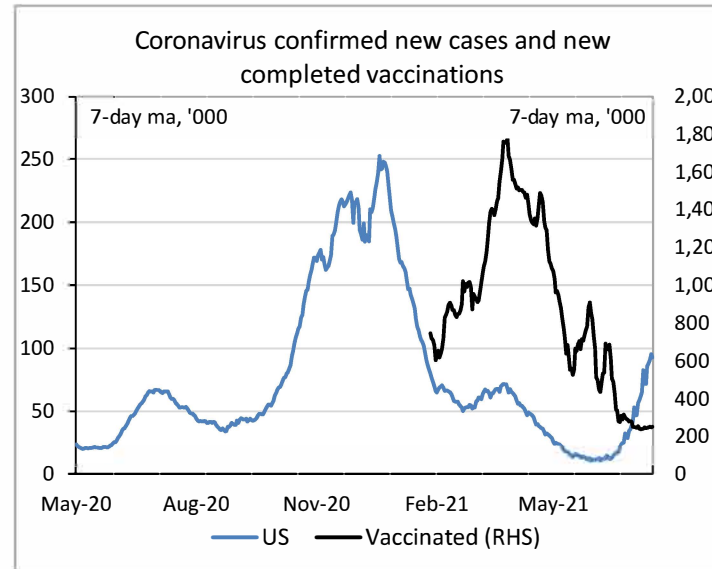

Economic Update | Future outlook

Delicate balancing act

Key drivers of recovery: labor market; supply-chain disruptions, rate of virus infections in the Fall.

COVID-19 Delta variant increases uncertainty over trajectory.

Monetary and fiscal policy marginal support is waning.

Global Equity | Implementation Highlights

Global Equity is the principal asset class providing growth exposure in the strategic asset allocation

- Global Equity Team participates in global capital markets and provides perspective to support strategic asset allocation and Total Fund decisions
- Total AUM: \$242 Billion (71% cap-weighted, 29% factor-weighted)

Program thoughtfully delivers multiple equity betas with low active risk and an efficient cost structure

- 96% of the portfolio is invested in cost-efficient, internally-managed strategies

Companies only offering non-voting shares have been removed from the Global Equity Benchmark to improve shareowner rights

A narrowed Global Policy Benchmark has been implemented for the cap-weighted segment to more effectively extract the equity risk premium

Global Fixed Income | Implementation Highlights

Global Fixed Income utilizes an internal allocation and investment review process to optimize allocation and control risk:

- Weekly Portfolio Allocation Committee (PAC)
 - Bi-monthly we include the entire GFI team to discuss implementation of investment management decisions, allocation among Spread sectors, information sharing, and testing of investment ideas
 - Incorporation of alternative measures of risk and potential return including risk premia analysis, correlation analysis, and alternative risk “bucketing”
- Collaboration with the RSG Economic and Quant teams has contributed to strong investment returns
- Daily and weekly reports highlight current allocations by weight, risk and return

Opportunistic Strategies | Implementation Highlights

Successes

- Opportunistic: Successfully committed over \$10 Billion to Private Debt program, with over \$1.9 Billion deployed
- LLER: Outperformed benchmark by 395 bps

Challenges

- Opportunistic: Deployment into Private Debt is a slower process than purchasing public market securities, thorough diligence and analysis is essential
- LLER: Need to recruit talent to oversee increased deployment of assets (portfolio has been in run-off mode since August 2019)

Opportunistic Strategies Performance (as of June 30, 2021)

State Street Private Equity Index		14.0	18.0	19.7	53.6
Excess bps		(280)	(390)	(610)	(810)

- Peer universe benchmarks are calculated using money weighted returns and serve an additional means of evaluating the Private Equity Program
- The Private Equity Program has underperformed relative to published industry benchmarks, with further deterioration over the past year:
 - The drivers of underperformance are understood and reversible over time. They include a lack of: consistent capital commitments, strategic consistency, cost efficiency and diversification
 - The drivers of underperformance will be addressed through: disciplined multi-year capital commitment pacing, expansion of the co-investment program, and broader exposure to high-conviction managers and companies across market segments
 - The turnaround of the PE Program will require time. Consistent execution through market cycles is key

Private Equity | Priority Accomplishments

Major Accomplishments for 2020-2021

CalPERS Investment Beliefs Summary

[CalPERS' Investment Beliefs](#) are not a checklist to be applied to every decision. They are a guide for making decisions that often require balancing multiple inter-related decision factors. Each Investment Belief also contains several sub-beliefs that are actionable statements that provide insight as to how the Investment Beliefs will be implemented.

1. Liabilities must influence the asset structure
2. A long time investment horizon is a responsibility and an advantage
3. CalPERS investment decisions may reflect wider stakeholder views, provided they are consistent with its fiduciary duty to members and beneficiaries
4. Long-term value creation requires effective management of three forms of capital: financial, physical, and human
5. CalPERS must articulate its investment goals and performance measures and ensure clear accountability for their execution
6. Strategic allocation is the dominant determinant of portfolio risk and return
7. CalPERS will take risk only where we have a strong belief we will be rewarded for it
8. Costs matter and need to be effectively managed
9. Risk to CalPERS is multi-faceted and not fully captured through measures such as volatility or tracking error

Integration of Investment Beliefs | Example Highlights

Investment Beliefs

Investment Belief 1

Liabilities must influence the asset structure.

- Use of asset segments supports Portfolio Priorities (protect the funded ratio, stabilize employer contribution rates, achieve long-term required rate of return)

Investment Belief 2

A long time investment horizon is a responsibility and an advantage

- Investment processes are built on a strong liquidity management framework that provides adequate liquidity and allows us to harvest an illiquidity premium. Due to our long-term nature we are able to endure temporary market volatility

Investment Belief 3

CalPERS investment decisions may reflect wider stakeholder views, provided they are consistent with its fiduciary duty to members and beneficiaries

- CalPERS work on engagement, advocacy and integration of climate change risks and opportunities is rooted in partnerships

Investment Belief 4

Long-term value creation requires effective management of three forms of capital: financial, physical and human

- Integration of environmental, social, and governance factors into the investment management process contribute to the long-term sustainability of the fund.

Investment Belief 5

CalPERS must articulate its investment goals and performance measures and ensure clear accountability for their execution

- We routinely report on our investment performance and on our funding levels and risks

Investment Belief 6

Strategic allocation is the dominant determinant of portfolio risk and return

- We consider investment strategies that have the potential for material impacts to the Total Fund

Investment Belief 7

CalPERS will take risk only where we have a strong belief we will be rewarded for it

- We conduct systematic reviews of our investment strategies and take action to reduce active risks. For example, the Global Equity program restructured its Traditional Active, Alternative Beta, and Emerging Manager portfolios

Investment Belief 8

Costs matter and need to be effectively managed

- The majority of our public assets are invested in cost-efficient, internally managed and implemented strategies

Investment Belief 9

Risk to CalPERS is multi-faceted and not fully captured through measures such as volatility or tracking error

- We consider risk factors that emerge slowly but that can materially impact our portfolio, such as the effects of climate change on real assets investments

Investment Belief 10

Strong processes and teamwork and deep resources are needed to achieve CalPERS goals and objectives

- We emphasize the importance of an inclusive and collaborative 'One Team, One Fund' culture that recognizes our team members are assets in achieving our objectives

Additional Information | INVO Teams

The following slides provide a high-level introduction of the other eight teams that are integral to CalPERS' investment program

Global Equity | Role in the Total Fund

Percentage of PERF

	Target	<u>Actual (as of 6/30/2021)</u>
Total Public Equity	50% (+/- 7%)	51.4%
Cap Weighted	35%	36.5%
Factor Weighted	15%	15.0%

Total Fund Role

- Total return oriented and to capture the equity risk premium (ERP), defined as the excess return over risk-free government bonds, by means of ownership risk in companies and exposure to corporate earnings growth.
- Drivers of total performance
 - Price appreciation
 - Cash yield
- Risks
 - Economic: High sensitivity to global economic growth variability
 - Liquidity: Portfolio expected to remain highly liquid

Global Equity | Characteristics & Positioning

- Index-oriented portfolio implementation has remained stable since the prior year
 - As of 6/30/2021, 96% of assets are categorized as index-oriented
 - Global Equity active risk has continued to trend downward

¹ Figure uses realized tracking error (trailing 1-year) since June 2016

Global Equity | Characteristics & Positioning

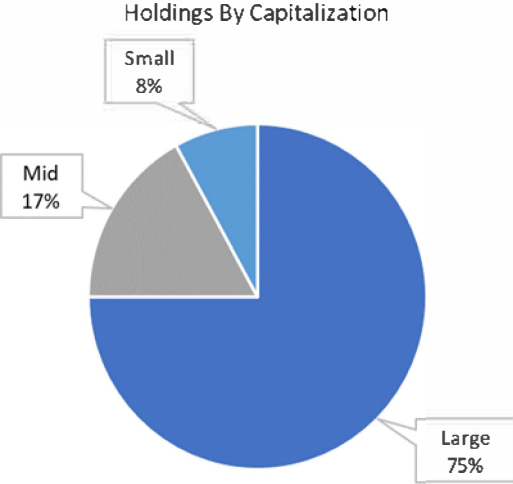

- CalPERS Custom FTSE Global Benchmark

- Adopted a narrowed Policy Benchmark to improve extraction of the equity risk premium through simplification. The CalPERS Custom FTSE Global Benchmark harvests the top 95% of total global investable market capitalization, in addition to removing companies only offering non-voting shares¹. The narrowed implementation and non-voting share screen seeks to:

- 1.) Reduce operational complexity, while maintaining an attractive risk/return profile
- 2.) Improve shareowner rights

Narrowed Benchmark Characteristics (as of 7/01/2021)

- CalPERS customization excludes tobacco, firearms, thermal coal, Iran/Sudan, ESG risk, and non-voting shares
- Holds: 5,491 constituents, weighted by market capitalization
- Covers: 34 countries, 28 currencies

¹Removal of companies only offering non-voting shares was a separate recommendation, independent of the narrowing recommendation, but was implemented in conjunction with the narrowed benchmark

Global Equity | Integration of Governance & Sustainability Examples

Global Equity integrates CalPERS Governance & Sustainability Strategy in various ways, which include but are not limited to:

- Proxy Voting
 - Votes all public company proxies in a manner consistent with CalPERS' Governance & Sustainability Principles and CalPERS' Investment Beliefs
- Engagement
 - Actively engages portfolio companies on executive and employee compensation, corporate board diversity, climate change, human capital management, and other Governance & Sustainability considerations to promote long-term value creation
- Partnerships
 - Leverages external and internal partnerships to actively engage global asset owners and managers, companies, data providers, regulators, and standards-setting bodies on material Governance & Sustainability factors
- Research
 - Continuous research, development and integration of best practices, proxy voting enhancements, and evolution of Governance & Sustainability

Governance & Sustainability | Proxy Voting and Engagement Update

- **Enhanced executive compensation analysis and accountability**
 - Voted “against” 54% of executive compensation proposals for poor pay-for-performance alignment (by comparison voted “against” 51% in FY19-20 and “against” 52% in FY18-19)
 - Voted “against” 3,896 Compensation Committee members, holding them accountable for poor pay-for-performance alignment and poor compensation practices (by comparison voted “against” 3,159 directors in FY19-20)
- **Improved corporate board diversity and accountability**
 - 73% of companies engaged since July 2017 have since added at least one diverse director to their boards (584 of 800 companies). Excluding delisted, acquired, and bankrupt companies, 81% of companies engaged have added at least one diverse director to their boards (550 of 682 companies)
 - Voted “against” 197 directors at companies where diversity engagements did not result in constructive outcomes (by comparison voted “against” 214 directors in FY19-20). Ran 8 shareowner campaigns at non-responsive companies surrounding board diversity (5 Majority Vote / 3 Vote “No” Campaigns)
 - Staff is in the process of identifying the 2021 target list of diversity companies
 - Partnered with CalSTRS, LACERA and SFERS on the California Board Diversity Initiative to improve board diversity at S&P 500 companies surrounding underrepresented groups
- **Engaged Climate Action 100+ companies**
 - CalPERS is leading engagements at 22 companies including 6 Japanese companies
 - Staff is currently evaluating engagement “next steps” for 2022 proxy season, including filing shareowner proposals
 - CalPERS filed/co-filed 3 shareowner proposals (2 withdrawn and 1 achieved 28% support)
 - Ran proxy solicitations at 6 companies at which climate-related proposals were flagged by the CA100+ initiative. Three proposals passed with majority support
 - Results and progress of collaborative engagements are detailed in the Climate Action 100+ December 2020 Progress Report (<http://www.climateaction100.org/>)

Governance & Sustainability | Climate Action 100+

CalPERS is playing a leading role in both strategy and implementation

- CalPERS convened the initiative following the carbon footprint of our global equity portfolio in 2015
 - Inaugural Chair (and current Chair) of the CA100+ Steering Committee
 - Initiative now has over 575 signatories with over \$54 trillion in assets under management
 - Signatories are engaging the 100 companies with the largest GHG emissions

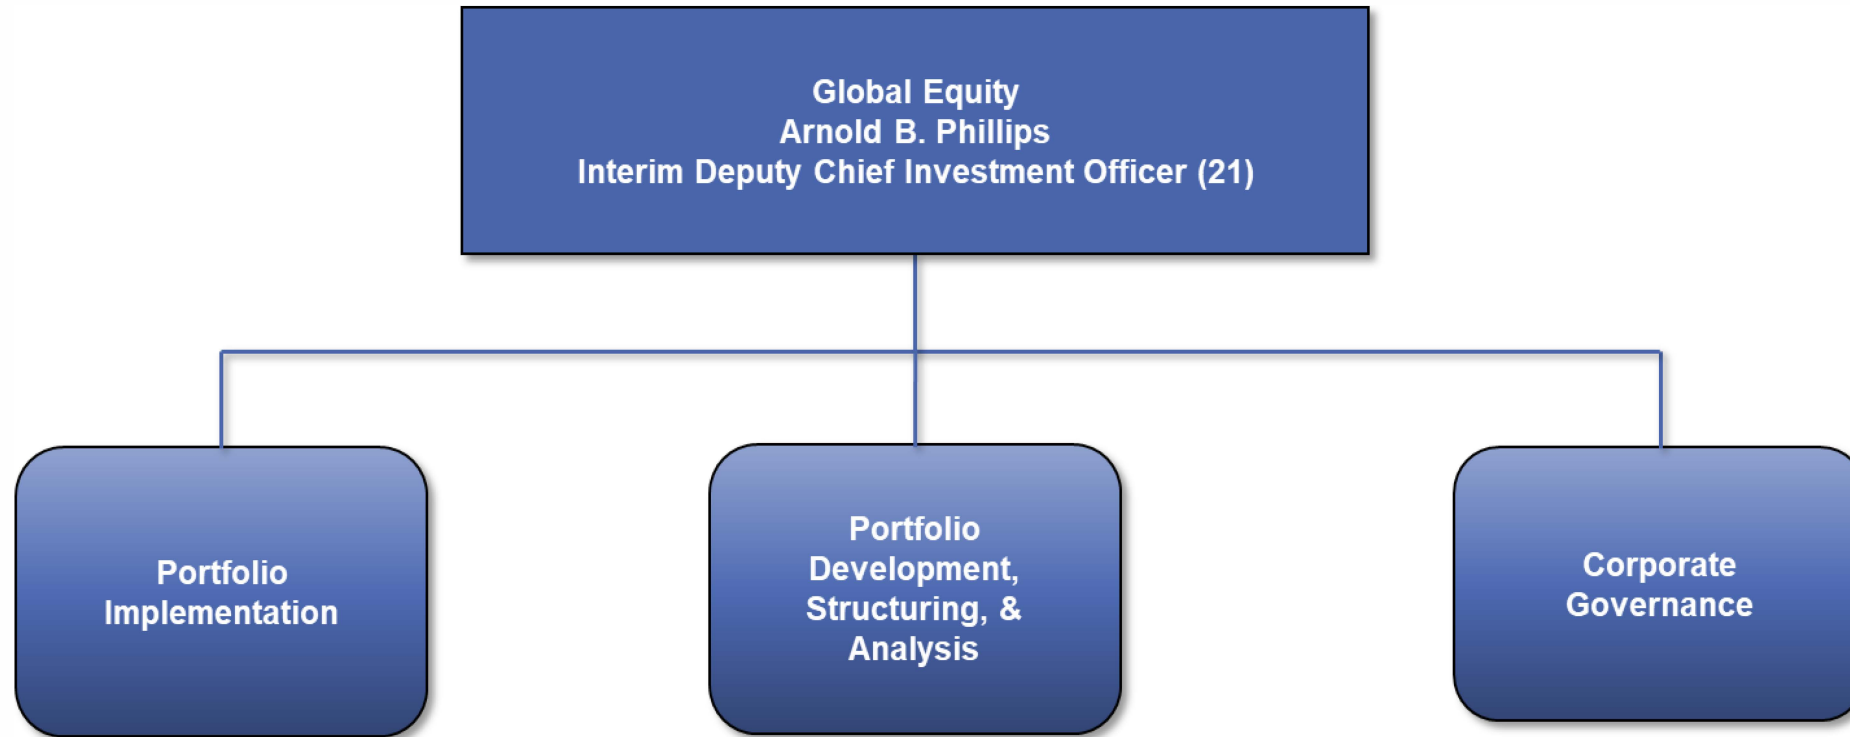

Notable successes

- Over half (53%) of CA100+ companies have now set a net zero by 2050 target or ambition
- CA100+ Net Zero Benchmark launched in March 2021
- ExxonMobil: CalPERS publicly supported and ran a proxy solicitation in support of four Engine No.1 director nominees and a proposal requesting improved disclosure of lobbying objectives
 - Three Engine No.1 director nominees were elected, and the lobbying proposal passed with 64% support

Climate Action 100+ Engagement Goals

- Investors signed on to Climate Action 100+ are requesting the boards and senior management of companies to:
 - Improve the governance of climate-related risks and opportunities
 - Curb greenhouse gas (GHG) emissions across the value chain to be consistent with net-zero by 2050, and
 - Strengthen climate-related financial disclosures in line with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)

Private Equity | Additional Information

- Restricting Private Equity Investments in Public Sector Outsourcers Policy:
 - To the best of CalPERS knowledge, the Policy has been effective in limiting our General Partners investments in public sector outsourcers, as CalPERS has not received any waiver requests in the last 12 months and all of our GPs have agreed to make good faith efforts to comply with the Policy.
 - This Policy has had no negative impact on PE Program investment opportunities.
- Status of Absolute Return Strategies (ARS) winddown/composition:
 - ARS legacy portfolio NAV of \$199.4M as of 6/30/2021, across 4 remaining positions.
 - Staff continues to actively seek monetization opportunities in the underlying portfolio with the respective managers.

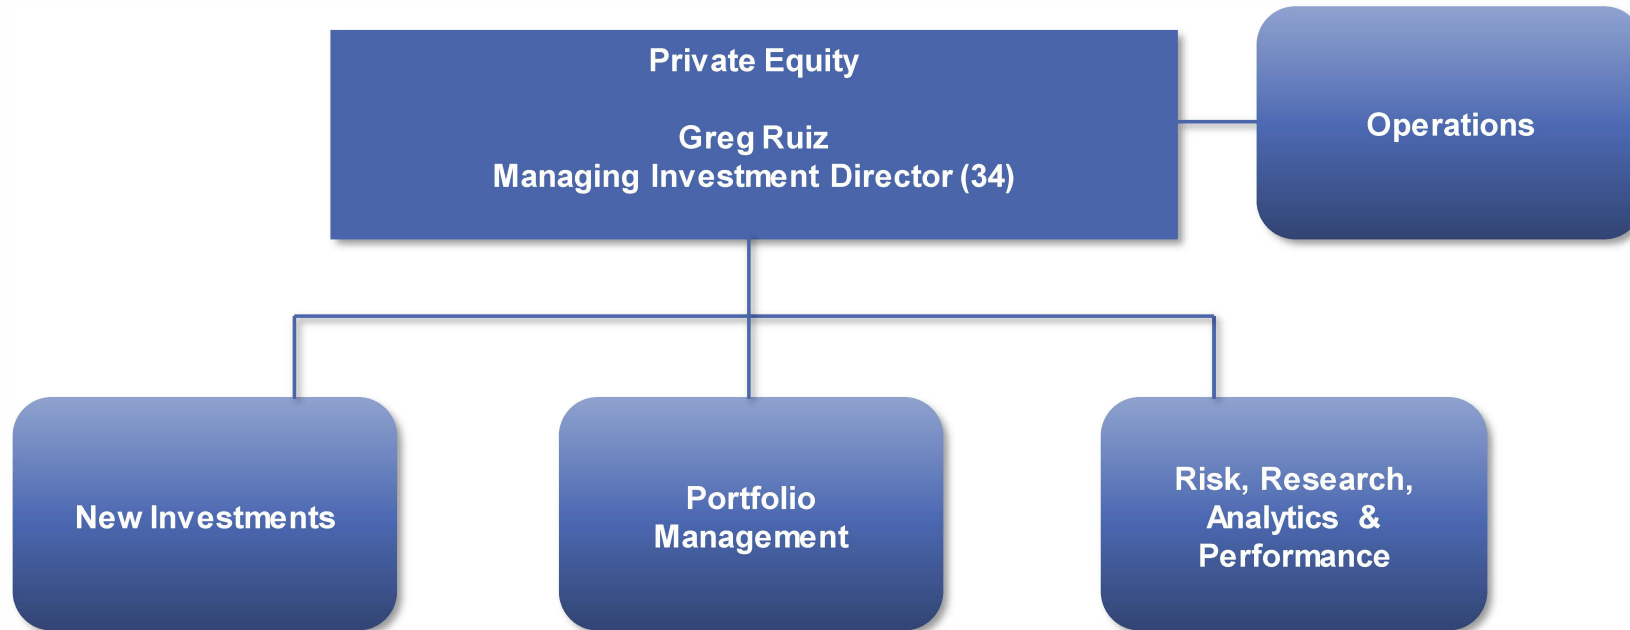

Private Equity | Integration of Governance & Sustainability Examples

CalPERS PE is developing a sustainability strategy to further integrate ESG factors into our assessment processes

PE currently integrates environmental, social, and governance (ESG) considerations by:

- Reviewing how GPs incorporate ESG into their investment process through the ILPA DDQ that includes a UNPRI-developed ESG questionnaire.
- Discussing ESG practices and issues at the Limited Partner Advisory Committee (LPAC) meetings.
