The Board of Administration of the California Public Employees' Retirement System (CalPERS) is pleased to submit the 2010-2011 fiscal year State Employers' Industrial Disability Cost Report. This report is in response to the legislative mandate of Section 20238 of the Government Code.

This report contains information on retirements placed on the roll, and each State employer's "incurred cost", commencing with the 2007-2008 fiscal year and ending with the 2010-2011 fiscal year.

The information contained in the State Employers' Industrial Disability Cost Report is intended to provide employers with a continued awareness of the costs associated with industrial disability retirements. Use of this report for other unrelated subjects may be inappropriate. Please contact Bill Karch, Supervising Pension Actuary, at 916-795-2856, should you have questions regarding this report.

The Board is pleased to distribute this information and provide employers with a continued awareness of the costs associated with industrial disability retirements.

Sincerely,

ROB FECKNER, President  
Board of Administration

**STATE EMPLOYERS'  
INDUSTRIAL DISABILITY  
COST REPORT**

**2010-2011 FISCAL YEAR**

**Introduction**

The Public Employees' Retirement Law (PERL), Section 20238, requires this report on an annual basis. This report presents the Incurred Industrial Disability cost by department, for State industrial disabilities processed in the period commencing with the 2007-2008 fiscal year and ending with the 2010-2011 fiscal year.

Industrial disability retirement (IDR) in this report applies to State safety, State peace officer/firefighter, State industrial, State patrol, or State miscellaneous members.

The purpose of the disability retirement benefit is to replace a portion of income for a retiree who cannot work because of a job-related injury or illness, which is expected to be permanent or to last indefinitely. Disability retirement determinations are made after a complete review of the member's medical and employment information.

Industrial disability retirement benefits are determined by the provisions of the Public Employees' Retirement Law (PERL) applicable to the member.

---

**Qualifying for  
Industrial  
Disability  
Retirement**

CalPERS members qualify for disability retirement benefits if they demonstrate substantial incapacity from performing the usual duties of their position with their current employer only.

---

**Industrial  
Disability  
Retirement  
Benefit**

The industrial disability retirement benefit is a monthly allowance equal to 50% of final compensation. However, if a member is eligible for service retirement and if the service retirement benefit is more than the industrial disability retirement benefit, the member may choose to receive the larger benefit. For a CalPERS member not actively employed with the State who became disabled while employed by some other CalPERS employer, the benefit is a return of the accumulated member contributions with interest.

Government Code Section 21428.1 provides an industrial disability retirement benefit for California Highway Patrol members employed in Bargaining Unit 5 who, as a result of a single event, incur serious bodily injury. The benefit provided is equal to the greater of the current industrial disability retirement benefit, or, three percent of final compensation multiplied by the number of years of service credited to the member, plus an annuity purchased with the accumulated additional contributions, if any.

**Legislative  
Background**

This is the twenty-fifth annual State Employers' Industrial Disability Cost Report. This report presents information for the 2007-2008 through the 2010-2011 fiscal years as required by Section 20238 of the Public Employees' Retirement Law (PERL) which reads:

“In addition to any other reports that it may be required to make by law, the board shall annually file, commencing January 1, 1987, a separate report to the Legislature and each appointing power and other appointing authority on the number of new state retirees, by individual state employer, that are processed in the immediately preceding fiscal year to the service, disability, and industrial disability retirement rolls and on the incurred cost of the system for the State members for the immediately preceding three fiscal years.

As used in this report, "incurred cost" means all paid and expected future costs of an industrial disability retirement. There shall be deducted from the gross incurred costs the amount of service time accrued by an employee.”

---

**Assumptions  
and Methods**

For purposes of this report, “expected future costs of an industrial disability retirement” has been interpreted as the actuarial present value of the industrial disability retirement payments to the member and his beneficiaries from the valuation date. “The amount of service time accrued by an employee” has been interpreted as the actuarial present value of the service retirement payments to the member and his or her beneficiaries assuming the member were to take the earliest eligible service retirement. The actuarial present values for all payments have been calculated based on the industrial disability retirement or service retirement mortality tables and the interest discount rate adopted by the CalPERS Board of Administration.

**Results**

Major findings regarding new state retirees placed on the roll in the 2010-2011 fiscal year by state plan and by individual state employer are presented in the following pages and summarized in tables 1 through 5.

**New Industrial Disability Retirements:**

There were 585 new IDR's placed on the roll for the 2010-2011 fiscal year, an increase of 34.5 percent over the 2009-2010 fiscal year. Of the 585 new IDR's, there was no incurred cost for 209 retirees who chose to receive a service retirement benefit which was more than the industrial disability retirement benefit. There was also no cost for 24 CalPERS members who were employed by a local agency or school at the time of their disability, and were not actively employed by the State at that time.

**Summary Statistics:**

Summary statistics for industrial disability retirees placed on the roll during July 1, 2010 through June 30, 2011 fiscal year, are shown in table 1. For comparison, summary statistics for industrial disability retirees placed on the roll during the July 1, 2009 through June 30, 2010 fiscal year are also provided.

**Table 1: Summary Statistics for New IDR's by State Plan**

Retirees not actively employed by the State prior to becoming disabled are excluded from the number of retirees in the above table. However, they are included in the total number of new state IDR retirements placed on the roll shown in table 3.

**Normal Cost Rates:**

The normal cost represents the cost assigned to an average member for a given year such that it would meet the continuing costs of a particular benefit if contributed each year starting with the date of membership. Therefore, a plan's industrial disability normal cost rate reflects the expected cost of its industrial disabilities. However, it should be borne in mind that some of the industrial disabilities do not really increase the total cost, because a member chooses to receive a service retirement benefit which is more than the industrial disability retirement benefit.

Normal cost rates for 2011-2012 and 2012-2013 fiscal years for ordinary and industrial disability retirements by State plan are presented in table 2.

### Service and Disability Retirements:

The number of state retirements by retirement type for fiscal years 2007-2008 through 2010-2011 are shown in the chart below.

The number of service retirements per year has been trending up during the past four years. However, the number of disability retirements has shown no definable trend during the same period.

Detailed information regarding the number of retirees and beneficiaries by age and retirement type for all state and school plans can be found in the respective State & Schools Actuarial Valuation Reports.

The total number and the percentage of service and disability retirements for the past four fiscal years shown in table 3.

Due to changes in standards under which disability retirement applications were reviewed, year to year comparisons of results in this report or with results in prior reports may be inappropriate.

**Estimated IDR Incurred Cost:**

The average cost of an Industrial disability retirement (IDR) for the most recent four fiscal years is shown in table 4. The IDR incurred cost column in table 4 and table 5, shows the difference between the total present value of IDR benefits payable and the total present value of service retirement benefits earned assuming the member were to take the earliest eligible service retirement. Both present values were calculated as of June 30, 2011.

The “IDR incurred cost” for each IDR varies considerably depending upon the member’s age at disability retirement, member’s final average compensation, credited service, and the benefit formula under which the member is covered. The cost for an individual may be zero. This is because a member, if qualified for service retirement, will receive an IDR benefit based upon the service retirement formula if such a benefit is greater.

Incurred costs for fiscal years after 2007-2008 are based on the demographic actuarial assumptions adopted by the CalPERS Board in April 2010.

Incurred costs for fiscal year 2010-2011 are based on the updated economic assumptions adopted by the CalPERS Board in March 2012, which lowered the discount rate from 7.75% to 7.5%.

The cost of industrial disability retirements and the counts of service, ordinary disability, and industrial disability retirements by individual State employer are presented in table 5 on the next page.
