

Legislative History

- 2014 SB 830 (Galgiani) – Would have required OSHPD to include “heart valve repair and replacement surgeries” in their annual risk-adjusted outcome reports for coronary artery bypass graft surgeries, and to annually publish a new risk-adjusted outcome report for all percutaneous cardiac interventions and transcatheter valve procedures performed in California. The bill was held in the Senate Appropriations Committee. *CalPERS Position: None.*
- 2001 Chapter 898 (SB 680, Figueroa) expands the risk-adjusted medical outcome reports prepared by OSHPD and requires that reports on surgical procedures include data on hospital and surgeon performance. In addition, OSHPD would be required to post these reports on the Internet for easier consumer access. *CalPERS Position: Support.*
