“Respondent’s Argument”

Pursuant to letter dated October 24, 2016, the attachments to letter dated October 21, 2016 have not been addressed or reviewed for oral argument. Dr. Khasugain submitted his report without regard for any of the reports submitted by Dr. Mauricio Valdes, MD, MRI’s, CT Scans, Notes; reports by Dr. Arrassh Kirkland, MD, EMG/NCS for carpal tunnel, also x-rays and MRI’s of hands and wrist along with supporting notes.

Dr. Khasugain, stated in testimony that there is no bulging disk, cord compression nor any signs of radiculopathy. The attached reports contradict his decision. The only MRI mentioned to be reviewed was dated June 18, 2014, any subsequent reports have not been addressed or mentioned specifically, MRI dated June 27, 2016.

The attachments sent with the letter dated October 21, 2016 reflect current conditions and show the previous findings stated by Dr. Khasugain are misstated and/or incorrect.

Respectfully Submitted,

Nicole Collins  
RefNo.2015-0026
