

Legislative & Policy Engagement Guidelines

Summary of Discussion

This discussion seeks to establish an ongoing framework for engaging with federal, state, and regulatory legislative bodies using the CalPERS Legislative and Policy Engagement Guidelines as a source policy document. Often, state and federal legislative activity and regulatory processes do not conform to a protocol consistent with the Board's regularly scheduled meetings, or communication standards. Thus, it is important to equip staff and the federal policy representatives with an appropriate understanding of the Board's policy framework and a sufficient mandate in order to facilitate a timely legislative or regulatory communication.
