RE: Petition for Reconsideration

Dear Board, let me first begin by thanking you for this opportunity to Petition for Reconsideration. Per the recommendations of the CalPers Counselor and hearing judge, I have confirmed that I have had the right to future medical and I am in the process of seeing a specialist to provide the committee, a clearer understanding of my unchanged medical condition. Once again affirming that I remain incapacitated to perform the duties of a correctional officer.

I am confident that the report from the specialist will corroborate what your CalPers Authorized Independent Medical Evaluating Physicians Dr. Niljar concluded in late 2011, Dr. Nystrom in 2003 and many other certified Orthopedic Doctors, Physical therapist and Functional Ergonomic Professionals who have evaluated my condition over the past 16 years, except for of course, Dr. Ha'Eri.

My belief in God gives me the faith to believe that the Executive office could not confidently base their decision on single doctors' report which was based on limited physical testing and opinions of the qualified CalPers independent Medical Evaluating Physicians prior to him. Nor do I believe they would they willfully or knowingly reinstate me to a position in which I have remained substantially incapacitated for 16 years.

Thank you for your thorough consideration.

Respectfully,

Dawn M. Brooks
