<sup>1</sup> See Section XII for components of CalPERS Policy Index. Current Asset Class Policy Benchmark performance is linked to their respective prior Policy Benchmark.

<sup>2</sup> Value Added is the excess bps converted into a dollar value by multiplying the excess bps by the fiscal year-to-date average market value.

<sup>3</sup> The Terminated Agency Pool (TAP) was funded in July 2013 and exists to provide benefit payments to members who are employees of agencies that have terminated their contract with CalPERS.

<sup>4</sup> Trust Level includes Absolute Return Strategies, Multi-Asset Class, and Transition and Plan Level portfolios.

<sup>5</sup> The notation "N/M" indicates that the return is not meaningful as Private Asset performance is measured on a quarterly cycle.

<sup>1</sup> Private Equity time weighted rate of returns are computed by State Street Bank and are based on General Partners' most recent received financial statements and any cash adjustments received prior to two business days before the end of the quarter.

<sup>2</sup> Value Added is the excess bps converted into a dollar value by multiplying the excess bps by the fiscal year-to-date average market value.

<sup>3</sup> Private Equity Stock Distribution Portfolio is highly concentrated and significant tracking errors are expected due to its use of the Global Equity based Private Equity Policy Benchmark.

<sup>4</sup> The notation "N/M" indicates that the return is not meaningful as Private Asset performance is measured on a quarterly cycle.

<sup>5</sup> Other includes Cash, Unclassified & Distributed Stock

<sup>1</sup> The data contained in this report reflects funds identified as current emerging managers or transition managers and their performance as of 03/31/17. This report does not include fund of fund advisors except for private equity. Excess basis points were calculated using the appropriate asset class policy benchmark (unless otherwise footnoted). Performance for this report is shown as Time-Weighted Returns.

<sup>2</sup> Public Equity performance is performance of the Global Equity - Emerging Manager composite. Managers' performance is compared to a composite benchmark consisting of asset-weighted individual benchmarks of the total current emerging manager or transition manager universe (i.e. at the asset class level each emerging manager is compared to their respective benchmark, not the Public Equity policy benchmark). International Transition returns do not equal total Transition returns as the Domestic fund was closed in February of 2017 and those 2 months of returns are included in the total.

<sup>3</sup> Private Equity performance is the performance of the Private Equity - Emerging Manager composite/hierarchy.

<sup>4</sup> N/M means that time weighted returns cannot be calculated because the partnership had negative net assets for at least one quarter during the time period.

**CASH IN** – The total contributions, net of temporary returns of capital, made by CalPERS towards investments.

**CASH OUT** – The total distributions received by CalPERS from its investments.

**CONTRIBUTIONS** – The total amount of cash that has been called from limited partners.

**DISTRIBUTIONS** – The total amount of cash and stock that has been paid out to limited partners.

**EXCESS BPS** – Excess basis points (BPS) is the difference between the portfolio or composite return and the benchmark return multiplied by 100 to convert the Excess BPS to a whole number.

Excess BPS Calculation

Excess BPS = (Portfolio or Composite Return – Benchmark Return) x 100

**INTERNAL RATE OF RETURN (IRR)** – Dollar weighted rate of return that shows profitability as a percentage, showing the return on each dollar invested. IRR equates the present value of a partnership's estimated cash flows (CF) with the present value of the partnership's costs. Before fees (BF) IRR is calculated before all expensed fees such as Asset Management, Disposition, Incentive Fees, etc. After fees (AF) IRR is calculated after all expensed fees such as Asset Management, Disposition, Incentive Fees, etc.

IRR is the quarterly discount rate that makes the following relationship hold:

Present Value (inflows) = Present Value (investment costs)

IRR Calculation

$IRR = CFO + CF1 / (1+IRR) + CF2 / (1+IRR)^2 + CF3 / (1+IRR)^3 \dots CFn / (1+IRR)^n$

**IRR COMPARED TO TIME WEIGHTED RATE OF RETURN (TWRR)** - According to the Global Investment Performance Standards (GIPS); using IRR is a more accurate method than TWRR to measure private equity funds. An IRR reflects the effects of the timing of cash flows in a portfolio. The IRR is required for private equity assets because the firm controls the cash flows into and out of the portfolio. A time-weighted rate of return (TWRR) will not offer the best measure for an investor to compare returns between private equity funds because the TWRR will not capture the critical effects of cash flow management within the control of the private equity manager.

**INVESTMENT MULTIPLE** – A measure of a fund's performance showing the fund's total value as a multiple of its cost basis. The computation is as follows:

Investment Multiple Calculation

(Distributions + Market Value) / Contributions

**MARKET VALUE: PRIVATE ASSETS** - An opinion of value as of a certain date as stated by either the investment advisor or independent appraiser. Market value differs from amount funded or net investment in that the value includes unrealized gains or losses during the holding period.

**MARKET VALUE: PUBLIC ASSETS AT SECURITY LEVEL** - Ending market value in the performance system is calculated as the shares \* price + income accrual. Market Value is generally computed by the Custodian based on CalPERS pricing hierarchy.

**MARKET VALUE: PUBLIC ASSETS AT PORTFOLIO LEVEL** - Ending market value in the performance system is calculated as the sum of the underlying securities' ending market values as described above +/- any open receivables or payables (uninvested assets). This is consistent with the Net Asset Value or Total Net Assets reported in accounting.

**REALIZED GAIN OR LOSS** – The gain or loss CalPERS realized from the disposition of an asset.

**RATE OF RETURNS** - CalPERS performance uses a daily Modified-Dietz methodology which is geometrically linked to produce time-weighted returns for longer periods.

Daily Return Calculation

Rate of Return<sub>Daily</sub> = Dollar Value Added / Average Balance

Where:

Dollar Value Added = Gains/losses due to price appreciation and income

Average Balance = Beginning Market Value + Net Cash Flows

Daily returns are then geometrically linked to produce multi-period returns. The linking formula is as follows:

$$R_{Monthly} = ((1 + R_1) \times (1 + R_2) \times \dots \times (1 + R_n)) - 1$$

**TOTAL EXPOSURE** – Total Exposure is the current reported value of investments plus remaining amount of unfunded commitments.

**UNREALIZED GAIN OR LOSS** – The difference between an asset's cost and market value.

**VALUE ADDED** – Value Added is the excess BPS converted into a dollar value by multiplying the excess BPS multiplied by the fiscal year-to-date average market value.

Value Added Calculation

Value Added = ((Portfolio or Composite Return – Benchmark Return) x 100) x fiscal year-to-date average market value

**DISCLAIMER** - Only actively traded portfolios are listed in CIO Report
