

Public Agency Regions Market Analysis

Summary of Discussion

This information item is a follow-up to the Contracting Agencies: Regional Assessment presented at the January Board Offsite. The Health Team will provide some background, an update of activities and a refresher of the original intent of the Public Agency health regions. Included in the presentation will be a history of Public Agency health regions, from 2005 to the present, as well as market analysis as provided by an external actuarial firm. This is the second presentation to determine whether changes are needed to the CalPERS regions and/or regional factor calculations. The project will culminate in a decision from the Board in December of 2018.
