

Delivering Health in Rural California

Summary of Discussion

Purchasers of health care, such as CalPERS, are considering methods to better serve its members who live in some of the most remote locations in California ranging from far north, to eastern mountains and southern desert counties. The presenters will outline the challenges and potential solutions for care that address geographic and provider access, regulatory requirements, population and public health management, potentials for telemedicine, remote healthcare monitoring, mobile care and other solutions for CalPERS employers and purchasers.
