

Accountable Care Organizations: A Brief Overview and Evaluation

**Presenter
Bio**

Cheryl Damberg, PhD, RAND Distinguished Chair in Health Care Payment Policy and Professor at the Pardee RAND Graduate School

She is a national expert in the areas of pay for performance (P4P) and value-based purchasing applications of performance measures, physician and hospital performance measurement, measures of cost-efficiency/resource use, and evaluating the effects of performance measurement systems and alternative payment models. She has twice provided Congressional testimony regarding repeal of the SGR and embedding P4P elements into Medicare payments for physicians (enacted with passage of MACRA). Damberg is leading a 5-year, \$17.5 million AHRQ grant to study the evolution of health systems and identify factors that contribute to high performance and adoption of evidence-based practices. She is also leading a 5-year NIH-funded study to evaluate the impact of the Integrated Healthcare Association's statewide value-based P4P program and a CMS-funded project to conduct analyses to strengthen the Medicare STAR rating program used to determine quality-based payments for Medicare Advantage plans. Previously, Damberg served as Director of Research for the Pacific Business Group on Health, where she led early efforts to measure the quality of provider organizations and report comparative performance results to consumers, was a senior consultant to Fortune 100 firms for the MEDSTAT Group, and was a research fellow in the U.S. Department of Health and Human Service's Office of Disease Prevention and Health Promotion. Dr. Damberg received her Ph.D. from the Pardee RAND Graduate School and an M.P.H. from the University of Michigan.
