Introduction

The California Public Employees' Retirement System (CalPERS) Total Fund Investment Policy, adopted by the CalPERS Investment Committee (Committee), sets forth the CalPERS investment beliefs and overarching investment purposes and objectives with respect to its investment programs. The CalPERS Total Fund Investment Policy specifically covers key areas of investment strategy, including performance objectives, asset allocation strategies, benchmark selection, investment risk management, and derivatives, leverage, and divestment policies, among other elements that are applicable to all asset classes and programs at CalPERS.

This document sets forth the investment policy (Program Policy) for the Global Fixed Income Program (Program). The design of this Program Policy ensures that staff, investors, managers, consultants, and other participants selected by CalPERS take prudent and careful action while managing the Program. Additionally, use of this Program Policy assures sufficient flexibility in managing investment risks and returns associated with the Program.

This Program Policy should be read in conjunction with and is subject to conditions contained within the CalPERS Total Fund Investment Policy (Total Fund Policy). This Program Policy shall also be managed to comply with all applicable Investment Office policies.
