

VIDEOCONFERENCE MEETING
STATE OF CALIFORNIA
PUBLIC EMPLOYEES' RETIREMENT SYSTEM
BOARD OF ADMINISTRATION
FINANCE & ADMINISTRATION COMMITTEE

WEBEX PLATFORM

TUESDAY, NOVEMBER 17, 2020

1:31 P.M.

JAMES F. PETERS, CSR
CERTIFIED SHORTHAND REPORTER
LICENSE NUMBER 10063

APPEARANCES

COMMITTEE MEMBERS:

Mr. David Miller, Vice Chairperson

Mr. Henry Jones

Ms. Fiona Ma, represented by Mr. Frank Ruffino

Ms. Stacie Olivares

Mr. Jason Perez

Mr. Ramon Rubalcava

BOARD MEMBERS:

Ms. Margaret Brown

Mr. Rob Feckner

Ms. Lisa Middleton

Ms. Eraina Ortega

Ms. Shawnda Westly

Ms. Betty Yee, represented by Ms. Lynn Paquin

STAFF:

Ms. Marcie Frost, Chief Executive Officer

Mr. Michael Cohen, Chief Financial Officer

Mr. Matthew Jacobs, General Counsel

Mr. Scott Terando, Chief Actuary

Mr. Randall Dziubek, Deputy Chief Actuary

Ms. Jennifer Harris, Chief, Financial Planning, Policy & Budgeting Division

APPEARANCES CONTINUED

STAFF:

Ms. Pam Hopper, Committee Secretary

Ms. Michele Nix, Controller

Mr. Dallas Stone, Chief, Operations Support Services
Division

ALSO PRESENT:

Mr. Tim Behrens, California State Retires

Mr. Bijan Mehryar, League of California Cities

Ms. Serena Petite, City of Tulsa, Oklahoma

INDEX

	<u>PAGE</u>
1. Call to Order and Roll Call	1
2. Approval of the November 17, 2020 Finance and Administration Committee Timed Agenda	2
3. Executive Report - Michael Cohen	3
4. Action Consent Items - Michael Cohen	4
a. Approval of the September 15, 2020 Finance and Administration Committee Meeting Minutes	
b. Semi-Annual Contracting Prospective Report	
c. Contracts Administration: Affirmation of Investment Manager Contracts Without Defined Duration	
5. Information Consent Items - Michael Cohen	6
a. Annual Calendar Review	
b. Draft Agenda for the February 2021 Finance and Administration Committee Meeting	
c. Semi-Annual Health Plan Report	
d. Pension Contracts Management Program Report	
6. Action Agenda Items	
a. 2019-20 Basic Financial Statements - Michael Cohen, Michele Nix	6
b. 2020-21 Mid-Year Budget Revision - Michael Cohen, Jennifer Harris	17
c. CalPERS Board Elections - Candidate Nomination Petition Options - Dallas Stone	27
7. Information Agenda Items	
a. Annual Review of Funding Levels and Risk Report - Scott Terando, Randall Dziubek	56
b. Summary of Committee Direction - Michael Cohen	98
c. Public Comment	99
Adjournment	100
Reporter's Certificate	101

PROCEEDINGS

1
2 VICE CHAIRPERSON MILLER: I think we can go ahead
3 and get started. I'll call the meeting of the Finance and
4 Administration Committee to order and ask Ms. Hopper to
5 call the roll, please.

6 COMMITTEE SECRETARY HOPPER: Theresa Taylor?

7 VICE CHAIRPERSON MILLER: Excused.

8 COMMITTEE SECRETARY HOPPER: Henry Jones?

9 COMMITTEE MEMBER JONES: Here.

10 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
11 Fiona Ma?

12 Frank Ruffino for --

13 VICE CHAIRPERSON MILLER: I saw him a few minutes
14 ago.

15 ACTING COMMITTEE MEMBER RUFFINO: Present.

16 COMMITTEE SECRETARY HOPPER: Thank you.

17 David Miller?

18 VICE CHAIRPERSON MILLER: Here.

19 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

20 COMMITTEE MEMBER OLIVARES: Here.

21 COMMITTEE SECRETARY HOPPER: Jason Perez?

22 COMMITTEE MEMBER PEREZ: Here.

23 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

24 COMMITTEE MEMBER RUBALCAVA: Here.

25 COMMITTEE SECRETARY HOPPER: Mr. Chair, all is in

1 attendance.

2 VICE CHAIRPERSON MILLER: Thank you very much,
3 Ms. Hopper.

4 So we're -- okay. So our first item is the
5 approval of the November 17th, 2020 Finance and
6 Administration Committee meeting timed agenda. What's the
7 pleasure the Committee?

8 COMMITTEE MEMBER JONES: Move approval.

9 COMMITTEE MEMBER OLIVARES: I move.

10 I second.

11 VICE CHAIRPERSON MILLER: Okay. It was moved by
12 Director Rubalcava and second -- no. Who was that?

13 COMMITTEE MEMBER JONES: No. It was Jones.

14 VICE CHAIRPERSON MILLER: Oh, Jones. President
15 Jones and seconded by Director Olivares.

16 So any discussion on the matter?

17 Okay. I'll call for the question. Ms. Hopper,
18 call the roll, please.

19 COMMITTEE SECRETARY HOPPER: Henry Jones?

20 COMMITTEE MEMBER JONES: Aye.

21 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
22 Fiona Ma?

23 David Miller?

24 VICE CHAIRPERSON MILLER: Aye.

25 COMMITTEE SECRETARY HOPPER: Frank Ruffino for

1 Fiona Ma?

2 ACTING COMMITTEE MEMBER RUFFINO: Yes.

3 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

4 COMMITTEE MEMBER OLIVARES: Aye.

5 COMMITTEE SECRETARY HOPPER: Jason Perez?

6 COMMITTEE MEMBER PEREZ: Aye.

7 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

8 COMMITTEE MEMBER RUBALCAVA: Aye.

9 COMMITTEE SECRETARY HOPPER: Mr. Chair, I have
10 all ayes. Henry Jones making the motion, Stacie Olivares
11 seconding it.

12 VICE CHAIRPERSON MILLER: Thank you, Ms. Hopper.
13 The motion passes.

14 We move on to Item 3, the Executive Report. So
15 I'll call on Mr. Cohen.

16 CHIEF FINANCIAL OFFICER COHEN: Thanks, Mr. Vice
17 Chair. Just one thing to highlight that I think will give
18 a little bit of context when we get to the discussion item
19 on the annual report of our local agencies, risk and
20 finance situation. I was able to, a couple of weeks ago,
21 attend the State Department of Finance's economic
22 forecasting conference. This conference that they hold
23 every year is really their opportunity to vet out what the
24 underlying economic forecast will be for the Governor's
25 budget that will be released on January 10th or

1 thereabouts in 2021.

2 And I think the thing that I really took away,
3 which won't be a surprise to anyone listening, is the
4 uncertainty upon which our entire economic situation is
5 resting right now. I believe things are moving very fast
6 as it relates to COVID and the vaccine, as you heard
7 earlier today. But exactly what pace the state's economy
8 will recover once we sort of turn the corner on the
9 pandemic remains to be seen. And if that's true at the
10 State level, it's even more so at the local level where
11 difference situations and different economics are going to
12 be more important. And that's something the Financial
13 Office will continue to be watching as we go forward.

14 So with that, I'll turn it back to you and we can
15 go ahead and work through the agenda.

16 VICE CHAIRPERSON MILLER: Okay. That brings us
17 to Item 4, action consent items. Having seen anyone
18 wanting to pull any of them, so what's the Committee's --
19 anyone want to move for approval of them. Do we have do
20 them individually, Mr. Cohen, or can we --

21 CHIEF FINANCIAL OFFICER COHEN: You can go ahead
22 and take them as a single motion.

23 VICE CHAIRPERSON MILLER: Okay. We'll take it
24 in --

25 COMMITTEE MEMBER JONES: Move approval.

1 VICE CHAIRPERSON MILLER: -- a single motion.

2 COMMITTEE MEMBER JONES: Move approval.

3 VICE CHAIRPERSON MILLER: Moved by President
4 Jones.

5 Seconded by?

6 COMMITTEE MEMBER PEREZ: (Hand raised.)

7 VICE CHAIRPERSON MILLER: Director Perez.

8 Okay. Ms. Hopper, I don't see any comments or
9 discussion, so let's call the question and take the role.

10 COMMITTEE SECRETARY HOPPER: Okay. Henry Jones?

11 COMMITTEE MEMBER JONES: Aye.

12 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
13 Fiona Ma?

14 ACTING COMMITTEE MEMBER RUFFINO: Aye.

15 MEETING MODERATOR: Pam, I think Frank is having
16 issues -- oh, there he is.

17 COMMITTEE SECRETARY HOPPER: Okay. David Miller?

18 VICE CHAIRPERSON MILLER: Aye.

19 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

20 COMMITTEE MEMBER OLIVARES: Aye.

21 COMMITTEE SECRETARY HOPPER: Jason Perez?

22 COMMITTEE MEMBER PEREZ: Aye.

23 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

24 COMMITTEE MEMBER RUBALCAVA: Aye.

25 COMMITTEE SECRETARY HOPPER: Mr. Chair, I have

1 all ayes with Henry Jones making the motion Jason Perez
2 seconding it for items 4a, 4b, and 4c.

3 VICE CHAIRPERSON MILLER: Thank you. The ayes
4 have it, the motion is approved.

5 And so we move to Item 5, information consent
6 items. And I'm not seeing any requests to pull any of
7 those.

8 So that brings us to Item 6, action agenda items.
9 Starting with 6a, basic financial statements. Back to Mr.
10 Cohen and Ms. Nix.

11 (Thereupon a slide presentation.)

12 CHIEF FINANCIAL OFFICER COHEN: Thanks, Mr.
13 Miller. I'll turn it over to our Controller Michele Nix
14 in a moment. But this is an annual action item where we
15 seek the Committee's approval of CalPERS's basic financial
16 statements. So with that, let me have Michele walk you
17 through the content of what we've got going on on our
18 finances this past year.

19 CONTROLLER NIX: Okay. Thank you, Michael.

20 Good afternoon, Mr. Vice Chair and members of the
21 Committee. I'm Michele Nix, CalPERS Controller and team
22 member.

23 Today, I would like to present a few highlights
24 from the basic financial statements for the fiscal year
25 ending June 30th, 2020. These will be incorporated into

1 the CAFR upon your approval.

2 Next slide, please.

3 --o0o--

4 CONTROLLER NIX: Okay. Basically, the PERF had
5 total assets that ended up at 392.5 -- they were net
6 assets that ended up at 392.5 billion. And the annual
7 money weighted rate of return was five percent resulting
8 in positive performance across most globally-diversified
9 asset classes. Drivers of the PERF's investment return
10 included strong performances in fixed income.

11 Slide 3, please.

12 --o0o--

13 CONTROLLER NIX: The PERF annual rates of return.
14 The investment return is comparable between time weighted
15 and money weighted this year again. The time-weighted
16 rate of return was 4.7 percent and the money-weighted rate
17 of return was five percent at June 30th, 2020.

18 Next slide.

19 --o0o--

20 CONTROLLER NIX: This basically just is a review
21 of the differences between the money-weighted rate of
22 return and the time-weighted rate of return based upon
23 questions that we received last year. The time-weighted
24 rate of return measures the compounded growth rate over
25 the period being measured, while eliminating the

1 distorting effects of inflows and outflows of cash, which
2 would consider when money was added or withdrawn from the
3 fund. However, management fees are removed when
4 calculating the time-weighted rate of return.

5 Another way of saying this is that the
6 time-weighted rate of return is weighted heavier to time.
7 So those transactions that are older would matter more to
8 performance than those transactions that are younger.
9 Time-weighted rate of return reporting is the standard for
10 investment performance.

11 On the other hand, the money-weighted rate of
12 return expresses investment performance net of investment
13 expenses that are adjusted for cash flows and changing
14 amounts invested. Another way of saying this is that the
15 money-weighted rate of return is weighted heavier to
16 money. So those transactions that are larger in value
17 would matter more to performance than those transactions
18 that are smaller in value. The money-weighted rate of
19 return is a GASB requirement.

20 Next slide, please.

21 --o0o--

22 CONTROLLER NIX: The PERF's net position
23 increased by 19.8 billion, or 5.3 percent, from 372.6
24 billion as of June 30th, 2019 to 392.5 billion as of June
25 30th, 2020. Over a ten-year period from June 30th, 2011

1 to June 30th, 2020, the net position increased 150.7
2 billion, or 62.3 percent.

3 Next slide, please.

4 --o0o--

5 CONTROLLER NIX: Additions to the PERF's net
6 position include investment income, employer and employee
7 member contributions. Investment income is comprised of
8 investment interest income, dividend income, and net
9 appreciation or depreciation of the fair value of
10 investments. Net investment income was 18.5 billion in
11 fiscal year 2019-20 compared to the 23 billion in fiscal
12 year 2018-19 due to a lower investment rate return
13 experience in the current fiscal year.

14 Employer contributions increased by 7.3 billion
15 or 47 percent due to a large State supplemental payment
16 received in fiscal year 2019-20. Employer contribution
17 rates increased between 0.8 percent and four percent for
18 State, 1.7 percent for schools, and between 1.9 and --
19 percent and 4.8 percent on average for public agency
20 miscellaneous and safety plans.

21 Number of contributions increased 0.2 billion or
22 5.1 percent because of an increase in the total active
23 number of participants or members. Deductions from the
24 PERF are comprised of benefit payments, refunds of
25 contributions to members and beneficiaries, and costs of

1 administering the PERF.

2 Benefit payments are the primary expense of a
3 retirement system. For fiscal year 2019-20, retirement,
4 death and survivor benefits payments increased 1.6
5 billion, or 6.5 percent, primarily due to the cost of
6 living increases in the benefit payments and to an
7 increase in the number of retirees and beneficiaries from
8 707 -- 712,115 as of June 30th, 2019 to 700 -- 732,521 --
9 29 thousand as of June 30th, 2020. That's a mouthful.

10 Next slide, please.

11 --o0o--

12 CONTROLLER NIX: As mentioned in slide 6,
13 investment income is made up of appreciation -- of
14 depreciation of invest -- appreciation and depreciation of
15 investments, interest income, and dividend income. As the
16 chart shows, global debt securities had the largest gains
17 towards investment income.

18 Slide 8, please.

19 --o0o--

20 CONTROLLER NIX: The unfunded actuarial
21 liabilities or the excess of the co-actuarial accrued
22 liability over the market value of assets was 158.4
23 billion at June 30th, 2019. The increase in unfunded and
24 actuarial liability over the 10-year period is primarily
25 due to an increase in actuarial accrued liability, which

1 increased from 308.3 billion as of June 30th, 2010, which
2 is the actuarial valuation date to 531.2 billion as of
3 June 30th, 2019.

4 Slide 9.

5 --o0o--

6 CONTROLLER NIX: In fiscal year 2019-20, 27.8
7 billion was received in contributions while 25.8 billion
8 was paid in benefits. Contributions increased 37.3
9 percent from 2018 to '19, primarily due to additional
10 payments made by employers towards unfunded liabilities
11 paid in 2019-20 for the fiscal -- this fiscal year,
12 basically.

13 Next slide, please.

14 --o0o--

15 CONTROLLER NIX: These financial statements as
16 well as the CAFR are a result of many hours of hard work
17 from FRAS team members who prepared these reports within
18 the normal deadlines despite the challenges that 2020
19 presented to us.

20 This ends my presentation. But upon approval,
21 these basic financial statements will be included in the
22 CAFR for June 30th, 2020. I'm happy to take any questions
23 that you might have at this time.

24 VICE CHAIRPERSON MILLER: Okay. I have a
25 question from President Jones.

1 COMMITTEE MEMBER JONES: Yeah. Thank you, Mr.
2 Vice Chair.

3 Just a comment. I guess it's a question and a
4 comment. I know that on the first slide you mentioned
5 that the money-weighted return was five percent, but most
6 of our stakeholders, and our members, and our colleagues n
7 other pension funds they focus on the time-weighted and --
8 which was 4.7. But I'm just hoping that when we
9 communicate (inaudible) that we're using -- you know, I
10 understand the five has to -- that's a GASB requirement,
11 but I think we need to be sure we communicate up front
12 that our return was 4.7, because, you know, we take so
13 many hits about what our returns were and some people use
14 an annual rather than fiscal year. So I think it's
15 important to just keep that in the forefront.

16 So with that, I will move the recommendations
17 agenda item, yeah, 6a.

18 VICE CHAIRPERSON MILLER: I have a question from
19 Director Brown as well.

20 COMMITTEE MEMBER JONES: Okay.

21 BOARD MEMBER BROWN: You want to get a second
22 first from someone or do you want me to ask my question.

23 VICE CHAIRPERSON MILLER: We can do it after we
24 have a motion on the floor. I just -- you were in the
25 queue before we had the motion, so...

1 BOARD MEMBER BROWN: Okay. Great. I'll ask my
2 question. It's pretty simple. A couple of months ago,
3 Mr. Cohen and I raised an issue about the Board consultant
4 expense being shown in staff salaries. Are we still doing
5 that, and if we are, can I get a breakout of those
6 numbers?

7 CHIEF FINANCIAL OFFICER COHEN: We are still
8 doing that. We, as we talked about last time, view it as
9 completely appropriate. But we're happy to, as we did
10 last time, get you a breakdown of those expenses in the
11 investment personnel and other expenses category,
12 absolutely.

13 BOARD MEMBER BROWN: Great. And then are we
14 on -- okay. So I have a comment on the mid-year budget,
15 but I'll wait on those adjustments. We're not on that one
16 yet, is that correct?

17 CHIEF FINANCIAL OFFICER COHEN: That's correct.
18 That will be the next item.

19 BOARD MEMBER BROWN: Thanks. Thank you.

20 VICE CHAIRPERSON MILLER: Okay. Thank you. So
21 back to President Jones. I think you were about to move
22 approval of the --

23 COMMITTEE MEMBER JONES: Yes, I moved approval.

24 VICE CHAIRPERSON MILLER: Okay. Do we have a
25 second?

1 COMMITTEE MEMBER RUBALCAVA: I'll second, Mr.
2 Miller. Ramon Rubalcava.

3 VICE CHAIRPERSON MILLER: Oh, Mr. Rubalcava.
4 Okay. Seeing no more discussion.

5 Oh, no. I have Director Middleton for a
6 question.

7 BOARD MEMBER MIDDLETON: Okay. Thank you, Mr.
8 Vice Chair. I'm looking at page nine of nine. And we had
9 a substantial increase in contributions in 2019 -- in the
10 2019-20 fiscal year. What are the projections for the
11 next few years in terms of employer contributions?

12 CHIEF FINANCIAL OFFICER COHEN: Sure. Let me
13 take a first shot at that and then Michelle can add on
14 anything. I think the large increase you're seeing is a
15 combination of the planned increases as well as the
16 unplanned sort of discretionary payments, in particular
17 we're starting to see more local agencies make pension
18 obligation bond contributions, which come in large chunks
19 and can really, yeah, change the trajectory of the line,
20 as well as the State has made -- you know, they made the
21 \$6 billion payment in the 2017-2018 year, which has caused
22 the spike you see in that graph. And then they made a
23 smaller payment, but substantial nonetheless in this
24 following -- in this last year.

25 So I think overall you would expect the trend

1 line to be steady increases, based on the base
2 contributions. But the reality is we don't really know
3 what agencies are going to issue pension bonds or make
4 other large discretionary payments. And certainly the
5 State budget is another area that has huge uncertainty.
6 And that's generally what you'll -- where you'll see the
7 spikes.

8 Overall, you would tend to see the two lines
9 merging over the very long term over the next several
10 decades. But what -- you sort of see those large
11 increases is a little bit impossible to forecast.

12 BOARD MEMBER MIDDLETON: Certainly. Michael,
13 that makes perfect sense. Do we have a breakout, either
14 in this report that I missed or somewhere elsewhere, where
15 we could separate out the discretionary payments from the
16 scheduled payments?

17 CHIEF FINANCIAL OFFICER COHEN: Sure. Michele,
18 you want to take that one.

19 CONTROLLER NIX: Sure. There is a breakout.
20 I'll have to figure out what page it's on, because I don't
21 know what the pages are off the top of my head. So can I
22 get back with you on that?

23 BOARD MEMBER MIDDLETON: You certainly can. And
24 I'm not surprised to find that you've got that data
25 sitting there.

1 (Laughter.)

2 CONTROLLER NIX: I do have it sitting here, but I
3 don't have it memorized, so I need to figure it out.

4 CHIEF FINANCIAL OFFICER COHEN: We'll -- we'll go
5 ahead and send it out as Committee direction that all the
6 Board members will be able to see.

7 BOARD MEMBER MIDDLETON: Thank you, both.

8 VICE CHAIRPERSON MILLER: Thank you.

9 I'm seeing no more requests for discussion.

10 Oh, I am seeing a comment from Mr. Terando that
11 that will be information in the presentation later today.

12 So -- okay. So at this point, I'll call for the
13 question and ask Ms. Hopper to take the role.

14 COMMITTEE SECRETARY HOPPER: Henry Jones?

15 COMMITTEE MEMBER JONES: Aye.

16 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
17 Fiona Ma?

18 ACTING COMMITTEE MEMBER RUFFINO: Aye.

19 COMMITTEE SECRETARY HOPPER: David Miller?

20 VICE CHAIRPERSON MILLER: Aye.

21 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

22 COMMITTEE MEMBER OLIVARES: Aye.

23 COMMITTEE SECRETARY HOPPER: Jason Perez?

24 COMMITTEE MEMBER PEREZ: Aye.

25 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

1 COMMITTEE MEMBER RUBALCAVA: Aye.

2 COMMITTEE SECRETARY HOPPER: Mr. Vice Chair, I
3 have a motion made by Henry Jones, Ramon Rubalcava
4 seconding. All ayes for Item 6a.

5 VICE CHAIRPERSON MILLER: All right. The ayes
6 have it. The motion is approved.

7 That brings us to Item 6b, the 2020-2021 mid-year
8 budget revision. Back to you, Mr. Cohen.

9 (Thereupon a slide presentation.)

10 CHIEF FINANCIAL OFFICER COHEN: Thank you, Mr.
11 Vice Chair. This is another action item, a traditional
12 item that we bring you in November. Revisions to the
13 budget you originally adopted in April. This is something
14 I've mentioned several times over the last number of
15 months that obviously this year's budget has changed quite
16 significantly on an operational standpoint due to the
17 pandemic. And a vast majority of CalPERS team members
18 working remotely. And so we -- as I mentioned at the July
19 off-site, we have taken a hard look at those expenses that
20 are essential and those that we -- we felt we could do
21 without. And I'll have Jennifer Harris, our Budget
22 Director, walk you through those.

23 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

24 CHIEF HARRIS: Thanks, Michael. Good afternoon, Mr. Vice
25 Chair and members of the Committee. Jennifer Harris with

1 CalPERS Financial Office.

2 Agenda Item 6b is an action item and we request
3 your approval today to revise the 2020-21 budget. Also
4 included in this item is a report on final year-end
5 expenses for prior fiscal year 2019-20.

6 Next slide, please.

7 --o0o--

8 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

9 CHIEF HARRIS: In summary, CalPERS proposed to reduce the
10 2020-21 budget by 72.3 million. There is a 68.5 million
11 reduction in operating costs and a 3.9 million reduction
12 in external fees.

13 Also included is the elimination of 32 vacant
14 positions reducing the total authorized positions for the
15 first time in several years. In general, the operating
16 cost reductions are driven by the COVID-19 pandemic and
17 includes statewide compensation decreases, as well as
18 CalPERS-directed reductions to further reduce expenses and
19 achieve savings to limit fiscal impacts to the PERF.

20 The changes you'll see in external fees reflect
21 revised investment strategies, as well as updated health
22 plan enrollment data and pharmacy benefit costs.

23 Next slide, please.

24 --o0o--

25 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

1 CHIEF HARRIS: This slide displays the total revised
2 mid-year budget, which is included as attachment 1 to this
3 agenda item. The chart reveals the budget category
4 changes as compared to the annual budget approved by the
5 Board in April. Overall, there is a 9.9 percent operating
6 cost reduction, which is driven by reductions in the
7 administrative operating cost budget. There is also 0.4
8 percent reduction in external fees.

9 Next slide, please.

10 --o0o--

11 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

12 CHIEF HARRIS: Within operating costs, CalPERS proposes a
13 68.7 million, or 12.6 percent, reduction in administrative
14 operating costs. This includes 52.1 million in personal
15 services expenses and 16.6 million reduction in OE&E.

16 The decrease in the personal services budget
17 includes statewide compensation reductions, that's 33.3
18 million. It also includes reductions for additional
19 collective bargaining adjustments at 4.3 million and 14.5
20 million in reductions based on CalPERS-directed analysis
21 of operations and workload. With a focus on protecting
22 its core mission and services to members, CalPERS proposes
23 to eliminate 32 vacant positions, hold additional vacant
24 positions open during the fiscal year, and reduce
25 temporary help and overtime usage beyond the reductions

1 you saw in April.

2 The 16.6 million decrease in OE&E reflects both
3 permanent and one-time CalPERS directed reductions to most
4 line items including general expenses, printing, postage,
5 travel, training, data processing and consultant costs.
6 Reductions by line item can be seen on page five of the
7 mid-year budget.

8 Next slide, please.

9 --o0o--

10 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

11 CHIEF HARRIS: CalPERS also proposed adjustments to the
12 investment operating cost budget. Compared to the annual
13 budget, there is a 1.6 million net increase in investment
14 operating costs. This is primarily due to and estimated
15 increase for appraisal fees resulting from renegotiated
16 contracts, as well as in anticipation of an increased
17 number of appraisals that will be required this year.

18 This increase is somewhat offset by decreases in
19 technology consultants, as well as costs for trading and
20 portfolio management systems resulting from delayed
21 projects.

22 Finally, within operating costs, CalPERS proposes
23 a net 1.3 million decrease to its headquarters building
24 budget. This includes operating cost reductions resulting
25 from reduced services and renegotiated contracts, as well

1 as non-operating cost reductions due to delaying
2 non-critical building improvements.

3 Next slide, please.

4 --o0o--

5 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

6 CHIEF HARRIS: For external fees, CalPERS proposes a net
7 3.8 million decrease. There is a 6.2 million increase in
8 external Investment Manager fees for operative --
9 opportunistic strategies for new strategies to leverage
10 market disruptions. There is also a 10 million decrease
11 in third-party administrator fees.

12 As detailed in the mid-year budget, this is
13 includes 3.9 million decrease in health plan fees
14 resulting from members migrating to health plans with
15 lower administrative costs. There is also 5.2 million
16 decrease for pharmacy benefit costs. This is a result of
17 the Board's September 2020 decision to transition from a
18 tradition spread and rebate driven contract to a market
19 leading acquisition based contract. This is consistent
20 with action agenda item -- or I'm sorry, action consent
21 item that you just approved number 4b, the semiannual
22 contracting prospective report, which had the OptumRx
23 contract in there.

24 That finishes my comments on the mid-year budget.
25 But before opening up for questions, I'd like to quickly

1 highlight where we ended the 2019 fiscal year.

2 Next slide, please.

3 --o0o--

4 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION

5 CHIEF HARRIS: As shown here and detailed in attachment 2,
6 the 2019 year-end expenditure report, CalPERS ended the
7 prior fiscal year with 283.9 million in unexpended funds.
8 This was 15 percent in unexpended funds. This includes
9 78.7 million in operating costs and 205.2 million in
10 external fees.

11 The underutilization of operating costs is
12 largely driven by position vacancies as well as
13 operational impacts from the COVID-19 pandemic. In
14 contrast, amounts unspent for external management fees
15 results from CalPERS decreased reliance on external
16 investment advisors.

17 All budgeted funds remain in the PERF until
18 they're actually expended. Therefore, this 283.9 million
19 unspent remained available for investment.

20 That is the end of the slides.

21 In conclusion, CalPERS recommends you approve the
22 72.3 million proposed in -- the reduction proposed in the
23 mid-year budget. This reduction is consistent with salary
24 and benefit decreases that are affecting all State of
25 California employees and it signals CalPERS commitment to

1 reducing its costs.

2 Thank you for the opportunity to walk you through
3 this mid-year budget and we welcome your questions.

4 VICE CHAIRPERSON MILLER: Thank you very much,
5 Ms. Harris, for a very comprehensive report. And thanks
6 to the -- all, everyone, the whole team there for all the
7 fine work that went into these lovely results.

8 So at this point, I have a question from Director
9 Brown.

10 BOARD MEMBER BROWN: Thank you, Chair Miller.

11 Ms. Harris, yes, of course, I did get stuck on
12 page five, the best page, which are the adjustments to
13 administrative operating costs. SO that's 6b, attachment
14 1, page five of 18, for those of you who want to follow
15 along.

16 And I just had a couple of quick questions. You
17 know, I live for the percentages. And so we had a huge
18 decrease in printing 76.3 percent. So -- so what do we
19 expect that to be? Is that like signage, way-finding
20 signage or is that just agendas we have for public
21 meetings? I'm just trying to think. That seems like an
22 awful lot of printing for all the online stuff we do.

23 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
24 CHIEF HARRIS: Thank you for that question. That's a good
25 question. The majority of that decrease we're actually

1 seeing resulting from our decision to send out the three
2 prospective reports virtually --

3 BOARD MEMBER BROWN: Okay.

4 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
5 CHIEF HARRIS: -- instead of in print.

6 BOARD MEMBER BROWN: Yeah. I didn't think that
7 would account, you know, all the agendas you guys print
8 and put on the back table at Board meetings would account
9 for that, but I just thought I'd ask.

10 And then I did see, you know, big reduction in
11 travel. Also a huge reduction in training. I don't
12 that's necessarily a good thing. And hopefully we'll be
13 continuing to train our staff maybe through online means.
14 I mean, training is important for the staff and I hope we
15 are going to work on that. And that's probably for --
16 more for the CEO.

17 And then there's another huge reduction in
18 something called University Enterprises, Inc., and I --
19 it's just a very small amount, but I don't actually know
20 what that is, a 43.1 percent reduction. So can you tell
21 me what that is?

22 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
23 CHIEF HARRIS: Yes. CalPERS, as well as many State
24 agencies, contract with University Enterprises, which is
25 actually an enterprise with Sac State. And that's a

1 contract for which we use student assistants. So we --
2 with our temporary help and our reductions, that was one
3 of the reductions that we're looking at.

4 BOARD MEMBER BROWN: Oh. So we have it at the
5 top on temporary help and then we have it down here with
6 university extensions.

7 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
8 CHIEF HARRIS: The temporary help is for things like
9 season clerks and retired annuitants. That's the number
10 that you're seeing at the top. But for the student
11 assistants, we actually have a contract and we put that in
12 OE&E, because we don't pay benefits on that. It's just
13 a -- it's just a contract again with Sac State for that
14 service.

15 BOARD MEMBER BROWN: Okay. Thank you.

16 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
17 CHIEF HARRIS: Sure.

18 BOARD MEMBER BROWN: You learn something new
19 every day. Thank you.

20 FINANCIAL PLANNING, POLICY & BUDGETING DIVISION
21 CHIEF HARRIS: Um-hmm.

22 VICE CHAIRPERSON MILLER: Okay. I'm seeing no
23 more clarifying questions. And so, at this point, what's
24 the Committee's please with regard to a motion?

25 COMMITTEE MEMBER JONES: Okay. I'll move it,

1 since no one else will.

2 (Laughter.)

3 VICE CHAIRPERSON MILLER: Okay. Is someone --
4 we're looking for a motion to approve the mid-year budget
5 revisions that have been presented.

6 COMMITTEE MEMBER PEREZ: Henry motioned and I'll
7 second it.

8 VICE CHAIRPERSON MILLER: Okay. President Jones
9 motioned and Director Perez seconds.

10 I'm seeing no call for any further discussion.
11 So I'll call for the question and ask Ms. Hopper to take
12 the roll call.

13 COMMITTEE SECRETARY HOPPER: Henry Jones?

14 COMMITTEE MEMBER JONES: Aye.

15 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
16 Fiona Ma?

17 ACTING COMMITTEE MEMBER RUFFINO: Aye.

18 COMMITTEE SECRETARY HOPPER: David Miller?

19 VICE CHAIRPERSON MILLER: Aye.

20 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

21 COMMITTEE MEMBER OLIVARES: Aye.

22 COMMITTEE SECRETARY HOPPER: Jason Perez?

23 COMMITTEE MEMBER PEREZ: Aye.

24 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

25 COMMITTEE MEMBER RUBALCAVA: Aye.

1 COMMITTEE SECRETARY HOPPER: Mr. Vice Chair,
2 Henry Jones had made the motion, Jason Perez second for
3 Agenda Item 6b.

4 VICE CHAIRPERSON MILLER: Okay. The motion
5 passes.

6 We'll move on to Action Agenda Item 6c, the
7 CalPERS Board election candidate nomination petition
8 options. And I believe that's Mr. Dallas Stone will be
9 presenting that if I'm not mistaken, Mr. Cohen.

10 CHIEF FINANCIAL OFFICER COHEN: That's correct.
11 I'll turn it over to Mr. Stone.

12 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
13 Thanks Michael. Good afternoon, Mr. Vice Chair
14 and members of the Committee. Dallas Stone, CalPERS team
15 member. At the September Finance and Administration
16 Committee meeting, the Committee requested the Board
17 election team bring back an action item in November with
18 information on pursuing an emergency regulation to suspend
19 the original signature requirement in the nomination
20 petition process, which would permit potential candidates
21 to submit non-original scanned or faxed copies of
22 nomination petition signatures.

23 I'll provide that information along with
24 non-regulatory changes that would reduce potential
25 challenges presented by gathering original signatures

1 during the existing pandemic.

2 CalPERS election Regulations Section 554.5
3 currently provides that the nomination of prospective
4 candidates is established by the petition on the
5 nomination petition forms provided by CalPERS.

6 The nomination petition form must be signed by
7 the nominee and by the established number of eligible
8 active or retired members. The minimum number of petition
9 signatures required for candidacy is established by the
10 CalPERS Board through the adoption of the notice of
11 election. Historically, the Board has established 250
12 signatures as a minimum number of signatures. Attachment
13 3 to this agenda item provides the existing regulation
14 section which includes the original signature requirement.

15 The part of the regulation that is relevant to
16 this discussion provides that in no event shall less than
17 250 valid original signatures be required. The
18 requirement for original signatures requires that the
19 potential candidate must submit wet signatures rather than
20 be scanned or faxed copies of signatures. If the
21 committee decides to move forward with an emergency
22 regulation to modify the original signature requirement,
23 this is a regulatory language that will need to be
24 suspended or modified.

25 The process for a proposed emergency regulation

1 to suspend or modify the original signature requirement is
2 an abbreviated version of the general regulatory process.
3 The emergency regulation process would require the Board
4 elections team to prepare a regulatory package and come
5 back to the Committee for approval.

6 The Office of Administrative law, or OAL,
7 requires that the regulatory package include the proposed
8 text of the regulation, a finding that there is an
9 emergency, and a description of the specific facts
10 supported by substantial evidence that demonstrate the
11 existence for an emergency and the need for immediate
12 adoption of the proposed regulation.

13 After the Board's approval, the package is
14 submitted to the OAL and the public comment period begins,
15 which is five calendar days. At the conclusion of the
16 comment period OAL is required to review the regulatory
17 package and make a decision on the proposed emergency
18 regulation within 10 calendar days. If OAL approves, t
19 files the emergency regulation with the Secretary of State
20 at which time the regulation becomes effective.

21 At a minimum, the process will likely take about
22 20 days from the Board's approval of the regulatory
23 package. The OAL makes the final determination on whether
24 to approve the proposed emergency regulation before it can
25 be implemented. If approved, the regulation would be in

1 effect for 180 days from the date it is filed with the
2 Secretary of State.

3 The notice of election, which includes the
4 election schedule and nomination procedures is approved by
5 the CalPERS Board in February of 2021. If the Committee
6 opts to pursue emergency regulatory changes, then the
7 proposed regulation would need to be effective prior to
8 the approval of the notice of election, which means that
9 Board would need to approve the regulatory package in
10 December 2020 or early January 2021 to allow sufficient
11 time for public comment, OAL approval, and filing with the
12 Secretary of State.

13 For discussion purposes, I wanted to provide
14 information on non-regulatory internal process changes
15 that are available to help mitigate the risks and
16 challenges surrounding in-person gathering of signatures
17 during a pandemic, should they be necessary when we begin
18 the election process next year.

19 One internal process change that could be made is
20 to extend the nomination petition period by adding
21 approximately two weeks to the beginning of the period.
22 This change would be implemented at the Board's discretion
23 through the adoption of the election schedule and the
24 notice of election. The change would allow additional
25 time for potential candidates to safely gather original

1 signatures, should they choose to do so by mail or other
2 means that do not involve person-to-person contact.

3 This change is contingent on our election vendor
4 having the capability to print and mail the notice of
5 election within a shortened time frame. Our elections
6 believes this is likely doable.

7 Another change that is available is the
8 modification to the nomination petition form to provide a
9 single signature form in addition to the standard
10 multi-signature form. One version would be a single
11 signature nomination petition form only allowing one
12 signature as seen in the sample provided in attachment 1.
13 The other version would be the standard multi-signature
14 nomination petition form as provided in attachment 2.

15 This is an action item concerning whether to move
16 forward with emergency regulations to modify the signature
17 gathering requirements for the nomination petition process
18 in the 2021 member-at-large Board election.

19 I'm happy to answer any questions that you might
20 have at this time. Thank you.

21 VICE CHAIRPERSON MILLER: Thank you, Mr. Stone
22 I do not see any requests to speak from the
23 Board.

24 It looks like we have one public comment on Item
25 6c.

1 Oh, no. I do have President Jones and then
2 Director Brown. So President Jones.

3 COMMITTEE MEMBER JONES: Yeah. Thank you, Mr.
4 Vice Chair. Just a couple questions. There was a
5 reference made to approving in December, but we don't have
6 a Board meeting in December. So what was that reference
7 being made to? And secondly, if it does require action,
8 can it be done in November? Whatever you were referring
9 to that was requiring action in December. That's the
10 first question.

11 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
12 Yeah. Mr. Jones, so what we're -- what we're
13 trying to state is that if an action is taken today, that
14 basically directs our elections team to work with our
15 Legal Office to develop and emergency regulation package.
16 That regulation package would require the Board's approval
17 before we submit it to the Office of Administrative Law.
18 So we would need to have a special meeting with the Board
19 to approve that regulation package before submitting it to
20 OAL for -- to start the process.

21 COMMITTEE MEMBER JONES: So you cannot complete
22 that process to be -- to have it as a November meeting?

23 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
24 This month? We would have to present --

25 COMMITTEE MEMBER JONES: I'm sorry. I'm sorry.

1 We're in November.

2 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

3 We are.

4 COMMITTEE MEMBER JONES: I mean -- so it would
5 have to be by December, so it can't be at January off-site
6 then.

7 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

8 We could do it very early January, but, you know,
9 we're -- we are expecting at least 20 days for us to
10 package everything up and submit it and go through the
11 comment period and OAL approval.

12 COMMITTEE MEMBER JONES: Okay.

13 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

14 And OAL could have additional questions to us
15 with regards to how we're substantiating the case of that
16 there is indeed an emergency.

17 COMMITTEE MEMBER JONES: Okay.

18 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

19 So, you know, time is of the essence.

20 COMMITTEE MEMBER JONES: I see.

21 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

22 And if we did it in January, there could be no
23 guarantee that we would have it in place before we would
24 bring to the Board in February of 2021 the notice of
25 election for approval to begin --

1 COMMITTEE MEMBER JONES: I see.

2 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
3 -- to being the 2021 member-at-large election.

4 COMMITTEE MEMBER JONES: So what I hear you
5 saying that we would need to have a special meeting in
6 December to make sure that the process is complete.

7 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
8 Conservatively, we would like it in December, but
9 at the latest January.

10 COMMITTEE MEMBER JONES: Okay.

11 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
12 Thank you.

13 COMMITTEE MEMBER JONES: And, you know -- and
14 I -- if we decide to make these changes, I would be open
15 to a special meeting in December, if that's the
16 concurrence of the Committee -- Finance Committee members,
17 and -- well, no, we would really need a full Board,
18 because it requires Board action.

19 So unless other Board members have any concerns
20 about that, I'll work with the CEO to identify a specific
21 day that works for everyone, if we are going to move
22 forward with this proposal. Okay.

23 VICE CHAIRPERSON MILLER: Okay. Thank you, Mr.
24 President.

25 Director Brown.

1 BOARD MEMBER BROWN: Thank you. Dallas, I'm
2 wondering if you can just tell me what is the -- again,
3 the difference between attachment 1 and attachment 2. So
4 attachment 2 is two pages and requires all the signatures
5 and then attachment 1 is just for one signature?

6 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

7 Yeah. So in order to make things very simple for
8 all of our members, we thought, you know, if there was a
9 candidate that was interested in maybe sending something
10 out through social media or somebody wanted to go on our
11 elections webpage on our site, and download, and sign the
12 petition form, we thought that just providing a single
13 signature form might be -- would be easier for them.

14 And basically, the difference between attachment
15 1 and attachment 2 is attachment 1 is really just an
16 abbreviated version of attachment 2.

17 BOARD MEMBER BROWN: Okay.

18 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

19 And attachment 2 typically has 50 pages. It's
20 for folks to take to large gatherings and have signatures.
21 We only provided just a sample of the first two pages just
22 file size and overall simplicity.

23 BOARD MEMBER BROWN: Yeah, I see that.

24 The only thing about downloading the form, like I
25 say, if you -- I'm going to download the form and sign it

1 and send back it in, it has the last four of our -- your
2 candidate's Social Security numbers on there, so you'd
3 have to white that out or something, block that out.

4 I do like the single -- the single one. I know
5 with I ran three years ago, four years ago, when I would
6 send out the whole thing with budget pages, they'd go how
7 many do I have to get? I'd go, oh, fill them.

8 No, but it's nice to have just -- a place for
9 just one. But you would just send out the first page
10 over, and over, and over, and over, and over again is what
11 I would do. So that's very interesting.

12 I just want to -- I just want to ask the
13 Committee that, you know, whatever you do you make sure
14 that it's safe, not only for the candidates and for the
15 beneficiaries, because remember this is all members for
16 this next upcoming election. And so since it impacts me,
17 you know, I don't want to say anything, but it sure would
18 be easier just to say, you know, no signatures or 50
19 signatures. I know that would open up the candidate pool,
20 but I just don't want to make it too difficult. So that's
21 my comments. Thank you.

22 VICE CHAIRPERSON MILLER: Okay. Director
23 Olivares.

24 COMMITTEE MEMBER OLIVARES: Thank you, Mr.
25 Miller. I wanted to follow up on Ms. Brown's comment.

1 I'm concerned about keeping Social Security numbers safe.
2 There's a lot of information that can be accessed just
3 with four digits and a name, as well as an employer. And
4 so I wanted to know what safeguards we have in place.

5 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

6 What is your question again, Ms. Olivares. I
7 apologize.

8 COMMITTEE MEMBER OLIVARES: What safeguards do we
9 have in place to prevent identity theft. On these forms
10 we're asking for name, signature, last four digits of
11 social, and employer. There's a lot of information we can
12 get.

13 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

14 Correct. And our internal team does need that
15 information in order to identify the member that signed
16 the petition form to indeed validate that they are an
17 eligible signee on the petition form.

18 So typically, it would be the gathering -- the
19 gathering of the signatures is conducted by the candidate.
20 And then the candidate would submit their package to our
21 Board Elections Coordinator in Sacramento and then our
22 internal staff would work through the myCalPERS system to
23 validate those eligible signatures to confirm that they
24 did meet the 250-signature requirement.

25 COMMITTEE MEMBER OLIVARES: My question was what

1 safeguards do we have to prevent identity theft, at the
2 moment of collection of signatures to the submission of
3 documents?

4 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

5 Well, I guess my comment would be, Ms. Olivares,
6 is that we are not actively working with the candidate as
7 they're gathering signatures. So I would assume that the
8 candidate would be, you know, putting safeguards in as
9 they're collecting them. And then they are directly
10 submitted to our Board Elections Coordinator.

11 After that, we have the internal ownership of
12 that data, we -- we -- we confirm that they are eligible
13 to sign it. And then after that, they are stored in a
14 secured area, you know, on CalPERS's campus.

15 COMMITTEE MEMBER OLIVARES: My understanding is
16 that we have a higher level of safeguards internally with
17 member information and retiree information. So I would --

18 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
19 Correct.

20 COMMITTEE MEMBER OLIVARES: -- imagine that we'd
21 be consistent in that process. And I would hope that we
22 can Matt Jacobs take a look at this too and then maybe a
23 risk review of this.

24 I would wouldn't put my -- the last four digits
25 of my social security number on this. So I don't know if

1 there's another way we can go about this, but I would want
2 to make sure that we protecting member's information and
3 retiree's information at all costs.

4 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

5 Absolutely. And I'm happy to work with our Legal
6 team and our Information Security team with regards to the
7 issue that you stated, Ms. Olivares, to see if there's
8 another way for us to identify the member and ensure that
9 they're eligible when they sign the nomination petition
10 form.

11 VICE CHAIRPERSON MILLER: Yeah, unless it's
12 done --

13 COMMITTEE MEMBER OLIVARES: Thank you. I'm
14 hoping we can hear back on that soon. I also wanted to
15 make a comment on emergency regs and OAL. Having gone
16 through that process a few times, it will take a while, so
17 I understand why we might need a Board meeting in
18 December. That's a very long process with a lot of back
19 and forth.

20 VICE CHAIRPERSON MILLER: Yeah. And, Mr. Stone,
21 just to build Director Olivares comments, in my personal
22 experience, and I think others -- people who have been
23 through the process will also attest that a lot of
24 members, while they are happy to sign and endorse you,
25 they will -- they will not put those numbers and their

1 signatures are disqualified.

2 They have a legitimate concern. And so I think
3 at minimum if that is a requirement, some best practice
4 guidance for candidates and the people helping them get
5 signatures, if they're not just doing it by themselves,
6 with a clipboard for the most part, is -- would be --
7 would be very welcome.

8 Yeah. So -- so that's that.

9 I do have Mr. Jones with a question or comment.

10 COMMITTEE MEMBER JONES: Yeah. Thank you, Mr.
11 Vice Chair.

12 You know, I -- on the issue, I completely support
13 the need to have the necessary protections for our
14 members, but I don't think this is exposing our members
15 anymore than the old process in terms of signature
16 gathering, because the requirement of 250 signatures, I
17 personally probably only witness maybe a dozen people
18 actually signing those petitions. So what happens is you
19 get people on your behalf going to different people having
20 them sign. And then they pass that document on to someone
21 else and ultimately it comes back to CalPERS with those
22 signatures and the last four digits of the Social Security
23 number.

24 So I don't see that this is any more risk than
25 our current practice, if we're going to have a form that

1 someone can sign, and either email it or give it to
2 someone else to get another signature. So I believe that,
3 you know, whatever process are in place now for the old
4 method, this is not changing that process for the
5 protection of those members.

6 VICE CHAIRPERSON MILLER: Okay. Thank you.
7 Director Brown again.

8 BOARD MEMBER BROWN: Thank you.

9 Ms. Olivares raises a really good point. And I
10 think this is why it's always great to have new blood and
11 a new set of eyes on this process. Like Mr. Miller, I did
12 run into problems with people who didn't want to sign.
13 And, yes, like Mr. Jones says, those forms sometimes get
14 passed onto other people. And I don't know who has seen
15 those forms with the Social Security numbers.

16 And, yes, you can glean a lot, even with the last
17 four. So I do agree with Ms. Olivares that we should find
18 another way that doesn't require the last four digits of
19 the social security, some other identifying information
20 potentially, or once -- I also like one signature on a
21 form. So a lot of times I would just send one out at a
22 time, which is very problematic. But I would seal them
23 and so there wouldn't be, you know -- keep them safe.

24 But I think, Ms. Olivares, you raise a very good
25 point. And I think we should try to do something to

1 protect that information. We're being required to get it
2 to run for office, so CalPERS should have protections in
3 place to protect beneficiaries.

4 Thank you.

5 VICE CHAIRPERSON MILLER: Okay. Looks like
6 President Jones.

7 COMMITTEE MEMBER JONES: Yeah. Thank you, Mr.
8 Chair.

9 Yeah, I, too, am very concerned about the
10 protection of our members. And unless there was a way to
11 make a change in our processes within a month, so our
12 election process can go forward, I would be amenable to
13 that, but I don't think we could make those changes now to
14 still have an orderly election coming up.

15 So that is something that I would support looking
16 at as we go forward. But to try to make that significant
17 change with one month, and we've already indicated that
18 we've got to do something by December to set -- be ready
19 for this upcoming election. So I don't think we have the
20 capacity to make those kind of fundament changes.

21 You know, one of the things is some -- voting
22 processes include issuing everyone a unique identification
23 number. That's a possibility. But you can't accomplish
24 that at this stage for our upcoming election.

25 CHIEF EXECUTIVE OFFICER FROST: Yeah. And, Mr.

1 Jones, everyone -- every member in the system does have a
2 unique identification number, other than their Social
3 Security number that was issued through myCalPERS, but
4 they would have to go in and acquire that number or look
5 up that number.

6 But I think what we should do is, understanding
7 that this is an issue that has come forward that the Board
8 is concerned about, let's give this to Dallas and his team
9 to go and see what the options are and we can bring back a
10 full range of options. As Mr. Jones indicated, it's
11 probably difficult to do that for this next election. So
12 let us also think about what other safeguards we can put
13 in place for the current process.

14 VICE CHAIRPERSON MILLER: Yeah. Point well
15 taken. And if we have anything going for what is
16 emergency regs, the simpler it is, the more likely we will
17 get it addressed in time without it having coming back
18 from OAL to -- they find the -- well, they send things
19 back a lot. Even when they're very well considered, you
20 may have to go through a round or two of question and
21 answer with them.

22 So, I guess I'll, at this point -- I see no more
23 requests for discussion. So I'll ask if anyone wants to
24 put forth a motion to go forward with preparing on the
25 issue, I guess, of the electronic signature question,

1 whether there's any inclination to pursue that which would
2 require a regulation change.

3 Do we have a motion?

4 COMMITTEE MEMBER RUBALCAVA: Mr. Miller, this is
5 Ramon Rubalcava. I will make a motion that we do ask for
6 the Office of Administrative Law to allow us to change
7 from original signatures to non-original signatures.

8 VICE CHAIRPERSON MILLER: And is there a second
9 to that?

10 COMMITTEE MEMBER JONES: Second

11 VICE CHAIRPERSON MILLER: Okay. We have a motion
12 and a second.

13 COMMITTEE MEMBER OLIVARES: I have a --

14 VICE CHAIRPERSON MILLER: I'll open it for
15 discussion. And it looks like Director Olivares.

16 COMMITTEE MEMBER OLIVARES: Thank you, Mr.
17 Miller.

18 So if we were to allow electronic signatures,
19 there are other identifiers through various types of
20 software providers, which would ask identifying
21 information about the person signing, in terms of their
22 address -- their current address, previous addresses,
23 other affiliations, which could be used to cross-reference
24 the CalPERS identification for that individual.

25 CHIEF EXECUTIVE OFFICER FROST: Yeah. I think

1 you're getting at some of the options that quickly came to
2 mind for me as well, is that this process seems a tad bit
3 dated, with the fact that you need original signatures or
4 non-original signatures, when we have technology that
5 likely could support this and do the validation into
6 myCalPERS and authenticate appropriately.

7 COMMITTEE MEMBER OLIVARES: Um-hmm.

8 CHIEF EXECUTIVE OFFICER FROST: So let us gather
9 some options and we can bring those back to you after
10 we've had a chance to really do some more research.

11 COMMITTEE MEMBER OLIVARES: Great. Thank you.

12 CHIEF EXECUTIVE OFFICER FROST: Uh-huh.

13 VICE CHAIRPERSON MILLER: Thank you.

14 Yeah. And I've got Director Brown.

15 BOARD MEMBER BROWN: One last comment. As we
16 start finding high-tech ways to solve this problem,
17 remember that the majority of people who participate in
18 these elections are retired and older, set in their ways,
19 and some aren't even on the Internet. So let's make sure
20 we still allow for something manual.

21 Thank you.

22 VICE CHAIRPERSON MILLER: Okay. I'm seeing no
23 more -- oh, President Jones.

24 COMMITTEE MEMBER JONES: Yeah. Thank you, Mr.
25 Vice Chair. Yeah, to Ms. Brown's comment. We're not

1 eliminating the ability for someone to sign a wet
2 signature and send that in. So that still would exist, is
3 that correct, Mr. Stone?

4 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

5 Again, it's base on your direction. And I was
6 just going to ask, you know, when we do take action, we
7 have to be very clear on what your direction is, because I
8 will have to go back with the Legal Office and we will
9 have to develop, you know, the exact verbiage of that
10 regulatory change that we will be submitting and that you
11 will be voting on to approve.

12 So what -- I think what I'm hearing so far is
13 that you guys are going to be taking up an option to allow
14 our members, our candidates to submit non-wet signatures.
15 So I'm assuming this is like a photo copy or some type of
16 electronic download of the form that we currently provide.
17 And we would accept that in lieu of the wet signature.

18 COMMITTEE MEMBER JONES: Well, then -- then all
19 that will be returned to us in December, so that we could
20 move forward, is that the plan?

21 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

22 Correct. I just want to make sure that we're
23 very clear on what you want our team and the legal team to
24 draft, because at that point, if we come back to you in
25 December and we are -- we cannot hit the right mark with

1 regards to what you wanted to see with that reg -- with
2 that emergency regulation, then, you know, we'll be a bit
3 behind in terms of our timing to get everything packaged
4 up and submitted appropriately.

5 COMMITTEE MEMBER JONES: And well I would support
6 Ms. Brown's notion that we still allow wet signatures for
7 those who don't have access to technology to send those in
8 as they normally do.

9 VICE CHAIRPERSON MILLER: Director Olivares.

10 COMMITTEE MEMBER OLIVARES: Thank you, Mr.
11 Miller.

12 To Mr. Stone's point, everything in the emergency
13 reg has to be spelled out completely clearly. It requires
14 a lot of detail. So to that end, there might be questions
15 about how we validate these signatures. What is our
16 process for doing that, once the signatures have been
17 collected.

18 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

19 So we do not have a archive of member signatures.
20 We do not compare the signature to a signature that we
21 have on file. What we do is we -- we take the nomination
22 petition form and the information that was provided by the
23 signatory. We review the information that they provided
24 in our myCalPERS system to validate that they were an
25 eligible voter in that upcoming election, and that that

1 petition was signed. And then, at that point, that would
2 be an eligible signature to count towards the minimum of
3 the 250.

4 COMMITTEE MEMBER OLIVARES: Can't we check for
5 redundancies?

6 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:
7 We do check for redundancies. If someone signed
8 multiple times, we would only allow one signature on that
9 form.

10 COMMITTEE MEMBER OLIVARES: Okay. Thank you.

11 VICE CHAIRPERSON MILLER: Okay. I'm seeing no
12 more requests to speak. And before I call the question, I
13 will -- actually, I'm going to -- I think I will be
14 abstaining, because -- oh, it looks like we have a public
15 comment on 6c. So let's hear our public comment before we
16 do any movement toward voting.

17 So, Mr. Fox.

18 STAKEHOLDER RELATIONS CHIEF FOX: Yes, Mr. Chair.
19 We have Mr. Tim Behrens of California State Retirees on
20 Item 6c.

21 MR. BEHRENS: Thank you, Kelly. Chairman Miller,
22 members of the Committee, I thought I had a simple
23 solution for you. But now after listening to Dallas's
24 presentation, it doesn't sound quite so simple. CSR is
25 going through a three-year election process. And the

1 board waived our normal election process because of the
2 pandemic. And all of our members that are running for
3 chapter office or delegate are self-nominated, so there is
4 no contact made by anyone face-to-face.

5 They just fill out the appropriate form, send it
6 in, and they get on the ballot. Having said that, I don't
7 know if that's possible or not. My next thought was that
8 at least reduce from the 250 to say 50, because the
9 process is going to be so difficult to manage by the
10 candidates running for office. And then looking down the
11 road in the long one, since we gave our stakeholders an
12 opportunity to vote over the Internet, maybe in the long
13 run we could have the same thing for nominations done
14 through CalPERS website, where all I'd have to do is get
15 on there, open up portal, fill it out for the candidate
16 I'm supporting, and that would count as a signature.

17 Thank you. Good luck.

18 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

19 If I could just comment -- if I could just
20 comment on that really quick. You know, there's obviously
21 a menu of options at your disposal with this discussion.
22 And it could be reducing the signatures from 250 to
23 whatever number you would like. It could be completely
24 eliminating the signature gathering requirement and
25 obviously accepting non-original signatures on the

1 nomination petition form.

2 I know that back in September, Ms. Taylor did ask
3 with regard to LACERA and LACERS, you know, what they had
4 -- what they had done. And LACERA did change their
5 process to allow an additional 48 hours after the
6 nomination petition process had closed to submit the
7 original wet signatures. And then the Los Angeles City
8 Employees Retirement System, they brought forth to their
9 board allowing either additional time to gather required
10 signatures, reducing the number of signatures from 100 to
11 50, or completely suspending the signature-gathering
12 requirement for their elections. And their board did
13 decide on suspending the signature requirement altogether
14 for that one election.

15 So I did -- at least wanted to bring that to your
16 attention, if that's something that you guys would also
17 like to entertain for discussion.

18 COMMITTEE MEMBER RUBALCAVA: Mr. Miller.

19 VICE CHAIRPERSON MILLER: Mr. Rubalcava, are you
20 raising your hand?

21 COMMITTEE MEMBER RUBALCAVA: Yes. Thank you, Mr.
22 Miller. Thank you, Mr. Stone. I -- since it is -- I just
23 throw it out there, are people interested in perhaps
24 lowering the requirement for signatures from 250 to a
25 lesser amount? I know it hasn't been discussed, but it is

1 in the -- I mean, it is in the ordinance -- or the regs
2 that -- and everything in the regular is -- can be amended
3 or suspended, isn't that what we're looking at suspending
4 or modifying?

5 GENERAL COUNSEL JACOBS: If I might --

6 COMMITTEE MEMBER RUBALCAVA: So I don't know the
7 history or anything about that, so...

8 GENERAL COUNSEL JACOBS: If I might comment.
9 This is Matt Jacobs.

10 The more --

11 VICE CHAIRPERSON MILLER: Yes, Mr. Jacobs, go
12 ahead.

13 GENERAL COUNSEL JACOBS: Thank you, Mr. Miller.

14 The more changes that we propose in an emergency
15 reg, the less likely it is that it gets approved by OAL.
16 And they really should be focused -- any kind of proposed
17 changes should be focused on what is the emergency that we
18 are trying to address -- or what is the urgent action that
19 is necessary. And here, what we've got today is the idea
20 that because of Coronavirus, we've got a more difficult
21 time collecting signatures --

22 COMMITTEE MEMBER RUBALCAVA: Wet signatures,
23 right.

24 GENERAL COUNSEL JACOBS: -- wet signatures. So
25 that might get us through. But if you start adding things

1 that aren't really specific to the urgency or don't have
2 that same urgency, we're going to have more trouble
3 getting that through OAL on an emergency basis.

4 VICE CHAIRPERSON MILLER: Okay. Mr. Perez.

5 COMMITTEE MEMBER PEREZ: I think Stacie was in
6 front of me.

7 VICE CHAIRPERSON MILLER: Mr. Perez.

8 COMMITTEE MEMBER PEREZ: Stacie was in front of
9 me.

10 COMMITTEE MEMBER OLIVARES: Thanks, Jason.

11 Thanks, Perez.

12 Mr. Miller, this is in response to Mr. Jacobs
13 too. So typically OAL does require that you be narrow in
14 focus and it has to be in regard to the emergency at hand.
15 And I think due to the still uncertain nature of the
16 Coronavirus, I am actually concerned about disease
17 transmission. So in addition to potential identity theft,
18 it's unclear exactly how long the disease will live on
19 paper. And if you're talking about prospective candidate
20 collecting wet signatures from people and then sending
21 this on through the mail, I don't -- there's risk there
22 that we don't need to take. So as we define this for OAL,
23 I think it's important to cite that reason as well.

24 Thank you.

25 VICE CHAIRPERSON MILLER: Thank you.

1 Director Perez is next.

2 COMMITTEE MEMBER PEREZ: Thank you. Dallas,
3 what did the State do for our State elections this last
4 month -- this month?

5 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

6 We did reach out to the Secretary of State for
7 comment. And they reported that they had made no changes
8 to the existing process and still required original
9 signatures on petitions per the elections code. And that
10 was us reaching out to them a couple weeks ago.

11 COMMITTEE MEMBER PEREZ: And how many did they
12 require?

13 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

14 I don't have that number with me offhand, Mr.
15 Perez, but I believe it's in the thousands not hundreds.

16 COMMITTEE MEMBER PEREZ: All right. I hate to
17 put all this work and effort into a waiver or for an
18 exception when, I mean, it's not broke and then maybe look
19 into it long term to fix it for the next election, but
20 that's just me.

21 VICE CHAIRPERSON MILLER: Okay. It looks like
22 Director Olivares.

23 COMMITTEE MEMBER OLIVARES: Thank you, Mr.
24 Miller. Sorry, a lot of questions regarding this. What
25 is the benefit to having signatures collected -- to having

1 that signature requirement versus just self-nomination,
2 aside from wanting to narrow down the candidate pool?

3 GENERAL COUNSEL JACOBS: Well, this is Matt
4 Jacobs. I think -- I mean, I'm just speculating now, but
5 I think it's just to -- that you don't want people on
6 there without demonstrating at least some level of support
7 amongst the constituency.

8 COMMITTEE MEMBER OLIVARES: Okay. So it's only
9 to narrow it down, so that way you don't want to give --
10 you don't have -- provide too many choices and people get
11 confused.

12 Okay. Thank you.

13 VICE CHAIRPERSON MILLER: I'm not seeing any more
14 requests to speak. So, at this point, I will have -- Mr.
15 Fox, any additional comments from the public?

16 STAKEHOLDER RELATIONS CHIEF FOX: Mr. Chair, no,
17 there are no more comments on this item.

18 VICE CHAIRPERSON MILLER: Okay. At this point,
19 I'll call for the question and ask Ms. Hopper to please
20 call the roll.

21 COMMITTEE SECRETARY HOPPER: Henry Jones?

22 COMMITTEE MEMBER JONES: Aye.

23 COMMITTEE SECRETARY HOPPER: Frank Ruffino for
24 Fiona Ma?

25 ACTING COMMITTEE MEMBER RUFFINO: Aye.

1 COMMITTEE SECRETARY HOPPER: David Miller?

2 VICE CHAIRPERSON MILLER: Abstaining.

3 COMMITTEE SECRETARY HOPPER: Stacie Olivares?

4 COMMITTEE MEMBER OLIVARES: Aye.

5 COMMITTEE SECRETARY HOPPER: Jason Perez?

6 COMMITTEE MEMBER PEREZ: No.

7 COMMITTEE SECRETARY HOPPER: Ramon Rubalcava?

8 COMMITTEE MEMBER RUBALCAVA: Aye.

9 COMMITTEE SECRETARY HOPPER: Mr. Vice Chair, I
10 have four ayes, one no by Jason Perez, and one abstention
11 from David Miller. Motion made by Ramon Rubalcava,
12 seconded by Henry Jones.

13 VICE CHAIRPERSON MILLER: Okay. The ayes have
14 it. The motion is approved. And we'll go forward and --
15 I thank you, Mr. Stone, for your presentation and the
16 team's work, and than everyone for the thoughtful
17 discussion. I think certainly in the longer run, we
18 really want to take a look at our election procedures and
19 see if, you know, our objectives and our goals for a lot
20 have these procedure elements are -- could be met more
21 effectively and efficiently in another way.

22 I abstained because, frankly, I believe that
23 having to have wet signatures in the time of a pandemic is
24 not just a public health issue, that it also is an almost
25 insuperable barrier to any potential candidate who does

1 not have institutional support. And as one of those kind
2 of candidates for several runs in the past, I can tell you
3 it would be virtually impossible for me to go around with
4 my clipboard and find 250 people wandering the streets of
5 Sacramento who might be State employees to sign for me in
6 this environment. So I think we've got a lot to think
7 about for the future, but this is our -- you know, our
8 next step forward.

9 Thanks.

10 OPERATIONS SUPPORT SERVICES DIVISION CHIEF STONE:

11 Thank you, sir.

12 VICE CHAIRPERSON MILLER: So moving along to the
13 next item here is item 7a information agenda items, and 7a
14 annual review of funding levels and risk report. So for
15 that we go to, it looks like, Mr. Terando.

16 (Thereupon a slide presentation.)

17 CHIEF ACTUARY TERANDO: Good afternoon, Mr. Chair
18 and thank you. Scott Terando, Chief Actuary.

19 Today, we're going to be presenting our annual
20 report on the funding levels risk report. This is an
21 opportunity for the Actuarial Office to review the system
22 as a whole and present any findings we have, as well as
23 talk about any risks to the system that we see developing
24 both now or going forward.

25 I'm going to make some just general comments to

1 begin with and then I'm going to pass it along to Randy
2 Dziubek, who will actually provide additional detail and
3 insights into our findings.

4 Overall, this report shows that while on the
5 funding position and the risks of falling to low funding
6 levels in the future are improving, risks remain in the
7 system. Required employer contributions are projected to
8 increase over the next few years. And with the economic
9 slow down due to COVID, this could pose considerable
10 problems for some employers.

11 Actual contribution increases could also exceed
12 expectations if future experience is unfavorable. Also,
13 recent trends in capital market assumptions suggest it may
14 be difficult to achieve a seven percent long-term
15 inflation -- or investment return without taking on
16 additional risk into the portfolio.

17 During 2021, we will be reviewing the asset
18 allocation and the discount rate during the asset
19 liability management process, or ALM as we call it. If
20 this process leads to a reduction in the discount rate,
21 additional increases to employer and PEPRA member
22 contributions will be required.

23 Careful review and consideration of risk measures
24 and risk tolerance during the ALM process will be
25 critical -- will be critical for optimal portfolio

1 selection, as well as near-term funding for the system
2 going forward.

3 And with those opening comments, I'm going to
4 pass it along to Randy who will go through our
5 presentation.

6 DEPUTY CHIEF ACTUARY DZIUBEK: Thank you, Scott.
7 And good afternoon, Mr. Vice Chair and Committee Members.
8 I am Randy Dziubek, CalPERS Actuarial team. Before I get
9 into the details of our presentation today, I want to make
10 a couple opening comments. First of all, the report that
11 we're going to talk about and the presentation slides
12 today are going to cover pretty much the entire PERF, so
13 all of the plans within the PERF combined.

14 However, there are a couple small plans that are
15 not part of our results, and they are the Terminated
16 Agency Pool, as well as the 1959 Survivor Benefit Program.
17 And the reason I mention that is that I noticed in Michele
18 Nix's slides earlier today her results do include those
19 two small plans. And so in a couple instances, my numbers
20 will be off from hers just a little bit.

21 And secondly, we refer to this as an annual
22 report. And for the most part it is an annual report.
23 However, during years in which we're going to go through
24 the formal asset liability management process, which we
25 will do next year, we typically don't release this report

1 in that year, because the information included in this
2 report is going to be provided throughout the ALM process
3 anyway. So you will not see this report likely next year.

4 Next slide, please.

5 --o0o--

6 DEPUTY CHIEF ACTUARY DZIUBEK: So the main topics
7 we're going to cover today are first current results of
8 the system, then we'll talk about some potential impacts
9 of the pandemic that we're in the midst of currently, and
10 then finish up with some important risk drivers.

11 Next slide.

12 --o0o--

13 DEPUTY CHIEF ACTUARY DZIUBEK: Okay. So slide 3
14 shows funded status of the system, so for the entire PERF
15 as well as the significant subemployee groups. And these
16 funded status results are shown as of June 30, 2018, as
17 well as June 30, 2019. And you can see there was a very
18 slight improvement in most categories from those two
19 measurement dates with the PERF funded status as of June
20 30, 2019 being 70.1 percent. And this is one number I
21 noticed in Michele's slide was 70.2. That is what will
22 show up in the CAFR. That number includes the TAP and
23 the '59 Survivor Plan.

24 The reason that we don't have results here as of
25 June 30, 2020 is that even though we know what the asset

1 values are as of that date, the liability portion of this
2 calculation is not yet known. We will compute those plan
3 liabilities as part of our annual valuation process, which
4 we're in the midst of currently.

5 The important thing to keep in mind with funded
6 status is there's -- first of all, there's no line that
7 divides a good funded status or a bad funded status. It's
8 important to understand whether, no matter what your
9 funded status is, whether employers are able to make
10 future contribution requirements. And also, it's
11 important to just look at the trend of funded status over
12 the recent past.

13 If, for example, you go back over five, 10 years,
14 and what you see is a steady decline in funded status,
15 well that probably indicates that you should at least
16 review your funding policies. In CalPERS case, if you
17 went back over the last 10 years, what you'd see is the
18 funded status hovers right around 70 percent throughout
19 that period, some years higher, some years lower.

20 So on the one hand, you might think, well,
21 perhaps we should have had some steady improvement over
22 the last 10 years, but on the other hand, we had to keep
23 in mind that during that 10-year period, we did reduce the
24 discount rate from seven and a half to seven percent. We
25 also built in improved mortality rates for our members.

1 And both of these changes had significant impacts
2 to the determined liabilities of the system. So even
3 adding those changes to our assumptions, we were able to
4 maintain our funded status. So I would say all in all,
5 that's a fairly positive result.

6 Next slide, please.

7 --o0o--

8 DEPUTY CHIEF ACTUARY DZIUBEK: Moving on to
9 contribution rates, what we show on this slide are average
10 contribution rates for our different employee groups. And
11 these are rates determined as of both June 30, 2018, as
12 well as June 30, 2019. And there is a lag between the
13 valuation date and when the contributions are actually
14 due. So, for example, the rates that you would see as of
15 the June 30, 2019 valuation date actually apply to the
16 2020-2021 fiscal year for State and schools, and the
17 2021-22 fiscal year for public agencies.

18 And what these rates represent -- first of all,
19 these are -- these are contribution dollars divided by
20 payroll, so expressed as a percentage of pay. And they
21 are the sum of the employer's share of normal costs for
22 the year, plus any required payment towards any unfunded
23 liability that may exist.

24 And it's important to note here that in most of
25 our plans -- and so in most of these cases, the UAL

1 payment is actually higher, and in some cases considerably
2 higher, than the employer normal cost. And what we can
3 infer from that is that if we were theoretically a hundred
4 percent funded across the board in our system, these
5 contribution rates would be less than half of the rates
6 that you're seeing here and in some cases much less than
7 half.

8 Next slide, please.

9 --o0o--

10 DEPUTY CHIEF ACTUARY DZIUBEK: Now, these
11 contribution rates have increased somewhat over the last
12 few years. And we are projecting them to continue to
13 increase somewhat. And this is primarily a result of the
14 decrease in the discount rate and the fact that the impact
15 of that, in terms of employer contributions is phased in
16 over a period of time.

17 And so even though the seven percent discount
18 rate went into effect in the past, we still are phasing in
19 the impact of that change. And as you can see, after a
20 few years of slight increases, we do expect a lot of these
21 contribution rates to start coming down, and that is for
22 two reasons.

23 First of all, as we get more and more PEPRA
24 members into the system, their costs are typically lower
25 than classic members. And also over time, we expect

1 employers will payoff their -- some of their unfunded
2 liabilities and so their total contribution will reduce
3 because of that.

4 Now, even though we reflected the 4.7 percent
5 return here, for the year ending June 30, 2020, for future
6 years, we are assuming that the fund earned seven percent
7 every year. And, of course, if we earn something greater
8 or less, these results could be significantly different.

9 Next slide.

10 --o0o--

11 DEPUTY CHIEF ACTUARY DZIUBEK: So the required
12 amount that employers need to make to CalPERS and to any
13 retirement system around the country typically are based
14 on some type of funding policy that the system has. And
15 in our case, we do have funding policies adopted by the
16 Board. And in situations where the funding policy derives
17 a required payment towards unfunded liability that is less
18 than the interest on the existing unfunded liability, we
19 call that negative amortization.

20 And that's because, if that contribution is made
21 by the end of the year, we actually expect the unfunded
22 liability to grow rather than decrease, because the
23 required payment towards the unfunded liability is not
24 enough to cover even the interest growth on the beginning
25 balance.

1 But the good news is what we can see from this
2 particular slide is that we've seen a dramatic decrease in
3 the number of our plans, and these are public agency plans
4 only, for which negative amortization is a part of their
5 contribution. You see the vast majority now are making
6 contributions at least as large as the interest on the UAL
7 and, in most cases, more than that even.

8 And additionally, the new Amortization Policy
9 that went into effect in the 2019 valuations, because it
10 has a maximum payoff period of 20 years, should do a
11 better job in mitigating negative amortization going
12 forward.

13 And the last thing I want to say about this issue
14 is that in the 2019 public agency reports, we added some
15 information in the reports this year that point out very
16 clearly if the required contribution is less than interest
17 on the unfunded liability.

18 We wanted employers to be aware of that, point
19 that out and also give them an amount that they could
20 contribute on top of their regular required contribution,
21 if they wanted to avoid this negative amortization.

22 Next slide, please.

23 --o0o--

24 DEPUTY CHIEF ACTUARY DZIUBEK: And speaking of
25 additional discretionary payments, this chart shows how

1 these amounts have been increasing over the last several
2 years. And again, these are amounts that -- first of all,
3 this is just for public agencies. The State is not
4 included in this particular chart. So these are amounts
5 that public agencies have given to us voluntarily above
6 the amount that we require in the actuarial report, in
7 large part because they're understanding more the benefits
8 of paying down their unfunded liabilities faster. It does
9 save quite a bit of money in the long run.

10 And if you look at the prior fiscal year, we had
11 a very large jump in additional discretionary payments.
12 And again, this is just public agencies. We received over
13 \$2.6 billion of additional contributions during the last
14 fiscal year. And I think Michael Cohen mentioned this
15 earlier, a lot of that came out of pension obligation
16 bonds being issued by some of our agencies and then taking
17 the proceeds and giving them to us to pay down their
18 unfunded liability.

19 Next slide, please.

20 --o0o--

21 DEPUTY CHIEF ACTUARY DZIUBEK: So over the next
22 couple of slides, I want to talk a little bit about the
23 pandemic that we're in the middle of and potential impacts
24 on the retirement system.

25 In California alone, at the time this was

1 published anyway, there were over 16,000 COVID-related
2 deaths. I believe it's over 18,000 as of today. And we
3 know from listening to our employers and stakeholders,
4 that their revenues have been significantly impacted in
5 many cases, making it that much more difficult for them to
6 make their required CalPERS contributions.

7 And we have seen specific impacts in various
8 areas from the pandemic with respect to investment
9 returns, mortality, retirements, and on. However, it's
10 really too early to tell. We don't have enough data at
11 this point to know if these impacts will result in any
12 meaningful changes to required employer contributions or
13 whether these impacts will continue beyond a year or so.
14 There is a potential that some of these could continue,
15 you know, beyond the next year or two. We just don't
16 know.

17 Next slide, please.

18 --o0o--

19 DEPUTY CHIEF ACTUARY DZIUBEK: So we know that
20 the investment return for the last fiscal year was 4.7
21 percent. As most of you probably remember earlier in
22 2020, we were running at a negative return for the year.
23 And luckily we had a pretty significant rebound towards
24 the end of the fiscal year to hit that 4.7 percent return.
25 So that is lower than our expected return of seven

1 percent, but better than we were expecting a few months
2 earlier. We have seen some data that certainly indicates
3 we're seeing more deaths than expected. Retirements is an
4 interesting topic. What we've seen so far is that in some
5 cases, in some groups, we're seeing more retirements than
6 expected, and in other groups we're seeing less
7 retirements than expected.

8 And you can -- you can see why the pandemic might
9 push someone in either direction. Perhaps, they're --
10 they weren't planning to retire, but they don't like
11 working from home. They're afraid of eventually having to
12 go back to the office and getting the virus. And so they
13 say, I'm just -- I'm just going to retire. I'm sure we
14 all know a few people who have done that or perhaps
15 they're ready to retire, but they're very concerned about
16 the economy, about their financial situation, and they
17 feel like I better hold onto this job and this paycheck.

18 So at this point, we really don't expect that
19 these impacts on experience will result in significant
20 increases or decreases to the employer contributions. And
21 at this point, we have no reason to believe that they'll
22 continue beyond a year or two, but there still are some
23 unknowns with regard to this pandemic.

24 We do know also that because of the impact on
25 revenues, this continues to be our largest concern for the

1 system is employer's ability to continue making their
2 required contributions.

3 Next slide, please.

4 --o0o--

5 DEPUTY CHIEF ACTUARY DZIUBEK: So before I dive
6 into some of the risk drivers, I just want to mention
7 that, you know, traditionally when you think of the
8 financial health of a retirement plan or the
9 sustainability outlook, most people start by looking at
10 the current funded status of the system. And we did that
11 on the first slide of the presentation.

12 And years ago, it was not uncommon that that's
13 all you would look at. You know, the actuaries, and the
14 boards, and folks would sort of focus on that number as if
15 it told the whole story. And, of course, we've learned
16 valuable lessons over the past, but there are many
17 measures to look at, many risk drivers, risk measures,
18 projections, stochastic modeling. You need to look at all
19 of these to really get a clear picture of the financial
20 health of the system.

21 So let's start here with a projection of funded
22 status for the PERF, as well as employer contribution
23 rates over the next ten years. So the left chart shows
24 the projected funded status of the PERF over the next 10
25 years, given assumed average returns of between six and

1 eight percent per year over this 10-year period.

2 So, of course, our expected return is seven
3 percent and so the line right through the middle
4 represents what we expect to happen over this 10-year
5 period. And, you know, in any one year, we know we're
6 probably not going to hit seven percent, but over a
7 10-year period, there's a good chance that our average
8 return will be somewhere between the six and eight percent
9 that we're showing here. But what you can see is after
10 ten years, we can get a fairly large range in funded
11 status, whether we average six percent, seven percent or
12 eight percent.

13 And then moving to the right-hand side of the
14 page, these represent two sample plans, public agencies
15 within CalPERS and show a 10-year projection of their
16 employer contribution rates, again given the six to eight
17 percent range of average returns, with the blue line in
18 the middle again being the expected return.

19 Now, these are sample plans. Every plan that we
20 would look at, if we plotted their specific 10-year
21 projection would look a little bit different these. But
22 in terms of the impact of investment return on our plans'
23 required contributions, these would be representative of
24 pretty much all plans within CalPERS.

25 Next slide.

1 --o0o--

2 DEPUTY CHIEF ACTUARY DZIUBEK: So slide 11 is
3 very similar to slide 10 that we just looked at. We're
4 looking at projected funded status on the left for the
5 PERF, projected employer contributions on the right. But
6 our scenario now for investment return is one really good
7 or one really bad investment year for us in year one, and
8 then seven percent thereafter.

9 And the range that we're using here it's very
10 small and hard to read, but I believe it goes from a low
11 of about six -- negative 16 percent and a high of about 30
12 percent between those dashed lines on the chart on the
13 right -- sorry the left. And these are not likely returns
14 in any one year. However, they are not out of the realm
15 of possibility. In fact, a return of higher than 30
16 percent or lower than minus 16 percent, we have about a
17 five percent chance of seeing that in any particular year.

18 So it is important to know if we receive one of
19 these abnormal years, what will that do to our funded
20 status? And this chart illustrates there's an immediate
21 and significant change in the funded status of the system
22 after one year of such an abnormal return.

23 And then if we look across to the projected
24 contribution rates, the good news here is that our
25 five-year ramp up, which is part of our amortization

1 policy, will smooth the impact of this odd investment year
2 over a five-year period. So you can see the changes in
3 contribution rates are not as significant in the early
4 years as the changes we would see in the funded status.
5 And the thinking being that typically when we have an
6 abnormal year, like what we're looking at here, in the
7 next couple years, there might be some kind of a
8 correction in the opposite direction.

9 And so the fact that the employer contribution
10 rates will take five years to fully reflect this abnormal
11 investment return, gives us time for an offsetting return
12 in the next couple years, so hopefully we'll never
13 experience the full extent of the impact of this negative
14 return.

15 Next slide, please.

16 --o0o--

17 DEPUTY CHIEF ACTUARY DZIUBEK: So one of the
18 things that we measure annually with our stochastic
19 modeling is the likelihood of falling below a given funded
20 status. We're looking at 40 percent, 50 percent, and 60
21 percent here. Again, there's no magic line to, you know,
22 what's good, what's bad, what funded status, if we fall
23 below, would we not be able to recover from? There is no
24 such single funded status. But it's very clear that if
25 the funded status of the system falls to a low enough

1 level, it can be very difficult to dig out of that and get
2 back to a hundred percent funded.

3 And so it is important to have some safeguards in
4 place and continue to monitor the likelihood of falling
5 below some of these very low funded percentages. The good
6 news is it's very unlikely that we would fall underneath
7 50 percent funded over the next 30 years. However,
8 because of the volatility of the market, falling under 60
9 percent, there is some chance of that, some reasonable
10 chance of that over the next 30 years.

11 Next slide.

12 --o0o--

13 DEPUTY CHIEF ACTUARY DZIUBEK: So an important
14 maturity measure that we look at for the retirement system
15 is something we call the asset volatility ratio. And it's
16 simply the ratio of the market value of assets of the plan
17 to the payroll of the active members. And the reason we
18 look at this ratio is that it's a good indicator of the
19 likely contribution volatility going forward.

20 In other words, the higher this ratio becomes,
21 the more likely the employer will see larger volatility in
22 their contribution requirements going forward. And
23 this -- the fact that these have been increasing, which we
24 see from this chart and are projected to increase further,
25 is really just -- you know, because of the maturing of the

1 system, this is what tends to happen in any retirement
2 system as our ratios of actives to retirees change, and
3 our asset levels grow and liability levels grow, this
4 ratio just tends to grow over time. So it's not a bad
5 indicator that it's growing, it's just an indicator for
6 all of us to expect some increase in contribution
7 volatility going forward.

8 The safety plans tend to have a higher ratio than
9 miscellaneous plans, because their benefits are a little
10 bit more valuable generally.

11 And if we had gone further out in the future
12 beyond 2020, because of the existence of PEPRA, at some
13 point, once the PEPRA members represent the majority of
14 the system and the majority of the liabilities, we'll see
15 these asset volatility ratio patterns level off and even
16 decline a little bit way into the future.

17 Next slide, please.

18 --o0o--

19 DEPUTY CHIEF ACTUARY DZIUBEK: So, of course, in
20 talking to our employer partners and stakeholders, we know
21 that for many their required CalPERS contribution is
22 presenting some budget issues for them. We can see here
23 the average contribution requirement for safety plans is
24 over 50 percent of payroll. And we do expect, as we said,
25 some small increases to these requirements going forward

1 before we think they'll begin to decline.

2 Probably as a combined result of the pandemic and
3 historically lower interest rates, we've seen employers
4 use some -- some techniques for managing their employer
5 contributions more so than we've seen in the past. And
6 those include pension obligation bonds, Golden Handshakes,
7 and furloughs.

8 Now, if an employer were to get into a situation
9 where they were completely financially unable to make
10 their CalPERS contribution, there are policies within the
11 amortization policy that, if approved by CalPERS, could
12 allow a spreading out of the amortization of unfunded
13 Liability, which would bring their near-term contributions
14 down and hopefully get them through this period.

15 However, we only want to use that in worst case
16 situations. It does result in higher costs going forward.
17 If we lower the costs now, they're just going to be that
18 much bigger in the future.

19 Next slide, please.

20 --o0o--

21 DEPUTY CHIEF ACTUARY DZIUBEK: So here quickly,
22 we talked about contribution volatility previously. And
23 this chart just shows you the likelihood of plans
24 experiencing a certain increase in their employer
25 contribution over the next 30 years. And this is within

1 one particular year. So from one year to the next, their
2 contribution goes up by -- and we're showing three
3 percent, five percent, and seven percent for miscellaneous
4 plans, and five percent, seven percent, and nine percent
5 for safety plans.

6 And what you can see again sort of based on the
7 maturity measure that we looked at previously is in most
8 cases these have risen just a little bit from last year
9 and probably will continue to in the near future as the
10 system continues to mature.

11 Next slide, please.

12 --o0o--

13 DEPUTY CHIEF ACTUARY DZIUBEK: And finally, Scott
14 mentioned this in his opening, we'll be going through the
15 full asset liability management process next year. The
16 Board will review investment policies, asset allocation,
17 and make decisions about asset allocation and the discount
18 rate assumption going forward. Over the last several
19 years, just looking at trends in capital market
20 assumptions, we have seen a slight reduction in capital
21 market assumptions over the last four years. That doesn't
22 mean necessarily that there will be a decrease in the
23 discount rate.

24 And, of course, the Board's decision with regard
25 to asset allocation will impact whether the discount rate

1 will need to change or can stay at seven. But given the
2 recent trends and the fact that this is coming up next
3 year, I think it's important as part of this type of
4 analysis to just identify that it is a real possibility
5 that the discount rate will need to be lowered or that the
6 Board will choose to lower it.

7 And given employers difficulty currently for
8 making required contributions, this would just add to that
9 difficulty for many of them.

10 So with that, Scott and I are happy to take any
11 questions you might have.

12 VICE CHAIRPERSON MILLER: Okay. Thank you very
13 much for your presentation. We very much appreciate it
14 and very helpful.

15 I have several questions queued up here. And
16 we'll start with Director Middleton.

17 BOARD MEMBER MIDDLETON: All right. Thank you,
18 Mr. Vice Chair and Mr. Dziubek, MR. Terando. Thank you
19 for an excellent report. I do have a few questions. I'm
20 going to start with just a quick comment. I love
21 understatement. Not all of my colleagues on city councils
22 do. But when I read the sentence, "However, employer
23 contribution levels are climbing and this is potentially
24 increasing financial stress on some employers".

25 (Laughter.)

1 BOARD MEMBER MIDDLETON: Thank you for that
2 smile.

3 Potentially is not the word most of my colleagues
4 are using right now.

5 (Laughter.)

6 DEPUTY CHIEF ACTUARY DZIUBEK: Yes, I would say
7 many of our employers would word that more strongly.
8 Agreed.

9 (Laughter.)

10 BOARD MEMBER MIDDLETON: Thank you.

11 Could you turn to the last chart that you showed
12 on page 15 of 17 of your example. I'd like to make sure I
13 truly understand what you're saying on this particular
14 chart and understand what the difference is between the
15 three, five and seven percent of payroll, the five, seven
16 and nine percent of payroll for public safety.

17 DEPUTY CHIEF ACTUARY DZIUBEK: Sure. So what
18 we're showing here is the probability over the next 30
19 years of any of these groups having an increase to their
20 employer contribution rate of greater than the thresholds
21 at the top of the chart.

22 So the three percent of payroll, five percent and
23 seven percent are really just thresholds that we selected
24 to show you various probabilities. So, far example, for
25 the State miscellaneous plan, based on the current

1 results, they have a 55 percent chance of having at least
2 one time over the next 30 years, a three percent of
3 payroll or greater increase to their contribution rate in
4 a single year.

5 BOARD MEMBER MIDDLETON: All right. And --

6 DEPUTY CHIEF ACTUARY DZIUBEK: And likewise, if
7 you move across, the percentages go down. They have only
8 a 14 percent chance of getting a single year increase of
9 five percent and so on. And the thresholds are higher for
10 safety, mostly because they're already at higher rates and
11 so they're more likely to have a somewhat larger increase,
12 given the same event as a miscellaneous plan would have.

13 BOARD MEMBER MIDDLETON: And this is in any one
14 year?

15 DEPUTY CHIEF ACTUARY DZIUBEK: That's correct.

16 BOARD MEMBER MIDDLETON: Okay. So that's
17 helpful. And what -- one of the things that we know is
18 that the risks vary from employer to employer. So this
19 kind of information, I think, somewhat helps.

20 One of the difficulties we have is trying to
21 define what employers are at greater risk than other
22 employers. And I'm looking for some data that would help
23 us to be able to go to the employer community and give
24 them a better sense of what their risk level is. And so
25 far, most of employers keep coming back simply to that

1 funded status. And I was very much in agreement with
2 something you said right at the very beginning, what's
3 your trend line on funded status, what's your ability to
4 pay in upcoming years? And do we have (inaudible) that
5 would help each individual employer understand where
6 they're at on that, those measures?

7 DEPUTY CHIEF ACTUARY DZIUBEK: That's a good
8 question. Of course, every employer gets a unique
9 actuarial valuation every year that provides them their
10 specific information on funded status and projections.
11 Something that is required in the state of California for
12 CalPERS is that all of our agencies are required to make
13 their minimum contribution every year. And if they don't
14 or if they can't, that could lead to termination of their
15 contract with CalPERS.

16 And so we don't have a situation, perhaps as in
17 other systems, where required contributions aren't being
18 made for some period of time. That tends to get plans in
19 the biggest amount of trouble when they're not making
20 their required contributions. So as of this time, you
21 know, all of our employers are caught up with required
22 contributions. There isn't as much of a range in funded
23 status as you might think, because of that.

24 Now, some are better off, because they've made
25 additional discretionary payments.

1 BOARD MEMBER MIDDLETON: Right.

2 DEPUTY CHIEF ACTUARY DZIUBEK: And their funded
3 status is higher. They're unfunded liability is lower,
4 you know, their contribution requirements are lower.
5 That's all due to having made higher contributions than
6 what we ask of them, but, of course, that does increase
7 the volatility of future contributions. They now have
8 more assets as stake, you know, at some risk in the
9 market. So they have to be aware of that as well.

10 Other than that, I -- I think -- you know, based
11 on the funding policies that we have in place, if an
12 employer is able to make their required contributions, and
13 that's a big if, but if they are, they will eventually
14 become a hundred percent funded, more than likely, and we
15 will always have enough money to pay out required benefit
16 payments.

17 Really, the only thing that can really cause us
18 severe problems is when the contribution requirements get
19 to a certain level and a particular employer just can't
20 afford to make them. And, of course, the affordability
21 aspect varies widely across our agencies. Some are
22 struggling now. Some are not as much and actually have
23 extra money that they can give to us.

24 I will say that the California State Auditor is
25 going to be updating their -- I think they call it a

1 high-risk dashboard, where they -- they evaluate the
2 financial strength of the cities around California. And
3 part of that analysis involves CalPERS results. This is
4 their analysis. This is not CalPERS Actuarial Office.
5 But they rank the cities from 1 to 400 and something based
6 on financial strength.

7 Scott, do you have anything to add?

8 BOARD MEMBER MIDDLETON: I'm reasonably familiar
9 with that report. And it's -- it has some advantages and
10 then there's some data in there that I think is
11 problematic, but that's one person's opinion.

12 I'm sorry, I stepped on Scott.

13 CHIEF ACTUARY TERANDO: Oh, no, that's okay.

14 I was going to say, you know, what Randy said on
15 the State others report, you know, that's one tool
16 that's -- that some agencies can use to kind of measure
17 their risk.

18 But to what Randy was talking about, you know,
19 one of the challenges is our -- is we have such a wide
20 variety employers. And the challenge is finding, you
21 know, what -- what's a meaningful measure and that varies
22 from employer to employer. Some employers can't handle a
23 one percent increase in contributions. Some of them, it's
24 not a problem.

25 So, you know, the challenge for us is coming up

1 with a standard measure, you know, we've looked at, you
2 know, funded status. We've added additional projections.
3 We've added risk measures. You know, we added a lot of
4 sensitivity to kind of show the employers. But the
5 volatility with the system with potential cost increases
6 with the system.

7 And, you know, I think, you know, if we're --
8 they have a lot of information. They can call the actuary
9 to have a discussion with them. And I think they needed
10 to kind of look at how much their pension costs are in
11 relation to their budget and how has that changed over
12 time, because you know -- I think that's one indication.
13 Since we don't have the budget numbers, that's not
14 something we can do.

15 But I think that's something that the cities and
16 agencies should be doing is saying how -- how those
17 (inaudible) are trending over time. And if it's
18 increasing, is it increasing at a rate that's going to
19 make it difficult for them to deal with moving forward.

20 BOARD MEMBER MIDDLETON: I want to be very
21 complimentary, because I think the level of knowledge on
22 the part of the employer community has really picked up in
23 the last few years. And that's complimentary to both the
24 employers and to CalPERS, in terms of the quality of the
25 conversation improving.

1 But without outing any particular employer, we do
2 have some demographic data regarding those employers that
3 have struggled to make payments. And being able to
4 communicate some of those demographics to the broader
5 whole, I think would be helpful in gaining some -- some
6 satisfaction, so -- and I will again encourage the
7 continued conversation with League of California Cities,
8 the chief financial officer, city managers, and mayors and
9 cities councils, because the more we're conversing with
10 them, the better they understand the situations we've got
11 going forward.

12 So with that, I'll quiet and let some other folks
13 ask some questions. Thank you.

14 VICE CHAIRPERSON MILLER: Okay. Thank you,
15 Director Middleton.

16 And next we have Director Rubalcava.

17 COMMITTEE MEMBER RUBALCAVA: Yes. Thank you for
18 the presentation. And I really enjoyed the dialogue with
19 Ms. -- Trustee Middleton who's also city councilmember, so
20 that gives it a whole interesting perspective. And that's
21 what I want to talk about, the employer contribution rates
22 and the treasurer and employers to pay their required
23 contribution. I want to start with chart -- I guess it's
24 page six of 17, negative amortization. It's good that
25 it's flowing -- going -- decreasing, but I actually am

1 surprised that there's still a negative amortization,
2 because -- is that because it takes a while for it to
3 filter down, because I remember when I first came on the
4 Board, the first -- my first vote was to do the third part
5 of all these funding policy changes. And it was going
6 from 30 years amortization to 20.

7 And I always thought that going to -- decreasing
8 from 30 to 20 years would actually get rid of negative
9 amortization. So if people are still making their -- and
10 I guess State law requires that they make their -- what's
11 required actuarially, that every employer make their
12 contribution, how can we still have negative amortization,
13 which means your're taking -- only paying interest and
14 nothing else nothing else. So how can that be? I'm
15 missing something.

16 DEPUTY CHIEF ACTUARY DZIUBEK: Great question.
17 So these employers, in fact, they are making their
18 required contribution. The issue is that what we
19 determine as the required contribution has UAL payment
20 that is less than interest on their unfunded liability.

21 And you're correct in stating that the new
22 Amortization Policy with its 20-year maximum period, will
23 mitigate negative amortization going forward, but that
24 policy only applies to new -- newly created unfunded
25 liability, so things that happened after June 30, 2019, I

1 guess, or 2018.

2 So all of those existing unfunded liability bases
3 that were established years ago are still being amortized
4 under the old policy, which allowed up to a 30-year
5 amortization period. And for such a long period and with
6 the method of amortization, the payments for several years
7 initially are less than interest on the unfunded
8 liability. Over time, they increase more rapidly and do
9 payoff the unfunded. But that is one of the reasons that
10 we proposed and that you adopted the new policy. So we
11 just need to waited for those old bases to be paid off
12 under the old policy.

13 COMMITTEE MEMBER RUBALCAVA: Thank you. If we
14 can go to the previous chart, I guess page five of 17, and
15 it shows the projected increase in employer contributions.
16 I mean, clearly because of the pandemic and the impact on
17 revenue -- on tax revenue, employers have even more
18 pressure than before on their employer contribution. But
19 if that chart was separated by -- because you mentioned
20 unfunded liability -- I'm sorry, you UAL, and -- versus
21 normal costs, we would -- would normal costs be more or
22 less level and it's -- and the increase is because of
23 their past liabilities, would that be correct?

24 DEPUTY CHIEF ACTUARY DZIUBEK: Yeah. So the
25 levels that you're seeing here -- for example, the

1 California Highway Patrol in 2021 was, the number is
2 really small, but it looks like about 59 percent. That's
3 a combination of the normal cost and the UAL payment. The
4 employer normal cost piece of that is less than half of
5 that number.

6 So the reason that these rates are all as high as
7 they are is because we're 70 percent funded for the most
8 part, and employers are having to make fairly large
9 payments toward their unfunded liability.

10 We're increasing primarily because of the phase
11 in of the impact of the discount rate change from seven
12 and a half to seven. And once we get to the end of that
13 in the next two or three years, you know, the hope would
14 be and the projections would be that the rates will begin
15 to come down somewhat.

16 And, of course, that is very dependent on whether
17 the discount rate changes, which would, you know, result
18 in changes to all of these charts, if that were to happen.

19 COMMITTEE MEMBER RUBALCAVA: Thank you. I'm -- I
20 don't want to sound like I'm insensitive, but I know that
21 employers do have pressure -- financial pressures and they
22 have competing demands and everything. But I'm trying to
23 understand what's a realistic picture. Trustee Jason
24 mentioned there was an article yesterday -- or two days in
25 the Orange County Press about employers having pressures

1 issuing -- to make their pension. And some people are --
2 and they -- I didn't read it completely, but I just
3 skimmed it. And they were -- they mentioned some small
4 employers, mostly special districts, that supposedly in a
5 couple years, their contribution is going to double or
6 something -- or even more so.

7 And that's hard to believe, so I'm not sure if
8 they're confusing the rate with the total cost. And if
9 they're small enough, I can see how that would happen.

10 But those special districts tend not to have the
11 risk safety plans with the high UAAL[SIC] or high
12 contributions. So did you get a -- how would you explain
13 that article, or have you had a chance to see it, or -- I
14 know -- I don't want to undermine that the -- under --
15 belittle that there is real pressure, especially in this
16 pandemic situation, but I want to make sure we understand
17 what's real, because we're going to -- I think one thing
18 CalPERS has to do is we have to defend defined benefit
19 plans. And we need to make sure they're sustainable. And
20 that's why funding policy is very important.

21 But we also have to make sure to understand
22 what's a true picture out there. So if you could speak to
23 that article and --

24 DEPUTY CHIEF ACTUARY DZIUBEK: Yeah. Great
25 question. And luckily, the reporter reached out to us for

1 some information, so I am familiar with the article. And
2 I think the cost that was being referred to was the
3 contribution towards the unfunded liability. It wasn't
4 the total contribution. And in some extreme cases, when
5 we looked at it, based on getting questions from this
6 reporter, an example of one that was likely to have this
7 big increase was an agency that made a large discretionary
8 payment to bring their unfunded liability way down several
9 years ago.

10 And so they currently have a relatively small --
11 very small required UAL payment, because they paid off a
12 big chunk of it a few years ago. And so what they will
13 see, based on, you know, changes, for example, to the
14 seven percent discount rate, is that they are going to
15 see as a percentage large increases in their UAL payment,
16 because they're starting from a very small amount, right?

17 And so when we come along then and change the
18 discount rate and add to their UAL payment, it appears
19 that it's growing, and it is growing, much more rapidly
20 than -- than the average plan, because they're starting
21 from a very small -- almost recommend zero point for them
22 because of the additional discretionary payment.

23 You're seeing on this slide averages across the
24 system. They're not increasing typically at the rates
25 that were referred to in that article. And the ones that

1 were mentioned were special cases that seem to have
2 reasonable answers.

3 COMMITTEE MEMBER RUBALCAVA: So they were extreme
4 cases then, I guess.

5 DEPUTY CHIEF ACTUARY DZIUBEK: That's right.
6 That's right.

7 COMMITTEE MEMBER RUBALCAVA: Just trying to
8 understand the funding policy a little bit. You mentioned
9 how mitigate -- one of the mitigating factors will be
10 PEPPRA and how the PEPPRA employees will -- are less
11 expensive than say the classic legacy employees.

12 I'm trying to understand how the other
13 demographics play -- come into play. I know that in '37
14 Act counties, this -- every three years they do an
15 experience study. And the demographic is a big factor
16 that how you -- you know, mortality and all that. We get
17 that, but other -- but how often is that done and do you
18 see that really impacting, because a number of -- I guess,
19 you did speak to it the number of retirees -- number of
20 projected retirements, whether it changes or not, will
21 impact the funded status and impacts the counts going
22 forward.

23 So if you could just speak -- I think maybe I'm
24 getting a little too off the risk thing here, but I just
25 understand how does the -- the experience study weigh in

1 on the CalPERS plan?

2 DEPUTY CHIEF ACTUARY DZIUBEK: Sure. We do a
3 formal experience study every four years. We're going to
4 do it next year in conjunction with the asset liability
5 management process. We will look at all the assumptions
6 you mentioned, mortality, retirements. The good news, I
7 think, is that in most experience areas, our assumptions
8 come out very close to what actually unfolds with actual
9 experience. We have a very large data set.

10 And so just looking at past results and
11 understanding how things are changing in the world, we can
12 usually get pretty close to predicting a lot of that
13 experience going forward.

14 Mortality used to be one that every time we
15 looked at it, it had improved since the last study, right?
16 And so it -- we would put in the new table and it would
17 increase rates. But the good news with that assumption is
18 that several years ago, we actually built in expected
19 future improvements to mortality rates that we had not
20 built in previously. So not only do our mortality rates
21 reflect the current state of mortality, but also assumed
22 improvements going forward.

23 So again, even with mortality, we don't expect,
24 when we do an experience study, that we'll see that our
25 results were very far off. The biggest factor is going to

1 be the discount rate. You know, should that be required
2 to come down for whatever reason? That can have a major
3 impact on cost, because the costs come from the members,
4 the employers, and investment return.

5 And if we believe we're going to be losing
6 investment return, it has to be made up from employers and
7 members. So that will be the biggest factor in
8 determining whether costs will change significantly.

9 COMMITTEE MEMBER RUBALCAVA: Thank you very much.
10 Really, really thank you.

11 VICE CHAIRPERSON MILLER: Okay. Thank you.

12 It looks like next we have Director Ortega.

13 BOARD MEMBER ORTEGA: Thank you, Mr. Chair.
14 Thank you for a great presentation. Very clear and I
15 really appreciate it. I wanted to return to the slide
16 that is called maturity measures. Could you talk a little
17 more about the factors that go into the information that
18 we see here? I understand the point about the volatility
19 or the richer benefit on the safety plans driving sort of
20 a -- their higher position on the graph, but is there any
21 of the number of employees who are coming into -- like
22 newer employees coming in to sort start contributing to
23 the system. Is that part of what we see on that chart as
24 part of the maturity factor, aging plan factor.

25 DEPUTY CHIEF ACTUARY DZIUBEK: Yeah. I don't

1 know if we can -- there we go. So the lines represent the
2 ratio of the market value of these plans to the active
3 payroll. And, you know, maybe -- maybe one plan has a
4 ratio of 10, you know, just to toss out an example. That
5 just means their assets are ten times greater than their
6 payroll.

7 And the ten by itself doesn't really mean
8 anything. You know, there's not again a line of, you
9 know, over this is bad and under this is good. It's just
10 sort of a numerical indication of how volatile your future
11 contributions may be going forward. And so as the system
12 continues to build up assets, obviously we have 400
13 billion or so dollars of assets with -- and it just keeps
14 growing. And, of course, all of that money is exposed to
15 the market and volatility of the market.

16 So when an individual plan builds up a
17 significant amount of assets, that's good. That's what we
18 want to happen, but it does mean that they could
19 experience a certain percentage increase in their
20 contribution rate going forward more easily or more likely
21 than if they had a lower amount of assets.

22 And so, yes, current members are always leaving
23 and they're being replaced by newer members. But for now,
24 the market value of all the plans is continuing to grow.
25 And so this measure is continuing to grow. But, yes,

1 when -- when the PEPRA members become the majority of the
2 plan, because their benefits cost less, we won't need to
3 build up the same level of assets and these lines will dip
4 down a little bit beyond what we're showing here ending at
5 2025. So I hope that answered your question.

6 BOARD MEMBER ORTEGA: That helps. I think it
7 helps me to refine my question a little bit. So is there
8 an element of -- so as it relates to the payroll factor in
9 this graph, do we see any or would we be able to find out
10 if there's any factor of payroll declining, because not as
11 many staff are being hired, or not at the same rate as
12 they would have been.

13 I'm asking this question, because one of the
14 things that you -- you might hear when people talk about
15 pensions is the -- as the percentage of payroll grows for
16 some of these classifications, it's essentially costing
17 you one and a half times, right, for one person. So does
18 that have an impact on that department's ability to
19 hire -- so, you know, for a police department does that
20 factor into their ability to hire new employees, because
21 they're paying this higher cost on the pension side and
22 does then a shrinking payroll factor into this maturity
23 measure?

24 DEPUTY CHIEF ACTUARY DZIUBEK: That's a great
25 question. And I'm not sure how well I'll answer it, but

1 I'm going to give it a try. It's a bit of -- it's a bit
2 of a dilemma to look at required contributions as a
3 percentage of payroll in the first place. We do it here
4 for simplicity. But as you may know in our valuations, we
5 separate the UAL payment from the normal cost. And we
6 show the UAL payment as a dollar amount. We've just, for
7 simplicity, added it to the normal cost and converted it
8 to a percentage of pay, because people are used to looking
9 at contributions as a percentage of payroll. They're
10 comfortable with that presentation.

11 But, yes, we run into difficulties when we have a
12 plan that for some reason the payroll is experiencing some
13 abnormal growth or decline. You know, we have -- we have
14 plans that, for example, may be a safety plan that had
15 both police and fire and they decide they want to have
16 their fire protection contracted out -- outside of their
17 plan. And so now their fire people all become inactive
18 and their payroll is now just a police payroll.

19 So they still have a very large plan with the
20 benefits for those fire members, but now their
21 contribution looks really high as a percentage of payroll,
22 because they had a really sharp unexpected decline in
23 their payroll.

24 So the fact that the payroll goes up or down
25 doesn't impact the dollar amount of the volatility of the

1 contribution as much as when it's expressed as a
2 percentage of payroll. And again, it does cause
3 confusion. You know some of our reports will show that we
4 have some agencies who are making 70 percent or higher
5 percent of payroll contributions. And again, when we
6 drill down and look at them, there was this kind of
7 unexpected decline in payroll, for a variety of reasons.

8 Does that help?

9 BOARD MEMBER ORTEGA: Yeah. Thank you.

10 DEPUTY CHIEF ACTUARY DZIUBEK: Okay.

11 VICE CHAIRPERSON MILLER: Okay. Thank you very
12 much Mr. Dziubek and very illuminating again, and great
13 discussion, and very helpful beneficial answers and
14 responses.

15 So I've got a public comment on number 7a. And
16 so I have no more questions or comments from the Board
17 members, so I will go to public comment. Mr. Fox, do we
18 have our commenter.

19 STAKEHOLDER RELATIONS CHIEF FOX: Yes, sir, Mr.
20 Chair. We have Mr. Bijan Mehryar from the League of
21 California Cities

22 MR. MEHRYAR: Thank you, Mr. Fox.

23 Can you all hear me?

24 VICE CHAIRPERSON MILLER: Yes, sir. Go ahead

25 MR. MEHRYAR: So Board members, thank you very

1 much for the lively discussion on this agenda item. As
2 some of you may recall, at last year's meeting when this
3 item was brought up, I was accompanied by five or six city
4 managers from a diverse array of Northern California
5 cities, who spoke to the challenges that they all faced in
6 meeting their CalPERS obligations, despite at that time
7 being in the middle of an economic expansion.

8 They talked about the challenges of balancing the
9 need not just to provide critical services to their
10 communities, but also in terms of hiring, and retention,
11 and the ability to give raises because of the demands of
12 their CalPERS obligations.

13 While -- and what we think that you all should
14 take away from this report is that the support for
15 employers, the ability to make sure that they can keep
16 making their employer contributions is really the lens
17 that you should apply when you go through the ALM process,
18 where you're making decisions about the asset allocation
19 and the discount rate is really asking and having the
20 educated discussion about what the impact to employer
21 contributions will be.

22 Furthermore, two points that I want to make is
23 that on the PEPRA front, while we can appreciate in the
24 long term that bringing on PEPRA members may lower the
25 obligations in the outyears, the fact is is that many

1 employers are either furloughing or laying off staff and
2 won't be able to rehire and reap the benefits of that
3 PEPRA membership because of the impacts on the
4 pandemic-induced recession.

5 And secondly, with regard to the State Auditor's
6 dashboard, we strongly would caution you at using that
7 report to make any judgments about the ability of cities
8 to meet their obligations or their financial management,
9 because that report, for example, penalized cities and
10 their financial ranking if they had low reserves,
11 regardless of the fact that perhaps the reserves were low,
12 because they were using that money to make ADPs or to set
13 up a 115 Trust so that they could further support their
14 CalPERS obligations. And so as always, the League of
15 Cities is always there to work with you, to support you,
16 and to be a partner in any of the endeavors necessary to
17 make sure that we have an affordable and sustainable
18 pension system.

19 Thank you very much.

20 VICE CHAIRPERSON MILLER: Thank you. I do not
21 believe we have anymore public comments, do we, Mr. Fox?

22 STAKEHOLDER RELATIONS CHIEF FOX: Not on this
23 item, Mr. Chair. We do have one under the public comment
24 7c.

25 VICE CHAIRPERSON MILLER: Okay.

1 So I believe that wraps up this item and we go
2 to -- let's see, I've lost my screen here, so Committee
3 Direction.

4 CHIEF FINANCIAL OFFICER COHEN: Yes, sir.

5 VICE CHAIRPERSON MILLER: Committee Direction,
6 Mr. Cohen.

7 CHIEF FINANCIAL OFFICER COHEN: Yes, I've got
8 three items. First is the breakdown of the investment,
9 personal and other, administrative expense item that we've
10 provided for you in the past. We'll do that again.

11 Second was the discretionary payments. I think
12 you saw that on slide 7 of Randy's presentation. I also
13 wanted to point you to page 68 of the financial statements
14 attachment 1 from that item. I will leave it to Board
15 Member Middleton if she wants to reach out for additional
16 information, we're obviously happy to pull that together.
17 And then the third item was further work on protecting
18 privacy information, Social Security numbers in
19 particular, as it relates to the election item, both in
20 the short term as well as the long term. We will bring
21 you back additional information as appropriate on that
22 one.

23 VICE CHAIRPERSON MILLER: Okay. Sounds right to
24 me.

25 I see no questions or comments.

1 So we'll move to item 7c, public comment. Mr.
2 Fox.

3 STAKEHOLDER RELATIONS CHIEF FOX: Yes, Mr. Chair.
4 We do have one caller on Item 7c. We're having some
5 difficulty on the screening, so standby for just a moment.

6 VICE CHAIRPERSON MILLER: Standing by.

7 MS. PETITE: Hello. Can you hear me?

8 VICE CHAIRPERSON MILLER: Go ahead.

9 MS. PETITE: Hello?

10 STAKEHOLDER RELATIONS CHIEF FOX: Yes, ma'am.

11 MS. PETITE: Hello. How are you?

12 My name is Serena. I am contacting the Finance
13 and Administration Committee today, because I am a right
14 of way acquisition agent for the City of Tulsa Engineering
15 Department in Tulsa, Oklahoma? And I'm reaching out in
16 hopes of possibly getting the correct contact information
17 for the person or group who can authorization a payment
18 from the City of Tulsa to the retirement system in the
19 amount of \$32 -- I'm sorry, \$32,527 for a utility easement
20 on property that is owned by CalPERS. An existing
21 stormwater pipe needs to be replaced in the parking lot of
22 two retail businesses who lease retail space in a building
23 that exists on property you own in Tulsa, Oklahoma.

24 I had reached out to your property manager that
25 is on file with the local tax assessor office. However, I

1 have not received a response from them in about nine
2 weeks. The easement requested is for 3,097 feet. CalPERS
3 would remain owner of the entire property. I'm just
4 looking for contact information, if someone can help me.

5 VICE CHAIRPERSON MILLER: Okay. Thank you,
6 ma'am. I will see if I can direct staff to follow up with
7 this caller and see, you know, what's going on. Does that
8 sound reasonable, Mr. Cohen?

9 CHIEF EXECUTIVE OFFICER FROST: Yeah. Mr.
10 Miller, if the public commenter can just remain on he
11 line, we could have Mr. Fox get her the appropriate
12 contact information.

13 VICE CHAIRPERSON MILLER: Great. Thank you.

14 CHIEF EXECUTIVE OFFICER FROST: Um-hmm.

15 VICE CHAIRPERSON MILLER: I think that about does
16 it for Finance and Administration committee for today. So
17 we will adjourn. And I believe Risk and Audit will begin
18 let's say at 4:00 o'clock.

19 Take a short break.

20 Okay. We are adjourned. Thank you, all.

21 (Thereupon the California Public Employees'
22 Retirement System, Board of Administration,
23 Finance & Administration Committee meeting
24 adjourned at 3:45 p.m.)

25

1 CERTIFICATE OF REPORTER

2 I, JAMES F. PETERS, a Certified Shorthand
3 Reporter of the State of California, do hereby certify:

4 That I am a disinterested person herein; that the
5 foregoing California Public Employees' Retirement System,
6 Board of Administration, Finance & Administration
7 Committee meeting was reported in shorthand by me, James
8 F. Peters, a Certified Shorthand Reporter of the State of
9 California;

10 That the said proceedings was taken before me, in
11 shorthand writing, and was thereafter transcribed, under
12 my direction, by computer-assisted transcription.

13 I further certify that I am not of counsel or
14 attorney for any of the parties to said meeting nor in any
15 way interested in the outcome of said meeting.

16 IN WITNESS WHEREOF, I have hereunto set my hand
17 this 24th day of November, 2020.
