### Economic and Fiscal Impact Statement – Std. Form 399 CalPERS Board Election Modifications

CalPERS has historically realized low voter participation for the Board of Administration elections. Over the last five years, CalPERS has expanded its various marketing resources in an effort to increase voter participation. Even with the expanded marketing resources, CalPERS voter participation continues to decline.

CalPERS staff researched options to increase voter participation and reduce overall election costs. Staff compared their process to the California State Teachers' Retirement System (CalSTRS). CalSTRS Board election process currently uses one vendor and allows their voters to cast their vote either by internet, telephone, or mail. CalPERS uses two vendors to conduct their elections, has a mail only voting process and the cost is higher.

The proposed regulations would change CalPERS current mail only voting process to a blended election method allowing voters the flexibility to vote by telephone, internet or by mail. Staff anticipates that allowing additional voting methods could result in higher voter participation, potential reduction in cost, and a more efficient process by procuring one vendor to administer an election instead of two.

Additionally, other technical changes to the Board election process have been included in these regulations that could result in cost savings to CalPERS. Currently, CalPERS is required to mail the Notice of Election and undeliverable ballots to employers. These regulations will allow CalPERS to electronically distribute the Notice of Election to employers instead of printing and mailing physical copies and require voters to contact CalPERS directly to receive a replacement ballot instead of automatically mailing ballots to the employers.

Based on the four-year election cycle, the election cost savings could result in approximately \$400,000 for the primary elections and \$350,000 for the runoff elections. However, the fiscal impact for the new voting system cannot be identified until after CalPERS procures a new Board election vendor that can manage a blended election system (telephone, internet, and mail).

#### Economic Statement

The proposed regulation involves the voting process for the CalPERS Board of Administration Elections and will not have a cost impact on the private sector.
