*Re: Transaction Fee Pilot (File No: S7-05-18)*

Dear Mr. Fields,

Ontario Teachers' Pension Plan ("OTPP"), the California Public Employees' Retirement System ("CalPERS") and the group of undersigned pension plans submit this comment letter to express our support for the Transaction Fee Pilot for National Market System stocks ("Pilot") proposed by the Securities and Exchange Commission ("Commission" or "SEC").

Collectively, this group of North American asset owners, with 7 million members and over \$1.4 trillion in assets, has a deep interest in market structure reform that enhances our ability to pay pensions and invest plan assets on behalf of our members and beneficiaries. The long-term nature of our investments and liabilities, and our responsibilities as a fiduciary to our members, drive our interest in rules and regulations that govern the securities markets.

In recent history, technical advancements and regulatory rulemaking have attempted to increase market competition and lower trading costs. Unfortunately, this has resulted in increased market complexity and various unintended consequences, and long term investors have borne the cost of this change in market structure.

A controversial element of this complex market structure is the practice of exchanges paying rebates to broker members for order flow, otherwise referred to as maker-taker or taker-maker pricing. These pricing schemes as well as other fee incentives, have been generally criticized by a wide spectrum of asset managers, pension funds, endowments, members of Congress, academics and policy makers, including SEC Economists, based on the potential conflict of interest it creates between brokers and their investor clients.

We applaud the Commission for acknowledging this conflict and proposing the Pilot as a necessary and appropriate step to study the effects that these incentives have on broker order routing, execution quality, and market quality overall.

The undersigned group of [pensions and endowments] fully support the SEC Pilot as written. Further, we would like to highlight elements of the SEC's proposal we believe are essential:

**The Pilot must test the elimination of exchanges rebates** – It is critical to include a test group that prohibits the payment of rebates to create a data set that demonstrates the effect of rebates, of any size, on order routing and executing quality. Without this test group, the Pilot will be of limited use to long-term investors who question the importance of rebates to overall market quality. Also, this will allow exchanges to compete on pricing and execution quality without imposing further price controls on the market.

**The scope of the Pilot** – We are supportive of the Pilot including the widest range of NMS stocks possible. The Commission proposal of 1,000 stocks in each bucket is sufficient and will provide an appropriate dataset. We are also supportive of the proposed 2-year timeframe of the Pilot, which will prevent certain participants from attempting to influence behavior and distort the results of the Pilot.

**Include all NMS Exchanges** – It is critical to include all NMS exchanges (including both maker-taker and taker-maker exchanges) in the Pilot. This helps to eliminate distortions in routing incentives which could skew the data outputs from the Pilot.

Finally, in order to maintain the integrity of the pilot, companies should not have the option to opt out. As evidenced in the comment process, the asset manager / asset owner community is heavily supportive of such a pilot. This should provide the necessary confidence to all public companies to be included.

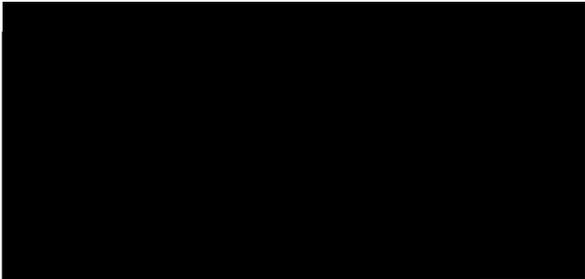

We are confident the Pilot will generate sufficient data to facilitate analysis of the effects that transaction-based fees and rebates may have on broker order routing behavior, execution quality, and market quality in general.

We support the proposed SEC Pilot, as written, and would encourage the SEC to take the necessary steps to implement it as soon as possible.

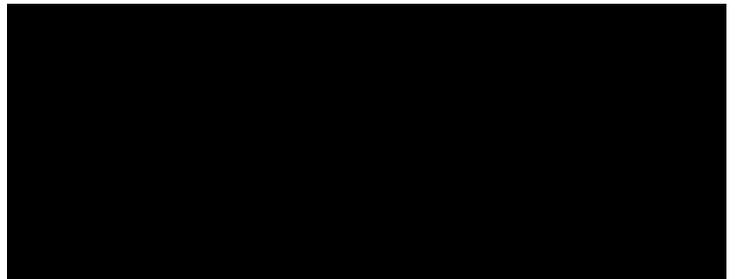

Thank you for the opportunity to comment on the review process.

Sincerely,

Kevin Duggan
