

Our Long-Term Commitment

In July, we reported a 4.7% preliminary net return on investments for the fiscal year 2019-20. Our assets at the end of that period stood at more than \$389 billion.

While few predicted the precise consequences of a global pandemic, good investors plan for market instability. We were prepared, and by the end of the fiscal year the CalPERS fund had recovered most of the value lost during the worst of the financial market meltdown.

We are dedicated to our long-term strategy to deliver your retirement security.

PEPRA vs. Classic Membership

What's the difference in retirement benefits, and which membership type applies to you?
