Dear Fellow Old Republic International Corp. Shareowner:

Support Shareowner Proposal #4 Requesting Proxy Access

CalPERS is the largest state public pension fund in the United States with \$301¹ billion in total assets under management and long-term owner of approximately 1,025,000 shares in Old Republic International Corp. CalPERS would appreciate your support on proposal #4 at the company's May 27, 2016 annual meeting of shareowners.

Proxy Access is a Fundamental Shareowner Right – Provides Accountability in the Boardroom

We believe providing access to a company's proxy to give shareowners the ability to nominate directors to the board is one of the most important rights for owners of a company. Without effective proxy access, the director election process simply offers a ratification of management's slate of nominees. Therefore, we believe long-term shareowners should have meaningful access to this process on the terms specified in the proposal #4. The proposed thresholds include:

- Beneficial ownership of at least 3 percent of the outstanding stock;
- Three years of continuous ownership; and
- Ability to nominate up to 25 percent of the board.

CalPERS believes accountability in the boardroom is critically important at Old Republic given the company's decision to not implement a 2015 CalPERS sponsored proposal requesting the adoption of majority voting for director elections – a proposal that passed with overwhelming shareowner support at approximately 78% of the votes cast. We question the company's decision to ignore the views of its shareowners and therefore request your support to enhance board accountability – vote "FOR" proposal #4.

Proposed Terms Based on SEC Proxy Access Rulemaking in 2010

Before adopting its now vacated proxy access rule in 2010, the SEC undertook a detailed analysis, both internally and through the public comment process. The SEC determined that a 3 percent ownership threshold was appropriate, stating, "The ownership threshold we are establishing should not expose issuers to excessively frequent and costly election contests conducted through use of Rule 14a-11, but it is also not so high as to make use of the rule unduly inaccessible as a practical matter." The proposed holding period and slate size limitation in proposal #4 are also consistent with the SEC rule.

¹CalPERS total assets under management at fiscal year ending June 30, 2015.

Trends Show U.S. Companies and Shareowners Are Embracing Proxy Access

Prior to November 2014 only six U.S. companies had a 3 percent proxy access bylaw in place – that number has risen to more than 210 companies as of April 1, 2016. The growing number of companies spans across various industries and size ranges – examples include Apple, Microsoft, Johnson & Johnson, General Electric, Amazon, Wells Fargo, AT&T, Coca-Cola, Pfizer, and Chevron. These companies are adopting the governance best practice, thereby rejecting the common corporate assertion that proxy access is costly, distracting, and favored mainly by special interest groups.

In 2015, proxy access shareowner proposals on average received majority support (54%) at companies where they went to a vote, and achieved a high watermark of over 90% support when the proposal was not opposed by the board. This demonstrates the wide support for proxy access across the investor community. Given the widespread investor backing and the accelerating adoption of proxy access bylaws, the Council of Institutional Investors has developed a “Proxy Access: Best Practices”² document providing a framework for investors and companies that highlights how to adopt a shareowner-supportable proxy access bylaw provision.

CFA Institute Concludes Proxy Access Would Benefit the Markets and Boardroom

A report published by the CFA Institute found that giving investors access to the proxy to nominate directors would benefit shareowners and the capital markets.³ The specific report findings include:

- Proxy access has the potential to enhance board performance and raise US market capitalization.
- Proxy access reform will not hinder board performance.
- Proxy access is used infrequently and with little disruption in other markets around the world.

Support Proxy Access and Director Accountability – Vote “FOR” Shareowner Proposal #4

We believe proxy access is fundamental to a sustainable system of governance that fosters director accountability and long-term value creation. Fully accountable governance structures should be in place to offer shareowners effective access to the director nomination process. Please vote “FOR” proxy access proposal #4. Should you have any questions please feel free to contact Todd Mattley, CalPERS Investment Officer and Global Head of Proxy Voting at Todd_Mattley@calpers.ca.gov or 916-795-0565.

Sincerely,

Anne Simpson
Investment Director, CalPERS
