

# Data Element Definitions For **Retirement Enrollment File**

## **Important:**

This data element definition document does NOT describe the file structure for the retirement enrollment file. Please refer to the appropriate XSD (XML Schema Definition) file for the file structure and the *Encryption Decryption External\_File Naming.pdf* for the file naming convention of the retirement enrollment XML file. This data element definition document is only intended to describe the data elements and relationships. Further information on how to use the documents and files included in the *Technical Toolkit* can be found in the *Guide to the Technical Toolkit*.

The Retirement Enrollment Reporting File Table in this document provides the list of data fields that employers are asked to provide CalPERS in the retirement enrollment process. The columns given below are intended to be used for the purpose of helping employers identify the information that must be submitted and how the information should be formatted. Each column should be interpreted as follows:

- Data Element Number – The numerical designation that corresponds with data element in the same row.
- Data Element Name – The plain-English name of the information that will be required in this field.
- Description of Submitted Data – A longer, more detailed description of the field including explanation of submitted data, and any conditions under which the field must be populated.
- R/O/C – Indicates if the information is required, optional or conditional.
  - 'R' indicates that the data is required for the field and an error will generate if the field is not populated.
  - 'C' indicates that the data for that field is required when certain conditions are met based on values in another field. Applicable conditions are located in the column of this document titled Description. Information populated when not called for by a condition will be ignored. If data is missing in a conditional field that required the data based on a condition, an error will be returned.
  - 'O' indicates that the data is optional for that field. Information populated when not called for will be ignored. If data is missing in an optional field, no error will be returned. The column titled Description indicates what format the optional data must be provided in. If optional data is provided that does not meet the specified format an error will result.

- Field Values – A list of the data that should be provided, if applicable, or the format that the field should be populated under.
  - Except where noted, the data element cannot contain any of the following characters:

Asterisk	*	Grave	`
At sign	@	Greater than sign	>
Backslash	\	Less than sign	<
Braces	{ }	Percent sign	%
Brackets	[ ]	Plus sign	+
Caret	^	Question mark	?
Dollar sign	\$	Quotation mark	“
Equal sign	=	Under score	–
Exclamation point	!	Vertical bar	

- Max Length – The maximum number of characters that the field will accept.
- Legacy (ACES) Field Values – Codes that were used in ACES.

Appendix B of this document contains an analysis of the fields in the retirement enrollment file and their equivalent, if applicable, in the legacy ACES system. Also included is a column labeled “Change?” which states if a change in the column occurred.

Please refer to the my|CalPERS for Employers area on CalPERS On-Line for the latest file format and select *Technical Resources for File Reporters*.

Also included on this website is the XML Schema Definition (XSD) that provides a sample XML data structure. Employer produced XML files must conform to the XSD in order to be considered valid. Employers are able to use the schema to help develop or alter their systems to comply with the standards in order to submit data files to CalPERS. XML tools are available on a variety of platforms to help IT developers create XML files that adhere to the CalPERS schema. The XML file is different from flat files that many employers used to send CalPERS in that the information is organized in a hierarchical structure much like a standard outline.

The XML Schema Definition documents this report structure in detail. This document provides an indication of how the report fields are related to each other in the column titled Data Type. The following is an outline of the XML file structure:

Retirement Enrollment File Header – For example, type of file, Business Partner ID, and date of file.

- A. Transaction Information – For example, Transaction type, Unique Identifier, Effective Date
  - 1. Demographics – For example, Person Information, Address Information, Communication Information
    - a. Person Information – For example, SSN, Participant Name, Birth Date
    - b. Address Information – For example, Address, City, State, Zip Code
    - c. Communication Information – For example, Phone number, Email Address
  - 2. Appointment – For example, Employer Information, Employment Information, Job Position
    - a. Employer Information – For example, Employer CalPERS ID, County
    - b. Employment Information – For example, Original Hire Date, Temporary Appointment Information, Collective Bargaining Unit
    - c. Job Position Information – For example, Position Code, Appointment ID, Tier
  - 3. Retirement Enrollment – For example, Program, SSA designation, ARP designation

The outline above can be repeated so there can be multiple programs, reports and participants in a single file.

In addition to the XSD, a sample XML file is provided in the *Technical Toolkit*. The sample output file can be used as a model for your agency as you produce test files.

XML technologies define an extensible messaging framework that provides a message construct that can be exchanged over a variety of underlying protocols. This framework is designed to be independent of any particular programming language, platform, and other technical criteria.

## Appendix A

### 1. Transaction Type Descriptions

Transaction Type	Definition
New Appointment	New employment. This includes a new position that an employee takes with the employer, whether it's the first time employed with the employer, rehiring a person who worked for the employer at one point or additional employment for a person who is currently employed by the same employer. Transactions should be reported upon reaching eligibility for CalPERS membership. Effective Date is the first day of membership.
Appointment Change / Site Change	A change in employment that is continuous (i.e. with no employment gaps). This transaction could include one or more of the following changes: a move from one site to another, a position or group change. The result of this transaction could result in a benefit change for the employee.  Effective Date is the first day the changes take effect.
Begin Leave	Indicates the beginning of a leave of absence (e.g. Military Leave). Effective Date is the first day of the leave period.
End Leave	Indicates the end of a leave of absence. Effective Date is the first day back on the job.
To Local ARP	Indicates that the employer has changed a member's status from contributing to CalPERS to contributing to a Local ARP plan. Effective date is the first day the employer moves the employee into the Local ARP plan and stops making CalPERS contributions.  This field applies only to PAs who have such a provision in their contract
From Local ARP	Indicates that the employer has changed a member's status from contributing to a Local ARP plan back to contribution to CalPERS. Effective Date is the first day employer moves the employee from the Local ARP plan back to making CalPERS contributions.  This field applies only to PAs who have such a provision in their contract
Permanent Separation / Left Bench	The employee leaves the position with no expectation of returning. Effective Date is the day <i>after</i> the last day an employee works for your agency, which is often the day after the last day on payroll.
New Judge Appointment	New employment for State and County judges. Effective Date is the first day on the bench.
Address Change	A change to the employee's address. Effective Date is the first day that the address is valid.

Transaction Type	Definition
Profile Change	A change to the employee's profile (name, gender, birth date, SSN). Effective Date is the first day that the change is valid.
Membership Inquiry	Transaction used only to query the system as to whether or not this individual is eligible for CalPERS membership. The person must be a current active member in the system (not in a status of refunded or retired). Eligibility is strictly for the CalPERS program, not JRS, JRS II or LRS.
Left Bench	The judge leaves the bench with no expectation of returning. Effective Date is the last day of employment.
