SYSTEM ACCESS ADMINISTRATION

An agency's my|CalPERS system access administrator (SAA) is a key point of contact. The person is accountable for providing my|CalPERS access to any additional users. This involves utilizing system administrator pages in my|CalPERS to associate predefined access roles to each contact and assign the user a unique username and password. In addition, they have the responsibility to reset a user's password, lock a user's access rights to my|CalPERS and change a user's access role(s).

You can find specific information about SAA on the CalPERS website at: [System Access Administration](#)
