

California Health Care: Landscape and Levers for Change

Summary of Discussion

This in-depth session will cover aspects of health care spending, insurance arrangements and the California delivery system that forms the foundation for CalPERS health benefits system. It will discuss the challenges CalPERS and the health care delivery system faces related to cost, quality, access, and equity. In addition, it will identify the market and policy actors who exert leverage on different parts of the system focusing on areas with potential to improve health outcomes for CalPERS members and for California's health care system.
