-----	--------	---	---	---	------	---	---	------	---	---	------	---	---	---

¹ Asset values may reflect the first day of the following month when rebalancing and/or large cashflows occur on the last day of the quarter.

² Asset value of Public Equity Cap Weighted and Income Treasury segments includes notional exposure obtained via trust level Synthetic Cap Weighted and Synthetic Treasury portfolios respectively.

³ Market exposure of private asset classes reported at NAV.

⁴ Total Fund Income does not have a 1 Year return as the strategy inception in October 2020; however, the return impact is included in the PERF return.

⁵ Low Liquidity Enhanced Return (LLER) was historically funded out of Cap Weighted and Treasury so returns are also reflected in the returns of Cap Weighted and Long Treasury through 12/21/2020; but are only recorded once in Total PERF returns. Returns prior to 12/21/2020 are for reference only.

⁶ Liquidity reflects net asset value of the Liquidity Segment. Trust Level Financing reflects derivatives financing and repo borrowing in trust level Synthetic Cap Weighted and Synthetic Treasury portfolios.

⁷ Information Ratio is excess return divided by realized tracking error. This presents a perspective on risk adjusted performance. The metric is not meaningful for illiquid assets (where realized volatility tends to be muted by valuation based pricing and benchmark issues) or for indexed strategies. Information Ratio for Long Spread segment includes the history of Global Fixed Income portfolios prior to July 2018. Long Treasury and High Yield portfolios are managed in an index-like approach without an active return target.

* All performance reported net of investment expenses.

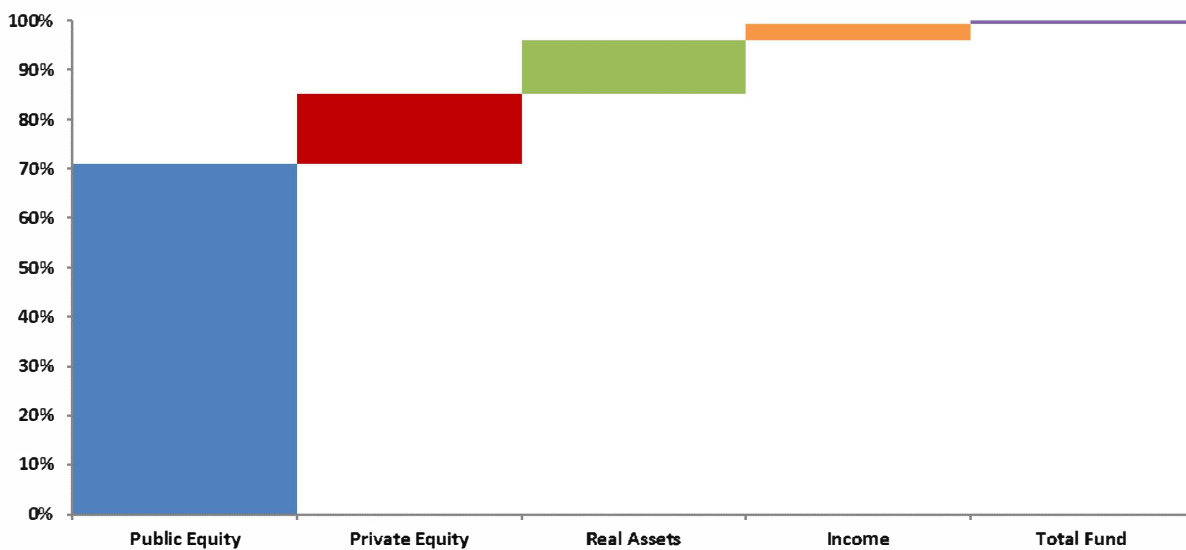

Public Employees' Retirement Fund (PERF)

Total PERF Risk

Risk Measure	7/1/2021	4/5/2021	Explanation of Risk Measures:
Forecasted Volatility¹			
Portfolio	10.7%	11.4%	The total (absolute) volatility is the annualized standard deviation of the Portfolio total return distribution and is indicative of the plan's dispersion given the current environment. The metric is model-based and could underestimate potential drawdowns.
Benchmark	10.4%	11.0%	
Forecasted Tracking Error¹			
Portfolio	1.16%	1.11%	Forecasted tracking error is the annualized standard deviation of the differential return between the portfolio and an equal investment in the benchmark.
Forecasted Tracking Error (Actionable)¹			
Portfolio	0.13%	0.16%	Excludes from the above measure the effect of active exposure from private asset classes (Private Equity and Real Assets) arising from the modeling challenges and the non-investible nature of their benchmarks. This metric focuses on controllable and measurable active exposures and captures all public markets strategies and asset allocation management.

July 1, 2021	Volatility		Tracking Error

Contribution to Forecasted Volatility

¹ Forecasted Volatility and Tracking Error based on Barra MAC.XL model for 7/1/2021 and 301XL model for 4/5/2021.

² Realized Volatility and Tracking Error for private asset classes and Actionable TE are computed from quarterly net returns.
