APPEARANCES

COMMITTEE MEMBERS:

Rob Feckner, Chairperson

Ramon Rubalcava, Vice Chairperson

Lisa Middleton

David Miller

Eraina Ortega, also represented by Nicole Griffith

Jose Luis Pacheco

Theresa Taylor

Mullissa Willette

Betty Yee, represented by Karen Greene Ross

BOARD MEMBERS:

Fiona Ma, represented by Frank Ruffino

STAFF:

Marcie Frost, Chief Executive Officer

Matt Jacobs, General Counsel

Donald Moulds, PhD, Chief Health Director

Anthony Suine, Deputy Executive Officer

Kim Malm, Chief, Strategic Health Operations Division

Christina Ortega, Committee Secretary

ALSO PRESENT:

David Aguinaldo, DLC799

APPEARANCES CONTINUED

ALSO PRESENT:

J.J. Jelincic, Retired Public Employees Association

Larry Woodson, California State Retirees

PROCEEDINGS

1  
2 CHAIRPERSON FECKNER: Good morning, everyone.  
3 We're going to call Pension and Health Benefits Committee  
4 meeting to order. The first order of business will be to  
5 call the roll.

6 COMMITTEE SECRETARY ORTEGA: Rob Feckner?

7 CHAIRPERSON FECKNER: Good morning.

8 COMMITTEE SECRETARY ORTEGA: Good morning.

9 Ramon Rubalcava?

10 VICE CHAIRPERSON RUBALCAVA: Present.

11 COMMITTEE SECRETARY ORTEGA: Lisa Middleton?

12 COMMITTEE MEMBER MIDDLETON: Present.

13 COMMITTEE SECRETARY ORTEGA: David Miller?

14 COMMITTEE MEMBER MILLER: Here.

15 COMMITTEE SECRETARY ORTEGA: Eraina Ortega?

16 COMMITTEE MEMBER ORTEGA: Here.

17 COMMITTEE SECRETARY ORTEGA: Jose Luis Pacheco?

18 COMMITTEE MEMBER PACHECO: Present.

19 COMMITTEE SECRETARY ORTEGA: Theresa Taylor?

20 COMMITTEE MEMBER TAYLOR: Here.

21 COMMITTEE SECRETARY ORTEGA: Mullissa Willette?

22 COMMITTEE MEMBER WILLETTE: Here.

23 COMMITTEE SECRETARY ORTEGA: And Karen Greene

24 Ross for Betty Yee?

25 ACTING COMMITTEE MEMBER GREENE ROSS: Here.

1 CHAIRPERSON FECKNER: Thank you.

2 So we're now going to recess into closed session  
3 for items 1 through 3 on the closed session agenda. The  
4 open session of Pension and Health Benefits will reconvene  
5 immediately follow the Risk and Audit Committee meeting  
6 this afternoon I would assume somewhere around 1 o'clock.

7 So thank you all. At this point we will recess  
8 the open session meeting and clear the room.

9 (Off record: 9:01 a.m.)

10 (Thereupon the meeting recessed  
11 into closed session.)

12 (Thereupon the meeting reconvened  
13 open session.)

14 (On record: 1:00 p.m.)

15 CHAIRPERSON FECKNER: Good afternoon, we're going  
16 to reconvene the Pension and Health Committee. The first  
17 item on the agenda will be Item 2, the Executive Report.  
18 Who's going first?

19 Mr. Suine.

20 DEPUTY EXECUTIVE OFFICER SUINE: Yes, please.

21 CHAIRPERSON FECKNER: Yes, sir.

22 DEPUTY EXECUTIVE OFFICER SUINE: Good afternoon,  
23 Mr. Chair, members of the Committee. I'm Anthony Suine,  
24 CalPERS team member and thankful for being here again in  
25 person with you today.

1           Our regional offices have now been open for a few  
2 months providing in-person and virtual services. And in  
3 May, we had one of our busier counseling periods with just  
4 over 6,300 members counseled, which is about a 35 percent  
5 increase prior to our openings. Our members are hearing  
6 our strong recommendation to make appointments to ensure  
7 that they are served timely and with the most efficiency.  
8 And 80 percent of our members have been making  
9 appointments in our offices. The remaining 20 percent are  
10 walk-ins and we're able to triage them and provide the  
11 service options that would be available to them.

12           Roughly, 60 percent of our appointments are being  
13 conducted virtually and 40 percent of those are occurring  
14 in person. We also hosted 40 member education classes in  
15 May with a total attendance of about 1,500 members. We  
16 just started in-person member education classes, so five  
17 of those 40 classes were in person.

18           Moving to CalPERS Benefit Education Events.  
19 Registration is now open for our upcoming virtual CBEE  
20 that's occurring on June 22nd and 23rd. So far, we have  
21 over 2,700 members that have been registered. And  
22 following this June virtual event, we will be  
23 reintroducing our in-person CBEEs at -- with the event at  
24 Oakland Marriott on August 26 and 27th. We always welcome  
25 Board members to join those, events so we hope and -- hope

1 to see you in attendance then.

2 I wanted to provide a brief update on the limited  
3 duration regulations that you approved to move forward at  
4 our April Committee meeting. The regulation package has  
5 made its way to the Office of Administrative Law to begin  
6 the rulemaking process. They will be published on June  
7 17th and the comment period will run through August the  
8 1st. The whole process including the public notice,  
9 hearings, comment periods, et cetera can be rather  
10 lengthy. And we would anticipate an updated version after  
11 comments are received will likely make it back to you for  
12 further review and approval later this year.

13 If everything stays on track, ultimate approval  
14 will occur in spring or summer of 2023, and then  
15 regulations are published on a quarterly basis, meaning  
16 the effective date would eventually be summer or fall of  
17 2023.

18 This concludes my update and I'm happy to take  
19 any questions.

20 CHAIRPERSON FECKNER: Seeing none. Thank you.

21 DEPUTY EXECUTIVE OFFICER SUINE: Thank you.

22 CHAIRPERSON FECKNER: Mr. Moulds.

23 CHIEF HEALTH DIRECTOR MOULDS: Great. Good  
24 afternoon, Mr. Chair, members of the Committee. Don  
25 Moulds, Chief Health Director. Before we get to the focus

1 for today, which is 2023 health plan rates, I want to give  
2 you a couple of updates.

3           First, this summer, we'll have completed two  
4 successful cohorts of the CalPERS Health Care Academy.  
5 Last summer, I announced the launch of the academy, which  
6 is an internal program we created for CalPERS team members  
7 to become more informed about health care markets, policy,  
8 and the role of purchasers. Marian Mulkey, who delivered  
9 the health education session to the Board in 2021 has  
10 worked closely with us to develop the curriculum and has  
11 led both groups. It's proven to be an excellent  
12 professional development opportunity for the nearly 45  
13 team members who have gone through the program. And the  
14 Health Program has benefited greatly.

15           Cohort teams research and present on a health  
16 care topic relevant to CalPERS, which include  
17 recommendations for our consideration. In many instances,  
18 we're taking these terrific recommendations and they're  
19 becoming part of work groups we've created around our  
20 strategic plan and serving our members. The academy is a  
21 big success and we plan to offer two more cohorts to  
22 further expand health care knowledge throughout the  
23 enterprise.

24           Next, I want to -- I want you to know that this  
25 summer we're rolling out new functionality in myCalPERS.

1 Active employees, with their employer's approval, will be  
2 able to make any of their health enrollment changes online  
3 themselves in their myCalPERS account. Retirees have been  
4 able to do this for several years now. It's a great  
5 example how we're looking to increase efficiency and  
6 streamline the enrollment process for those members who  
7 choose to use it.

8 I want to set the stage for the preliminary  
9 premiums you'll see presented today. We've been working  
10 hard on along with our plans to better serve our members  
11 by adding more cost effective health plan choices and  
12 benefit designs focused on bringing our members high  
13 quality equitable care. Based on the changes you approved  
14 in November, members living in every county throughout the  
15 State will have much better options. No longer will the  
16 PPO plans be the only option in some of our rural areas.  
17 For the first time, members in those areas will have the  
18 option to switch to an HMO or an Exclusive Provider  
19 Organization, an EPO plan that offers lower cost sharing  
20 and in some cases a lower monthly premium.

21 Our members living in Monterey County will have  
22 the added choice of a low cost HMO option. We've added  
23 more Medicare Advantage Plans in 2022. To increase choice  
24 in plan competition. And this year, we're seeing a third  
25 year of Medicare Advantage premium decreases as we benefit

1 from the cost efficiencies of those plans. And our HMO  
2 plans are also performing well, in what's shaping up to be  
3 a very difficult year for health plans -- health premiums  
4 nationally.

5 All that said, this will be a hard conversation  
6 today. The rates we are bringing you are unsustainably  
7 high. Our discussion will make it clear exactly where our  
8 foci will be need to be going forward. We face big  
9 challenges in our PPO basic portfolio, both with the rate  
10 increases you'll see today and the deficit in the PPO  
11 basic health care fund. Once Ms. Malm is done walking you  
12 through the 2023 preliminary rates, I'll be back to talk  
13 more about both and to lay out our plan for addressing  
14 them going forward.

15 That concludes my remarks and I'm happy to take  
16 any questions.

17 CHAIRPERSON FECKNER: Thank you.

18 Ms. Taylor

19 COMMITTEE MEMBER TAYLOR: Yes. Thank you, Mr.  
20 Chair. Sorry, Mr. Moulds, just a really quick question.  
21 You went over -- and I'm writing and I couldn't keep up.  
22 So you said that myCalPERS you'll be able to make changes  
23 to the health care online is that what you said?

24 CHIEF HEALTH DIRECTOR MOULDS: To health care --  
25 yes, to your -- you'll basically be able to make your

1 elections and to make changes.

2 COMMITTEE MEMBER TAYLOR: Rather -- and when is  
3 that happening?

4 CHIEF HEALTH DIRECTOR MOULDS: This summer, so it  
5 will be in effect for open enrollment in the coming year  
6 for -- so for the fall for 2023.

7 COMMITTEE MEMBER TAYLOR: Oh, it will be ready  
8 for this year.

9 CHIEF HEALTH DIRECTOR MOULDS: Correct.

10 COMMITTEE MEMBER TAYLOR: So you don't have to go  
11 do all of that through your employer, like you used to  
12 have to do.

13 CHIEF HEALTH DIRECTOR MOULDS: That's correct.  
14 We need employ buy-in also --

15 COMMITTEE MEMBER TAYLOR: Okay.

16 CHIEF HEALTH DIRECTOR MOULDS: -- but -- but  
17 we're assuming that for the most part, that will be  
18 happening.

19 COMMITTEE MEMBER TAYLOR: Cool.

20 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

21 COMMITTEE MEMBER TAYLOR: That makes me very  
22 excited.

23 CHIEF HEALTH DIRECTOR MOULDS: Very cool. Yeah.

24 COMMITTEE MEMBER TAYLOR: Thank you very much.

25 CHAIRPERSON FECKNER: All right. Thank you.

1           Seeing no other requests, we'll move on to Item  
2 3, action consent items, the approval of the April 18th  
3 meeting minutes and the June 14th meeting minutes. What's  
4 the pleasure of the Committee?

5           COMMITTEE MEMBER TAYLOR: Moved approval.

6           COMMITTEE MEMBER MILLER: So moved.

7           CHAIRPERSON FECKNER: Moved by Taylor, seconded  
8 by Miller.

9           Any discussion on the motion?

10          Seeing none.

11          All in favor say aye?

12          (Ayes.)

13          CHAIRPERSON FECKNER: Opposed, no?

14          Motion carries.

15          Item 4, the information consent items. Having no  
16 request to move anything off of that agenda item, moving  
17 on to 5, Information Agenda items. 5a, Preliminary 2023  
18 HMO and PPO health plan premiums.

19          Ms. Malm.

20          (Thereupon a slide presentation.)

21          STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

22          Good afternoon, Mr. Chair, members of the  
23 Committee. Kim Malm, CalPERS team member. This is an  
24 information item to present the 2023 preliminary --  
25 preliminary health plan premiums.

1                   --o0o--

2           STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

3           On the agenda today, I'll go over program updates  
4 and the preliminary weighted averages. I'll also go over  
5 the proposed preliminary premiums for each of the basic  
6 and Medicare plans and the next steps.

7                   --o0o--

8           STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

9           Let's review the program updates for 2023 that  
10 you approved last November. In addition, I think it's  
11 important to note that this year we made a modification to  
12 the rates development process, where we required the  
13 health plans to sign and send in an actual attestation  
14 with their submission.

15           First, Kaiser is bringing in a new Medicare  
16 Advantage plan named Summit. It's a \$0 copay plan and  
17 will be in addition to Kaiser's Medicare -- or sorry,  
18 existing Senior Advantage Plan. Kaiser is also adding a  
19 quarterly \$70 over-the-counter allowance for both their  
20 existing Kaiser Senior Advantage Plan and the Summit Plan.

21           Finally, due to extenuating provider  
22 negotiations, Kaiser is not moving forward with its  
23 expansion into Monterey County for 2023, but hopes to do  
24 so for 2024.

25           In the Basic portfolio, Blue Shield is expanding

1 their Access+ EPO into 11 rural counties and expanding  
2 their Trio product into seven counties. We're  
3 particularly excited to announce that amongst those seven  
4 new expansions is Monterey County. Having Trio in  
5 Monterey will mean that our members will -- they will  
6 finally have a low cost HMO option. Blue Shield is also  
7 adding a pharmacy shared patient savings program for their  
8 Trio members. Western Health MyCare Select Medicare  
9 Advantage Plan is adding a post-discharge meal benefit  
10 following a hospital stay.

11           Anthem Medicare Preferred is reducing copays for  
12 acupuncture and chiropractic services to \$10 to match the  
13 current Medicare covered copays for these services.  
14 Again, in November, the Board approved benefit design  
15 proposals that applied to all of our basic plans, which  
16 include changes that make the reproductive health and  
17 fertility benefits more equitable, enhance coverage for  
18 hearing aid members for members age 26 and under, and a  
19 primary care physician match for PPO Basic members.

20           Next, let me briefly mention that this is the  
21 last of a two-year phase in implementation for risk  
22 mitigation. In 2022, premiums were adjusted 50 percent.  
23 The 2023 premiums reflect the full impact of risk  
24 mitigation. And with its full implementation, we  
25 anticipate smoother and more predictable changes across

1 the portfolio in future years. And just a reminder,  
2 Medicare plans are not included in the CalPERS Risk  
3 Mitigation Strategy.

4 Lastly, the Health Care Fund is currently below  
5 recommended reserve levels, because of losses from the 2  
6 PPO Basic products in 2021, so we don't recommend the use  
7 of Health Care Funds to buy down premiums for 2023.

8 --o0o--

9 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

10 For the timeline today, I'm presenting the 2023  
11 premium -- preliminary premiums, which include the new  
12 program changes I just mentioned. Between now and July,  
13 the CalPERS team will finalize these premiums and the  
14 Board will then approve them at the July Board off-site.

15 --o0o--

16 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

17 So let's look at the weighted averages for HMO,  
18 PPO, and Medicare. The first slide shows the overall  
19 basic HMO increase at 4.42 percent. If you remove the  
20 2022 snapback, which is really how we should look at  
21 premium increases, it is a 3.7 percent increase. This is  
22 very low compared to the industry. I'll go over the  
23 health care trend chart a little later that compares our  
24 increases to the market. And just as a reminder, the  
25 numbers you see here and throughout the presentation are

1 all single-party premiums. The regional premiums for  
2 contracting agencies are included in Attachments 2a and  
3 2b.

4 --o0o--

5 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

6 The PPO Basic plans, PERS Gold, and PERS Platinum  
7 have a 15.76 percent overall premium increase. Clearly,  
8 these are unsustainable high-rate increases. Don and I  
9 will discuss the PPO in more detail later in this  
10 presentation.

11 --o0o--

12 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

13 The Medicare Advantage plans have an average  
14 overall premium decrease of 3.23 percent. This is the  
15 third year we're seeing an overall decrease in Medicare  
16 Advantage plan premiums.

17 --o0o--

18 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

19 The Medicare Supplement plans have an overall  
20 weighted premium increase of 9.83 percent. Most of the  
21 2023 increase is due to the high pharmacy costs we are  
22 seeing for the Medicare Supplement products, as well as  
23 the 4.45 percent snapback from the 2022 premium buydown.

24 --o0o--

25 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

1           And finally, as I mentioned already, the overall  
2 combined HMO and PPO preliminary premiums have a 6.8  
3 percent increase for 2023.

4                               --o0o--

5           STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

6           Now, let me speak to some of the cost influencers  
7 that are impacting health care costs in our program.

8           First, medical inflation continues to impact premiums.

9           General medical inflation includes the annual increases in  
10 payments to hospitals, doctors, and other health care  
11 providers. Medical inflation is contributing about four  
12 percent of the 6.8 percent increase for 2023.

13           COVID-related costs, including treatment, were  
14 more than doubled in 2021 than in 2020. The 2023 premiums  
15 submitted by the plans utilize the 2021 experience in the  
16 first few months of 2022. Both the HMO and PPO  
17 experienced a similar pattern for COVID. Many plans  
18 expect that COVID testing will increase slightly in '22  
19 and '23, while treatment costs are expected to decline as  
20 prevention and treatment of COVID continue to improve.

21           The assumption that COVID costs will stabilize in  
22 2023 and will not result in additional increases. We  
23 aren't saying that COVID is going away, just that we don't  
24 expect it to keep causing premium increases.

25           Pharmacy costs continue to increase driven

1 primarily by increased utilization of high cost specialty  
2 drugs. The new Optum contract with improved pricing and  
3 rebate guarantees has brought the projected 2023 pharmacy  
4 increase from double digits to very low single digits.  
5 Overall, the Optum pharmacy increases have a very modest  
6 three percent increase to the 2023 Medicare premiums and a  
7 minimal impact to basic premiums.

8           Lastly, in the 2022 premium development, CalPERS  
9 spent approximately 125 million of the Health Care Fund  
10 surplus to buy down premiums for multiple Basic and  
11 Medicare plans in both HMO and PPO programs. The snapback  
12 of the 2022 premium buydowns is contributing about 1.4  
13 percent to the total increase.

14                           --o0o--

15           STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

16           As I mentioned previously, I'd like to share with  
17 you Oliver Wyman's Health Care Premium Trend benchmark for  
18 January 2022. We use this to compare how CalPERS premiums  
19 are doing relative to the rest of the market. As you can  
20 see, CalPERS basic HMO and Medicare Advantage came in  
21 lower than the national benchmark. Yet, the overall  
22 program increase of 6.8 is comparable to the national  
23 benchmark, and that's because the CalPERS PPO trend is  
24 higher than the national benchmarks.

25           It's worth pointing out here that the Basic PPO

1 increase without the snapback and premium surcharge is  
2 10.48 percent, about three percent higher than the  
3 benchmark.

4 Medicare Supplement plans premium increase,  
5 without snapback, is 5.38 percent, which is close to the  
6 benchmark of 5.20 percent

7 Don will talk about the challenges facing the  
8 PPOs later in this presentation. He'll also address the  
9 Health Care Fund deficit presented in April by the  
10 actuarial team to the Finance and Administration Committee

11 --o0o--

12 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

13 Now, I'm going to walk through each Basic plan  
14 starting with the HMO plans.

15 --o0o--

16 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

17 As a reminder, this again is the second and final  
18 year of risk mitigation implementation. We make these  
19 adjustments in the Basic plans to price them based on the  
20 value of the benefit design and network, rather than the  
21 concentration of healthy or unhealthy lives in the plans.

22 Also, I'm happy to report in 2023, we'll have an  
23 HMO or EPO option for all counties, as don mentioned in  
24 his opening comments. Let's start with Anthem Select HMO.  
25 Anthem Select has a strong presence in the Bay and Central

1 Valley. I'm going to step you through each of the charts  
2 on this first plan. I will point out more highlights on  
3 the following pages after I describe what each of these  
4 charts means.

5           The table shows the final published 2022 premium  
6 of \$848.08. The plan's preliminary 2023 premium of  
7 \$882.62. This is before risk mitigation. Next is the  
8 plan's risk score and risk mitigation impact for the plan.  
9 So for Anthem Select has a risk score of 0.9838. This  
10 indicates the plan is healthier than average -- than  
11 average members in the basic portfolio. Now, their  
12 premium is \$903.85, a 6.58 percent increase over 2022.

13           Looking at the cost drivers chart to the right,  
14 the 2023 premium increase for Anthem Select is due to  
15 several factors, including medical cost increases, which  
16 contributed 4.47 percent to their premium. The next bar  
17 is pharmacy, where we see a slight reduction. The other  
18 bar is the family factor, which accounts for changes in  
19 the average family size during open enrollment. It also  
20 captures some of Anthem's administrative overs. There's a  
21 2.48 percent snapback impact from using the Health Care  
22 Fund reserve to buy down the premium by \$10 million in  
23 2022.

24           And then the last bar on the chart is the impact  
25 that risk mitigation had on their rate. As you can see,

1 overall the premium increase is 6.58 percent.

2 --o0o--

3 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

4 Now, let's look at Anthem Traditional. This is a  
5 broad network HMO and is offered in many high-cost,  
6 low-competition areas of the state. Anthem Traditional  
7 has a premium decrease of \$217.68, which is almost  
8 entirely due to risk mitigation. This risk score is  
9 1.2121, which means they have more unhealthy lives than  
10 the average Basic plan. So risk mitigation helps their  
11 premium significantly. Overall, Traditional's 2023 rate  
12 is 6.8 percent lower than it was in 2022. You'll also  
13 note here that there's a 5.78 percent snapback from buying  
14 down the premium by \$10 million in 2022.

15 --o0o--

16 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

17 Next is Blue Shield Access+, which is also a  
18 broad network. In the last couple of years, they've been  
19 working with us to help achieve our goal of having an HMO  
20 or EPO option available in every county. Here, you'll see  
21 a premium decrease of \$245.92 due to risk mitigation.  
22 This brings the 2023 premium to \$842.61, a decrease of 6.4  
23 percent from 2022.

24 --o0o--

25 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

1 Blue Shield is a narrow network -- Trio, sorry,  
2 is a narrow network plan introduced in 2020. Trio's  
3 preliminary premium is 2.58 percent increase over 2022.  
4 As Trio was introduced three years ago, it is a relatively  
5 small plan. They don't have much experience to base their  
6 projections. Looking at the cost drivers chart, there's a  
7 1.25 percent snapback from buying down the premium by 1.7  
8 million in 2022. Risk mitigation increased Trio's premium  
9 by 3.34 percent.

10 I'd like to add here that in 2023, we're moving  
11 forward with Trio's expansion into Monterey County, along  
12 with six other counties. That's a very nice win for  
13 CalPERS members in Monterey. And as you can see, we're  
14 able to successfully due the -- expand to Monterey without  
15 a big increase to their premium, which is another critical  
16 success.

17 --o0o--

18 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

19 Health Net's Salud y Más is another narrow  
20 network plan that provides services in the lowest cost  
21 Southern California counties. The plan has the healthiest  
22 lives in our portfolio. With risk mitigation, their  
23 premium is now \$631.89, and increase of 29.88 percent.  
24 Even with this high premium increase, Salud y Más has the  
25 lowest HMO premium in the Basic portfolio, actually \$90

1 less than the next one closest to it.

2 Looking at the cost drivers chart, the increase  
3 is primarily driven by 8.54 percent snapback from buying  
4 down the premium 2022. And again, from the 16.84 percent  
5 impact of risk mitigation.

6 --o0o--

7 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

8 Health Net SmartCare operates in 20 counties, but  
9 nonetheless has a very small number of members. Health  
10 Net SmartCare's premium is \$993.39, or a 1.36 percent  
11 premium reduction from 2022. SmartCare has experienced  
12 volatile member migration and risk concentration  
13 fluctuations in the last few years, which impacted their  
14 medical and pharmacy numbers. However, risk mitigation  
15 helped SmartCare by over eight percent.

16 --o0o--

17 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

18 Kaiser is a closed network that operates in 31  
19 counties throughout the state. Kaiser's 2023 premium is  
20 \$852.68. Looking at the cost drivers, they have an 8.04  
21 percent impact from Medical. The two-year phase-in of  
22 risk mitigation increased Kaiser's premium by 2.74  
23 percent. Without it, Kaiser's increase would be 3.2  
24 percent.

25 --o0o--

1 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

2 Sharp is a closed network that provides services  
3 in the San Diego area. This is a small and healthier  
4 plan. Their 2023 premium is \$764.96 or 9.4 percent higher  
5 than the 2022. Most of that is due to risk mitigation.

6 --o0o--

7 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

8 UnitedHealthcare Alliance is an HMO plan  
9 operating in 26 counties. They have a slightly sicker  
10 population, so risk mitigation reduces the plan's  
11 preliminary premium slightly to \$848.53. There is a 2.79  
12 percent snapback from buying down the premium by \$16.7  
13 million in 2022. That, and their medical trend, accounts  
14 for most of Alliance's 3,73 percent premium increase.

15 --o0o--

16 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

17 UnitedHealthcare Harmony is a narrow network HMO  
18 available in five Southern California counties. UHC's  
19 Harmony's premium is at 2.04 percent decrease over 2022  
20 with a premium of \$722.28. The decrease is mostly due to  
21 pharmacy and updated risk mitigation assumptions.

22 One more thing to note is that Harmony's premium  
23 is coming in over \$130 lower than Kaiser's. As you know,  
24 one of the reasons you proposed adding Harmony last year  
25 was to introduce another low-cost plan that could put

1 downward price pressure on Kaiser.

2 --o0o--

3 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

4 Western Health Advantage HMO provides service in  
5 Sacramento and select Northern California counties. Their  
6 preliminary premium is \$760.17, an increase of 2.55  
7 percent over the 2022 premium.

8 --o0o--

9 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

10 Moving on to the PPO plans -- PPO Basic plans.  
11 As I mentioned earlier, the PPO Program is experiencing  
12 significant premium increases far higher than the HMO  
13 Program. PPOs lack the care management that are central  
14 in our HMOs. Members have the freedom of choosing any  
15 providers for care and see specialists without a referral.  
16 This results in higher utilization of services. PPO  
17 utilization almost 40 percent higher than HMO utilization.  
18 The capitation payment system is heavily used in our HMOs  
19 and creates incentives for health care providers to manage  
20 care. This results in a more cost efficient health care,  
21 lower unit costs for inpatient, emergency room, and  
22 physician services, and more appropriate utilization.

23 In addition to having higher trends in all of  
24 these areas, our PPO plans cover out-of-network services,  
25 which cost much more than in-network care. The Basic PPO

1 plans had a very difficult year in 2021. COVID-related  
2 costs came in more than double than 2020 COVID costs. We  
3 also saw a strong increase of non-COVID services as our  
4 PPO members started seeking care that they had deferred in  
5 2020. Looking at the cost drives chart, the main drivers  
6 are the --

7 --o0o--

8 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

9 -- medical trend and the increase in pharmacy  
10 costs, which total about 6.88 percent to the premium  
11 increase. PERS Gold had a very large increase due to high  
12 utilization and costs. The medical costs in 2021 was 21  
13 percent higher than 2020. For PERS Platinum last year, we  
14 spent approximately \$50 million of surplus reserves to buy  
15 down that 2022 premium. The snapback of the premium -- of  
16 the buydown contributed 2.66 percent to the total PPO  
17 premium increase.

18 I'll note here that the PPO Basic plan premiums  
19 include surcharges, two percent for Platinum, and three  
20 percent for Gold. These are necessary to start  
21 replenishing the Health Care Fund. There are no  
22 surcharges in the Medicare supplement PPO plans, Gold or  
23 Platinum, since they do not have a deficit and therefore  
24 don't need to replenish the reserve.

25 Don will talk at the end of this presentation

1 about challenges facing the PPO products and how we  
2 propose to address them.

3 --o0o--

4 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

5 Here we show the 2023 premium -- preliminary  
6 premium levels for each of the basic plans together as a  
7 portfolio. As you can see, there's still a variation in  
8 price points.

9 --o0o--

10 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

11 Okay. Moving on. Now, I'll go through each of  
12 the Medicare Advantage and Medicare Supplement plans.

13 --o0o--

14 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

15 Anthem Medicare Preferred is a statewide plan  
16 with a small enrollment. Anthem Medicare Preferred has a  
17 \$413.59 premium, a 14.83 percent increase over 2022.  
18 Looking at the cost drivers, medical is within reasonable  
19 range. The majority of the increase is due to the 2022  
20 snapback of almost 10 percent from last year's buydown of  
21 \$1.8 million. As a reminder, Medicare plans are not  
22 included in CalPERS risk mitigation.

23 --o0o--

24 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

25 Blue Shield Medicare is a new Medicare Advantage

1 Plan in 2022 with 591 lives. They have a \$361.96 premium  
2 with 2.49 percent increase over 2022.

3 Kaiser Senior Advantage has a \$283.25 premium, a  
4 6.37 percent decrease from 2022. Kaiser is showing a  
5 medical increase for 2023. They also administered their  
6 own pharmacy and are showing a pharmacy decrease.

7 --o0o--

8 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

9 Kaiser Senior Advantage Summit is a new plan that  
10 offers a \$0 copay for most services. This plan has a  
11 preliminary premium of \$336.29. The roughly \$53 premium  
12 difference between the existing Senior Advantage product  
13 and this new product is the copay reduction. This plan  
14 has a copay for emergency room pharmacy, acupuncture, and  
15 chiropractic visits. Summit is not available out of  
16 state.

17 --o0o--

18 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

19 Sharp Direct Advantage is proposing \$249.79  
20 premium, a 5.33 percent decrease. This product was  
21 introduced in 2021 and has 170 lives.

22 --o0o--

23 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

24 UnitedHealthcare Group's Medicare Advantage has a  
25 \$299.68 premium, an increase of 1.7 percent. On the cost

1 drivers chart, the reduction in medical is due to an  
2 increase in the CMS revenue. UHC Medicare Advantage self  
3 administers their pharmacy. Their pharmacy trend  
4 contributed 3.89 percent to the premium increase.

5 --o0o--

6 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

7 UHC Medicare Advantage Edge has \$357.50 premium,  
8 a 3.02 percent increase, UHC Edge is new in 2022. Again,  
9 like many of these new plans, they face volatility for the  
10 first few years because there's no experience to project  
11 costs.

12 --o0o--

13 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

14 Western Health Advantage has a \$331.11 premium,  
15 an increase of 5.13 percent. MyCare Select is another new  
16 plan for 2022. It's also a very small plan with 57 lives,  
17 and so again it's difficult to project costs.

18 --o0o--

19 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

20 After the transition from three to two PPO  
21 Medicare Supplement plans, the majority of the PPO  
22 Medicare members are concentrated in the PERS Platinum  
23 plan. The PERS Gold PPO Medicare has an increase of 4.05  
24 percent. PERS Platinum has an increase of 9.97 percent.  
25 Overall, the 2023 increase is mainly due to high pharmacy

1 increase and the snapback from the 2022 buydown.

2 Last year, we spent 23.8 million to buydown PERS  
3 Platinum Medicare Supplement premium. In addition, we  
4 spent 3.7 million to buy down the PERS Gold Supplement.

5 For 2023 there's roughly a \$27 difference  
6 between -- in premiums between these two plans. And  
7 again, as I stated earlier, there's no surcharges for  
8 Medicare Supplement PPO, Gold or Platinum. The benefits  
9 for these plans are similar and they both have the same  
10 network. PERS Platinum Supplement has slightly richer  
11 benefits for hearing aids and skilled nursing. It's also  
12 available out of state where PERS Gold Medicare Supplement  
13 is not.

14 --o0o--

15 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

16 Here, you'll see the 2023 Medicare premiums,  
17 which range from \$250 to \$420.

18 --o0o--

19 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

20 For next steps, the CalPERS team will finalize  
21 the premium amounts. In July, we'll present you final  
22 premiums for Board approval. The 2023 health premiums  
23 will be effective on January 1st, 2023.

24 And this concludes my portion of the  
25 presentation. I'd like to thank the rate teams for

1 their -- a lot of hard work, Actuarial Office, Public  
2 Affairs, and the Health team.

3 And I'm going to now turn it over to Don who's  
4 going to discuss challenges facing our PPO products.

5 CHIEF HEALTH DIRECTOR MOULDS: Mr. Chair, you  
6 want to take a break and take questions or should we go in  
7 and take questions after.

8 CHAIRPERSON FECKNER: That's up to you. How do  
9 you want to do it?

10 CHIEF HEALTH DIRECTOR MOULDS: I've kept this a  
11 little shorter, so why don't we do it that way, and then  
12 we can go into questions.

13 So as Kim mentioned, the challenges we're  
14 seeing -- microphone okay?

15 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:  
16 Um-hmm.

17 CHIEF HEALTH DIRECTOR MOULDS: Okay. Great.

18 As Kim mentioned, the challenges we're seeing  
19 with the rates this year are almost entirely driven by our  
20 PPO products, by our two basic PPO products in particular.  
21 Increases in our HMO rates and our other managed products  
22 are much more modest. When we take snapback out of our  
23 HMO rate, which as Kim mentioned is the right way of  
24 looking at actual premium inflation, it drops from 4.42  
25 percent to right around 3.7 percent. That's about half of

1 the projected national average for premium inflation. And  
2 as Kim noted, our Medicare Advantage products are getting  
3 cheaper again this year.

4 The investments that you've made in some of the  
5 narrow network products, Trio and Harmony, but also  
6 Western Health Advantage, Sharp, and Salud y Más are also  
7 starting to pay dividends. The same seems to be true of  
8 our new MA products, which are creating positive  
9 competitive dynamics in our Medicare market.

10 Our drug spending is also coming in line for  
11 2023. For Medicare pharmaceutical inflation is running a  
12 very modest three percent and for the Basic program, it's  
13 basically flat.

14 The PPO is obviously a very different story. As  
15 Kim said, the rate increases we've seen over the last few  
16 years, and this year in particular, are unsustainable.  
17 We're particularly focused on the PERS Gold product, which  
18 for 2023 will still be among the lower cost plans, but  
19 going forward will not be, if we don't take decisive  
20 action in the coming year.

21 The other big challenge facing the PPO is the one  
22 that we talked about with you in April. We ran a large  
23 deficit for 2021 caused by a confluence of much higher  
24 than anticipated medical costs, which were primarily COVID  
25 related, higher than expected drug costs, and investment

1 losses.

2           The steps we're going to need to take with  
3 respect to the PPO involve both near term and longer term  
4 interventions. What I'd like to do is walk you through  
5 those.

6           With the 2023 rates, our goal is generating  
7 enough premium revenue to start replenishing our HCF  
8 reserves and adequately fund our 2023 outlays for the two  
9 PERS PPO products. As we've talked about, it's essential  
10 that we set rates high enough to do these things, because  
11 the HCF fund is critically low and we always need enough  
12 money in that account to pay our bills.

13           When we briefed you back in April, I talked about  
14 a few different options that we planning on exploring that  
15 could help address some of the challenges facing our PPO  
16 products.

17           One was stop-loss insurance, which we were  
18 hopeful could help mitigate some of the risk we were --  
19 were we to see large medical losses in the future.  
20 Another was conversion of our PPO to a fully insured  
21 product or to a flex funded product like most of our HMOs.  
22 Both were also attractive because having them in place  
23 would have dramatically reduced our reserving  
24 requirements. Unfortunately, our analysis is that neither  
25 of those is a good option for us.

1           Our near-term strategy for addressing the  
2 challenges facing the Basic PPO are embedded in the  
3 premiums we are bringing you today, which are neither  
4 conservative nor aggressive. They're priced at exactly  
5 what we anticipate will be our costs. In developing them,  
6 we worked with both Anthem and our outside consultant  
7 Milliman. However, on top of the premiums, we have  
8 included surcharge, which we propose having in place for  
9 five years. That allows us to slowly build up our  
10 reserves over that period of time until they are fully  
11 replenished in 2027. The surcharge is roughly two  
12 percent -- is roughly three percent of PERS Gold premium  
13 and two percent of PERS Platinum. The hope is that once  
14 the costs stabilize, we may be able to drop the surcharge  
15 sooner.

16           We modeled a lot of different options before  
17 landing on the five-year replenishment strategy and our  
18 analysis leads us to believe that it's the best option.  
19 On the one hand, we need to start replenishing the  
20 reserves as quickly as possible, and ideally we'd like to  
21 be back to full reserves in a period of time shorter than  
22 the five year schedule we're proposing today.

23           However, we don't want to raise premiums more  
24 than we absolutely have to and we also need to be careful  
25 when we raise premiums for PERS Gold, in particular,

1 because if we raise them too much, we're going to see  
2 attrition.

3           In modeling various scenarios, our actuaries have  
4 projected that the current premiums, including the  
5 surcharge, will result in attrition numbers that are on  
6 the high for the normal range of members who leave in any  
7 given year, but not high enough to have addition --  
8 additional material impact on our premium. Other shorter  
9 time frames for replenishment likely would cause an  
10 additional material impact on premium.

11           As I said, the other critical task is curbing  
12 cost growth going forward. Our plan in the coming months  
13 is to develop benefit design options that we will be  
14 bringing you in September and then again for potential  
15 adoption in November.

16           During this period, we'll also engage  
17 stakeholders. The overall goal is going to be to keep  
18 PERS Platinum as affordable as possible and to keep PERS  
19 Gold in line with the cost we see in our low cost HMO  
20 products like Trio and Harmony.

21           In addition to the intense work on rates over the  
22 last few months, we've been reaching out to national  
23 groups with deep expertise in this space. As always, our  
24 aim is going to be to bring you options that connect our  
25 members with high value services and that minimize cost

1 shifting.

2           That in -- that concludes my comments about the  
3 challenges facing the PPO and gives you a picture of our  
4 plans for addressing them. I'm sure you have questions,  
5 which we're happy to address now.

6           CHAIRPERSON FECKNER: Thank you, Mr. Moulds and  
7 Ms. Malm. I first want to start off by thanking you and  
8 your team, the whole team, that worked on this this year.  
9 It's never an easy process. We understand that, but I  
10 think you've done a yeoman's job in getting us to where we  
11 are. And I just want to thank each and every one of you  
12 and your team for all the dedicated hard work.

13           At the same time, I also need to say since last  
14 year at this time I did call out United for needing to  
15 have sharper pencils, at the same time I think I also need  
16 to recognize the fact that they did sharpen their pencils,  
17 and they heard what we had to say last year and they came  
18 back with a better price. I always wish all of the funds  
19 came back with better prices. But that being said, they  
20 did a good job and I want to recognize that. Puts them  
21 below Kaiser. I think Kaiser needs to get back to work.

22           So at this point, I'm going to call on Ms.  
23 Taylor.

24           COMMITTEE MEMBER TAYLOR: Yes. Thank you, Mr.  
25 Chair. And thank you, Kim and Don, for the presentation.

1 As always, you guys do such a job to make sure you get us  
2 to the best rates we can get to.

3 I will echo what Chair Feckner just said, which  
4 is we got United to listen to us and maybe next year we  
5 get Kaiser to listen to us a little better. They did a  
6 little better, I will say, but it always can be better.

7 And I just want to repeat some of the stuff that  
8 I talked about earlier. For -- one thing I want to make  
9 sure is why we -- so Ms. Malm, could you, for our members,  
10 answer why we don't include the Medicare Advantage  
11 programs in the risk adjustment?

12 CHIEF HEALTH DIRECTOR MOULDS: Medicare is  
13 already risk adjusted by Medicare.

14 COMMITTEE MEMBER TAYLOR: Thank you. That's -- I  
15 just wanted that addressed in public. And I just wanted  
16 to kind of go back on the risk mitigation. We're in the  
17 final year, right? So this will be the last time we see  
18 this large risk adjustment, one way or the other, correct?

19 CHIEF HEALTH DIRECTOR MOULDS: That's correct.

20 COMMITTEE MEMBER TAYLOR: Okay. And then the  
21 snapback. We're not doing any of the buybacks right now,  
22 so --

23 CHIEF HEALTH DIRECTOR MOULDS: We will not see  
24 snapback next year.

25 COMMITTEE MEMBER TAYLOR: Right. And so this

1 will be kind of a whoo for next year.

2 CHIEF HEALTH DIRECTOR MOULDS: Yeah. I mean,  
3 it's not for great reasons obviously.

4 COMMITTEE MEMBER TAYLOR: Right.

5 CHIEF HEALTH DIRECTOR MOULDS: But it will be --  
6 it will not be part of the equation next year, because  
7 we're not anticipating buying back Premiums.

8 COMMITTEE MEMBER TAYLOR: Okay. And I'm not  
9 sure, but I just feel like maybe we shouldn't be doing  
10 that, if that's going to cause us this kind of contention.

11 CHIEF HEALTH DIRECTOR MOULDS: Yeah. And I will  
12 say that when we -- when we come to you with -- at -- to  
13 begin the discussion about the five-year HMO procurement,  
14 whether flex funding as we do it or -- or just period is  
15 one of the things that we're going to want to be talking  
16 about.

17 COMMITTEE MEMBER TAYLOR: Great, yes, because it  
18 seemed like it was a little bit -- you know, every time we  
19 do that, right, we buy down those rates, we feel like,  
20 okay, pat ourselves on the back, because we got those  
21 rates down, but now we see result of that, right, so --

22 CHIEF HEALTH DIRECTOR MOULDS: Yeah. They do  
23 increase volatility year over year, as -- you know, as  
24 we've talked about in the past, when you buy back  
25 premiums, you artificially lower the base, which is a good

1 thing --

2 COMMITTEE MEMBER TAYLOR: Right.

3 CHIEF HEALTH DIRECTOR MOULDS: -- but then in the  
4 coming year, unless you buy back at least as much, you see  
5 snapback in the rates. The rate increases is artificially  
6 higher.

7 COMMITTEE MEMBER TAYLOR: Right, which, yeah,  
8 makes it harder for all of us.

9 And then I wanted to talk about one of our  
10 low-cost plans. As my -- as my members look at these kind  
11 of plans -- I want to make sure I'm on the right page  
12 here. I think it's Harmony. And let me get there. Hold  
13 on. Yeah. So it is -- oh, I'm sorry. It's Health Net  
14 Salud y Más. And I just wanted to mention that while the  
15 cost drivers of this increase of this almost 30 percent  
16 increase, I understand are the risk mitigation -- the main  
17 cost drivers, the risk mitigation and the snapback. I  
18 just want to remind everybody hopefully that's it, because  
19 this is one of our low cost plans for folks in the area  
20 that -- that this plan serves, and having a \$200 increase  
21 is huge for these folks. So I just want to make sure that  
22 that is not an ongoing problem that we see in the future.

23 And then also we had some medical costs. And if  
24 you guys could go a little more deeper into some of  
25 those -- not -- not just for health -- not for that

1 particular one, but for a lot our plans, we had high  
2 medical costs. And I know that you guys had explained  
3 some of the reasons for that. If you guys would go into  
4 that a little bit, high medical costs on most plans, where  
5 they're were rate increases.

6 CHIEF HEALTH DIRECTOR MOULDS: Yeah. Do you want  
7 to jump in or?

8 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

9 That was, I think, earlier in my presentation,  
10 talking about the COVID impacts that we saw.

11 COMMITTEE MEMBER TAYLOR: Right. Right.

12 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

13 And then we saw that the members came back and  
14 did non-COVID activities. I'm sorry, like  
15 non-necessary --

16 COMMITTEE MEMBER TAYLOR: I know what you're  
17 talking about.

18 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

19 I'm saying the words wrong. I'm saying it wrong.

20 But non-COVID related medical expenses, such as  
21 knee, hip surgeries and after the 2022 surge -- 2020  
22 surge. So the increases for this next year show COVID and  
23 non-COVID services.

24 COMMITTEE MEMBER TAYLOR: And then the year  
25 before the increase with COVID had to do with no services

1 except COVID.

2 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:

3 Right, and COVID. Yes And the alpha of COVID  
4 that Don talked about.

5 CHIEF HEALTH DIRECTOR MOULDS: Yeah. We saw --  
6 in 2020, we saw -- certainly saw COVID costs, but we saw  
7 an associated decrease in the use of normal medical care.  
8 So part of that was the cancellation of elective surgeries  
9 to make space in hospitals for people with COVID. Part of  
10 that was apprehension on the part of our members to get  
11 medical care. We saw, as we talked about in the past, a  
12 pretty dramatic increase in the use of telehealth, which  
13 in the early days, and I think -- I think still to a  
14 certain extent does a nice job of replacing, in some  
15 instances, and not such a great job in others, as we are  
16 talking on an ongoing basis about how to lean into and  
17 take advantage of telehealth. We're parsing a lot of that  
18 out.

19 But in 2021, which is the most important year for  
20 this rate buildup. When we build up rates, we look at the  
21 last full year primarily, that was 2021, we had -- we had  
22 two COVID surges --

23 COMMITTEE MEMBER TAYLOR: Right.

24 CHIEF HEALTH DIRECTOR MOULDS: -- Delta and then  
25 the first part of Omicron. And then the second thing that

1 happened was we had people returning in much higher  
2 numbers. That was unanticipated by the actuarial  
3 community. So in -- you know, in alpha, that as I said,  
4 with an increase in COVID treatment, there was a  
5 corresponding decrease in normal care. Hospitals became  
6 much more sophisticated at being able to treat people  
7 without COVID and not to have to cancel elective  
8 surgeries. People were coming back after a year of living  
9 with COVID. They needed to get preventative care. Their  
10 tolerance for the risk associated was higher, because they  
11 understood that the health -- the health community was  
12 doing a better job of protecting them and so forth. So  
13 that's -- that's what you're seeing in some of the medical  
14 side is that piece of it.

15           Going forward, we do not -- as Kim mentioned, we  
16 do not anticipate COVID being an additional cost driver,  
17 so the strains have become increasingly less harmful,  
18 which is nothing that we can completely bank on, but is  
19 definitely a positive trend. Treatments have gotten  
20 better. More people have become -- gotten vaccinated and  
21 more people have had the disease. So that's bearing on  
22 it. We did inherit some new mandates with respect to  
23 testing, so we are paying for basically all of the testing  
24 right now, which is a cost driver. The net effect on  
25 premium growth is pretty close to flat.

1 COMMITTEE MEMBER TAYLOR: Okay.

2 STRATEGIC HEALTH OPERATIONS DIVISION CHIEF MALM:  
3 Great. But the answer to Salud y Más, there will  
4 not be a snapback and there will not be risk mitigation.  
5 That was about 25 percent out of their 29.88 percent  
6 increase, that will not be there next year.

7 COMMITTEE MEMBER TAYLOR: Actually, it was a  
8 little more than that it looks like, but, yeah I  
9 appreciate that. I just want to get that out there. I  
10 also look forward to the conversation regarding how we  
11 move forward with our PPO plans. But again, I want to  
12 thank you very much. If you think you can get any better  
13 rates before we come back in July, I encourage you to do  
14 that.

15 CHIEF HEALTH DIRECTOR MOULDS: We will keep  
16 trying until the bitter end.

17 COMMITTEE MEMBER TAYLOR: I appreciate it. Thank  
18 you very much.

19 CHIEF HEALTH DIRECTOR MOULDS: Yep.

20 CHAIRPERSON FECKNER: Thank you.

21 Ms. Greene Ross.

22 ACTING COMMITTEE MEMBER GREENE ROSS: Yes. Thank  
23 you, Mr. Chair.

24 So I understand very much the difficulties of  
25 negotiating with this many variables up in the air all the

1 time. And you guys work really hard. And I'm very  
2 impressed year after year at the hard work that you put  
3 into this. And I just wanted to ask, I know that it was a  
4 huge help, the renegotiated Optum contract with the  
5 pharmaceutical rates. Do you have any update on the  
6 State-coordinated effort to do pharmaceutical purchasing  
7 or production you mentioned a couple months ago.

8 CHIEF HEALTH DIRECTOR MOULDS: Yeah. Yeah, and  
9 that's a -- that's a really exciting development. So the  
10 Governor has put I think it's \$100 million, yep, into the  
11 budget for this year to build a manufacturing site in  
12 California to manufacture generic insulin. It is the --  
13 it would be the first step in a -- in an initiative that  
14 he identified when he came in, which is generic  
15 manufacturing to try to bring prices in the generic space  
16 down.

17 Insulin is -- is both a great and a challenging  
18 first target. So it's great because -- because we have so  
19 many people who depend on insulin and the prices in  
20 insulin have continued to rise dramatically, so it makes  
21 sense to put your cards there. Insulin is also more  
22 complicated than some other generic drugs to manufacture.  
23 It's something sort of between -- I think the way that Dr.  
24 Logan has described it in the past sort of between a drug  
25 and a biologic.

1 (Laughter.)

2 CHIEF HEALTH DIRECTOR MOULDS: And -- but that  
3 seems to be moving forward, you know, assuming again the  
4 money -- the budget still needs approval. But if that is  
5 successful, the intent is that they would do more of that.  
6 I've already begun discussions with OptumRx to kind of put  
7 them on notice that if the State is able to do this  
8 successfully, that we need to amend our contract to make  
9 sure that we can take full advantage of that.

10 ACTING COMMITTEE MEMBER GREENE ROSS: That's  
11 wonderful.

12 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

13 ACTING COMMITTEE MEMBER GREENE ROSS: And that's  
14 also wonderful because I know you and I have talked on  
15 about the biosimilars and generics aren't as well  
16 regulated and a lot of them are produced outside this  
17 country so another also positive of that, so that's great  
18 news.

19 Thank you. Hopefully it gets passed.

20 CHIEF HEALTH DIRECTOR MOULDS: Yep.

21 CHAIRPERSON FECKNER: Thank you.

22 Mr. Pacheco.

23 COMMITTEE MEMBER PACHECO: Thank you. Thank you,  
24 Chairman Feckner.

25 First of all, thank you, Don, and thank you, Kim,

1 for your presentation. I really again really enjoyed  
2 listening to your presentation and providing this is very  
3 important and timely information. My question is -- first  
4 of all, just more of a comment and then a -- then a  
5 question. I noticed that in the health care premium  
6 trends, the trend of the Basic HMO being 4.2 versus the --  
7 you know, the trend of the national, which is 7.11, which  
8 is obviously below, which is really good for us. And, you  
9 know, again you alluded earlier about the Basic PPO being  
10 unsustainable in terms of the trends. And Medicare  
11 Advantage being very -- being negative versus the other  
12 national trend being 4.8, and the Supplemental being  
13 higher than the -- than the trend.

14 And my question is is, do you feel that because  
15 of inflation, medical inflation, and we recently had -- as  
16 I think of last Friday, we had a -- the labor -- labor  
17 people sent out the information it was 8.6 percent. Do  
18 you think that because of the inflation issue and supply  
19 chain issues that are going on in the economy that we may  
20 still see this and this inflation may still be an  
21 influencer -- a cost influencer moving forward do you --

22 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

23 Inflation -- general inflation will absolutely be an  
24 influencer, as well a tight labor market. I think it is  
25 hard to read the paper on any given day and not hear

1 about -- about health care worker burnout. And, you know,  
2 those folks have been through the ringer over the last  
3 couple of years. And in a tight labor market, you have to  
4 anticipate that labor costs are going to go up, if they're  
5 going to be successful in retaining that workforce.  
6 Material costs are also going up across the board. And  
7 all of that affects the cost of delivering health care  
8 service. So, you know, medical inflation is -- in its  
9 relate to general inflation is not perfectly linear.

10 COMMITTEE MEMBER PACHECO: Um-hmm.

11 CHIEF HEALTH DIRECTOR MOULDS: But yes, those  
12 costs certainly will factor in for the next couple of  
13 years or for however long it takes to rein in inflation.

14 COMMITTEE MEMBER PACHECO: So in your opinion we  
15 would still kind of anticipate that cost influencer  
16 over -- over this?

17 CHIEF HEALTH DIRECTOR MOULDS: Yeah. I mean  
18 we're seeing it -- we're seeing some of that in the 2023  
19 rates, because it's anticipated already.

20 COMMITTEE MEMBER PACHECO: So just given that  
21 because -- let's say for the instance that COVID, as  
22 mentioned earlier, because we're getting new variants and  
23 it's getting more -- where we're getting more under -- we  
24 have a better understanding of it, this could be -- this  
25 could still be an influencer. And then my other question

1 is it's not -- it doesn't relate to this, but it's just --  
2 with respect to the Kaiser Permanente -- Perma -- Kaiser  
3 Permanente Senior Advantage Summit, that's going to be  
4 offered across -- is it going to be offered across all  
5 areas where Kaiser is located?

6 CHIEF HEALTH DIRECTOR MOULDS: Within the state.

7 COMMITTEE MEMBER PACHECO: Within the state --

8 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

9 COMMITTEE MEMBER PACHECO: -- but not out of  
10 state, correct?

11 CHIEF HEALTH DIRECTOR MOULDS: Yes, that's  
12 correct

13 COMMITTEE MEMBER PACHECO: And do you anticipate  
14 many members to enroll in this in the 2022 period or is it  
15 going to be a gradual thing?

16 CHIEF HEALTH DIRECTOR MOULDS: Yeah. That's an  
17 question. We don't know is the short -- is the short  
18 answer unfortunately. You know, the premium is a little  
19 bit higher.

20 COMMITTEE MEMBER PACHECO: Right.

21 CHIEF HEALTH DIRECTOR MOULDS: It also -- you  
22 know, it's -- it's leaned into some strategies that --  
23 that are -- make it potentially more attractive to some of  
24 our Medicare members, so -- and the cost sharing is lower.  
25 So, you know, we're watching these -- these low cost share

1 plans and the plans that have leaned into the supplemental  
2 benefits very closely. We are going to continue  
3 monitoring our own data over the short and the longer  
4 term, both to look at how those products affect costs and  
5 ultimately, over the longer term, how they affect  
6 outcomes.

7           You know, the strategy with the supplemental  
8 plans and some of the supplemental benefits as we've  
9 talked about before is improving health. And those were a  
10 bet by CMS that paying for things like nutritional meals  
11 after hospital discharge or rides to physician's office  
12 are going to, in the long term, not only increase health  
13 care for Medicare members, but also save costs, because  
14 they avoid readmissions in the case of nutritional meals,  
15 or hospitalizations in the -- in the case of  
16 transportation to preventative care.

17           So we're monitoring that closely, we will over  
18 time, to make sure that those plans are performing the way  
19 that we anticipate them planning, but we do anticipate  
20 migration of members into those plans, because of the  
21 benefits. And we're hopeful that that will be something  
22 that is good for both CalPERS bottom line and good for our  
23 members.

24           COMMITTEE MEMBER PACHECO: Well, I was -- I was  
25 impressed ed by the zero -- the \$0 copay for most -- most

1 services. That was very impressive. Thank you very much.

2 CHAIRPERSON FECKNER: Thank you.

3 Mr. Rubalcava.

4 VICE CHAIRPERSON RUBALCAVA: Thank you. Rob and  
5 team, Kim, excellent job. I really look forward, as we  
6 move forward, I know the rates are not what everybody  
7 ex -- we'll see as advantages, but I do see it very  
8 official that we're finally at a point where we plateaued  
9 and these are, to use your term, fully priced, meaning the  
10 price that we're -- it's justified. It's based on the  
11 design and the risk that the plan carries with it.

12 We do have work to do on the PPO, but I'm looking  
13 forward to -- and I would ask that we work with the  
14 carriers on some sort of materials for open enrollment  
15 that will sort of promote what the plans are, especially  
16 the HMOs, what they can deliver in connecting with your  
17 primary care physician, providing preventive care for  
18 those that are healthy or keep from healthy, and if they  
19 have chronic disease, that they address that to either  
20 maintain their health status or improve it as much as  
21 possible, because until we can -- we're able to move a  
22 little bit of that behavior, we cannot -- we can always --  
23 not always -- there will not always be a silver bullet of  
24 a pharmacy drug that would reverse something that's  
25 already happened.

1           So we -- we have responsibility to make sure that  
2 we provide affordable and accessible health care and I'm  
3 glad we're moving in that direction. I look forward to  
4 your presentation in September and the Board's action in  
5 the following months.

6           Thank you very much. Thank you for your good  
7 work.

8           CHAIRPERSON FECKNER: Thank you.

9           Seeing no other requests, we do have a couple of  
10 commenters from public. So I first call on Mr. Woodson.

11          MR. WOODSON: Hello. Testing. Yeah.

12          Masks and hearing aids don't go well together.

13          (Laughter.)

14          MR. WOODSON: I apologize.

15          Okay. Larry Woodson, California State Retirees.  
16 Chairman Feckner and Board members, thank you for the  
17 opportunity to comment today.

18          At the stakeholders, we had the opportunity -- in  
19 break-out session this morning, we had an opportunity to  
20 review these rates earlier and discuss them with the  
21 staff. And Kim Malm gave a good overview and answered our  
22 questions. My initial take on these tree preliminary  
23 rates is that they are on average not too unreasonable,  
24 but there are a few individual plan premiums that are.

25          One Basic plan, Anthem Blue Cross Select increase

1 seems unreasonably high at 6.58 percent with most due to  
2 increased medical costs. And I would point out that  
3 Anthem had huge profits in 2021, \$6.1 billion, third  
4 highest of all the carriers. And I understand CalPERS  
5 doesn't consider overall profits, but we see that, and --  
6 but just comparing their increase to the other 11, they're  
7 significantly higher. And also with their Medicare  
8 Advantage plan, it's even worse at 14.83 percent. It's  
9 almost triple the next highest plan increase. So -- and  
10 compared to Kaiser Senior Advantage. They're decreasing  
11 6.37 percent in the same population of elderly. So, you  
12 know why?

13           Kaiser HMO also stems out, as the Chairman  
14 pointed out, with a 5.92 percent. I hope, as in year's  
15 past, these will come down somewhat in July. The PPO  
16 plans are disproportionately high. I understand. We'll  
17 be interested in hearing more about the plans to address  
18 this in the future and give input.

19           In new just yesterday, the Federal Trade  
20 Commission announced they're beginning an investigation of  
21 OptumRx and five other major PBMs for their business  
22 practices, which they feel drives drug costs much higher  
23 than they should be. So this may have an effect on  
24 lowering drug costs.

25           So, in conclusion, I'm going to be commenting at

1 5c on the Medicare ACO REACH privatization, that's already  
2 been implemented. And it affects, and will affect, and is  
3 affecting many CalPERS retirees who have been moved into  
4 this program without their consent. Unfortunately,  
5 CalPERS has no easy way of knowing who or how many have  
6 been moved. And we're -- it's somewhat up in the air how  
7 this may affect premiums as well.

8 So more from me on that later.

9 Thank you.

10 CHAIRPERSON FECKNER: Thank you.

11 Mr. Jelincic.

12 MR. JELINCIC: J.J. Jelincic, RPEA.

13 The rates are too high. Shouldn't shock anybody.  
14 I've said that for years and I think everybody recognizes  
15 it's true. It's also somewhat against my nature to defend  
16 Kaiser, but I would point out that absence the risk  
17 mitigation, their rate would have gone up three-tenths of  
18 one percent. What led to my desire to make a comment is  
19 we're being told that this is the last year of the risk  
20 mitigation. But if low cost plans no longer getting hit  
21 with surcharges, they're going to go even -- their  
22 relative position will drop. High cost plans won't get  
23 the subsidies. They will go up and it seems to me we're  
24 back where we started. So I'm really questioning whether  
25 risk mitigation is going away.

1           If the plan is to equalize the premiums, then  
2 we've got to do something to recognize the different cost  
3 structures and the different populations. You may want to  
4 go -- consider going back to your old risk mitigation,  
5 which focused on the health conditions of the population  
6 of the insured. I thank you.

7           CHAIRPERSON FECKNER: Thank you.

8           Mr. Teykaerts, I understand we have a phone  
9 caller

10           STAKEHOLDER STRATEGY MANAGER TEYKAERTS: Mr.  
11 Chair, that's correct. We have one call on the phone.  
12 David from SEIU, go ahead.

13           One moment.

14           MR. AGUINALDO: Hello, everyone. Can you hear  
15 me?

16           CHAIRPERSON FECKNER: We can barely.

17           MR. AGUINALDO: Yes.

18           CHAIRPERSON FECKNER: There you go.

19           MR. AGUINALDO: Wonderful. Yes. My name is  
20 David Aguinaldo. I am calling in from Chicago. I am part  
21 of the CDTEFA. I work in the Chicago district office and I  
22 am union steward for Unit 1 DLC799.

23           I am calling because I just wanted to make sure  
24 that it is noted that in out of state, there are three --  
25 around 300 employees. We have one choice for health

1 insurance and that is the PERS Platinum plan. And  
2 there -- so far as I know, there are no plans to offer  
3 anything else.

4 Over the course of the last four years, we've  
5 seen our premiums increase. So in 2020 our -- my personal  
6 portion of a two-person plan was \$351. Under the new --  
7 the new premiums that were announced today, my portion  
8 would increase to \$803 today. This year currently, I'm at  
9 591.56 is my contribution.

10 We have people who are -- you know, we have  
11 office techs in our office, we have tax auditors who are  
12 just starting, so we're -- you know, people sitting at  
13 around \$4,000 a month in gross pay who are being asked to  
14 pay, you know, \$800 for them and their spouse to be on a  
15 health care plan.

16 I'm trying not to cry in this moment, because  
17 I've had these conversations with my co-workers who are  
18 having difficulty paying their mortgage, because their  
19 health insurance premiums are so high. We don't have  
20 another option. I don't know what can be done to help  
21 this situation, but I have called CalPERS, the union,  
22 everyone try to make this more equitable. But as of right  
23 now, I still don't see a solution.

24 So I just wanted to make sure that that was on --  
25 that we're not forgotten, you know, over in -- out of

1 state. And again, we're looking at single payer -- you  
2 know, a single payer at Kaiser, their likely employee  
3 contribution will be 171, ours will be 402, so over  
4 double. Almost two and a half times the premium for our  
5 in-state counterparts.

6 That's all I have. Thank you.

7 CHAIRPERSON FECKNER: We appreciate your  
8 comments. Thanks for calling.

9 Mr. Moulds.

10 CHIEF HEALTH DIRECTOR MOULDS: Yeah. I just -- I  
11 really appreciate the call and wanted to just -- this is  
12 something that we have been focused on, particularly  
13 recently. You know, we do not have very many active  
14 members in particular who are -- who are living in other  
15 states, but we do have some. California has offices that  
16 are located in select other states. And for some of them,  
17 it is, in fact, the case that they only have one option,  
18 which is a platinum option. And that is the second  
19 highest plan in our portfolio.

20 We had a good conversation with New York State  
21 and our -- have conversations that we're looking forward  
22 to with some of the other states about the possibility of  
23 reciprocity in some of these states and piggybacking on  
24 their networks. It is a tricky business, potentially  
25 requiring statutory changes. But the thing that we landed

1 on that -- sort of next steps in New York that is  
2 potentially a model here is making that -- those networks,  
3 the networks that the state retirement organizations use,  
4 available somehow to our members. So it's a -- it is --  
5 this is a -- this is a legitimate problem and it's  
6 something for those folks that we're going to need to fix  
7 and something that I'm working with Rob Jarzombek to dig  
8 into at the moment.

9 CHAIRPERSON FECKNER: Very good. Thank you.  
10 Ms. Taylor.

11 COMMITTEE MEMBER TAYLOR: So I just want to make  
12 sure if there's a way that that caller can get my  
13 information, that would be awesome. I don't know if Mr.  
14 Teykaerts is even still listening. I'd be happy to  
15 provide that to the caller, because he's in my union, but  
16 I also would like to piggyback on this, because we --  
17 Franchise Tax Board, which is my agency, also has New  
18 York, Chicago, and Houston offices.

19 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

20 COMMITTEE MEMBER TAYLOR: They're small offices,  
21 but if you combine them with the CDTFA folks and everyone  
22 else, you know, we've got about three or four hundred  
23 people out of state. So I really app -- I did not know  
24 that you guys were looking into piggybacking on some of  
25 the retirees programs. That would be awesome, because

1 that's a ridiculously high price.

2 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

3 COMMITTEE MEMBER TAYLOR: So it takes --

4 CHIEF HEALTH DIRECTOR MOULDS: It is never -- it  
5 should never be the only option for anyone.

6 COMMITTEE MEMBER TAYLOR: Absolutely. And I hope  
7 that anybody else who's listening from out of state,  
8 please give me a call, if you're continuing to have these  
9 problems, so I can connect with you the right people and  
10 we can get you some answers.

11 CHAIRPERSON FECKNER: Thank you.

12 Seeing no other requests on this topic, again,  
13 thank you both, and both of your teams for putting this  
14 together. It was a lot of hard work and we appreciate the  
15 outcome, so thank you.

16 CHIEF HEALTH DIRECTOR MOULDS: Mr. Feckner, can  
17 I -- are we done with public comment or is there --

18 CHAIRPERSON FECKNER: No, we haven't gotten there  
19 yet.

20 CHIEF HEALTH DIRECTOR MOULDS: Okay. Then I will  
21 wait until the very end.

22 CHAIRPERSON FECKNER: Okay. All right.

23 Next item is 5b, Summary of Committee Direction.

24 Mr. Moulds, Mr. Suine, either one of you have any  
25 summary of Committee direction?

1 CHIEF HEALTH DIRECTOR MOULDS: I have -- I have  
2 two. The first one is to continue working with the plans  
3 between now and July to see if we're able to find  
4 additional decreases in premiums, and the second one is to  
5 continue looking into this issue of out-of-state networks  
6 and options.

7 CHAIRPERSON FECKNER: Very good. And I will add  
8 one more to your --

9 Mr. Moulds.

10 CHIEF HEALTH DIRECTOR MOULDS: And I'll do this  
11 now. I just wanted to take a second -- sorry,  
12 parliamentary procedure is not my specialty.

13 CHAIRPERSON FECKNER: It is mine, so I'll keep on  
14 talking.

15 CHIEF HEALTH DIRECTOR MOULDS: Well, good. Then  
16 we're in great company. I just -- I wanted to take a  
17 second and thank -- and I really appreciate you  
18 recognizing our team, but I wanted to take a second and do  
19 it as well. It is just a terrific team. They have worked  
20 very, very hard under very difficult circumstances, and it  
21 is just a joy to work with them. I want to -- I want to  
22 thank Diana Dooley, who is not here. She is in Belize  
23 celebrating her 50th wedding anniversary.

24 CHAIRPERSON FECKNER: Wow.

25 CHIEF HEALTH DIRECTOR MOULDS: But she has

1 gracefully came out of retirement to help us with some of  
2 the rates work and has been just a terrific addition to  
3 the team.

4 I especially want to thank Ms. Malm, who has  
5 taken on this role as a second job. She is continuing to  
6 lead her day job division and do this in her spare time.  
7 I have -- I have only the best things to say about her.  
8 She is, as you all know, as loyal as they come to CalPERS,  
9 and as dedicated as they come period. Smart as all be.  
10 And we would not have been able to get to this point  
11 without her. So thank you for taking on the extra work  
12 and for being such a wonderful colleague. And we're  
13 hoping that after we're done with this, she goes back to  
14 just one job.

15 (Laughter.)

16 CHAIRPERSON FECKNER: Thank you for our comments.  
17 But I will add one more to your list of Committee  
18 direction, not to preempt Mr. Woodson's comments coming  
19 up, but he did start on the comment, and we did read the  
20 letter that he sent to all of us. I would encourage you  
21 to put together some subject matter -- subject matter  
22 experts that you find to have value that are working on  
23 this process that he's going to talk to us about and have  
24 them at a future meeting, maybe in September or November,  
25 to come before us, so that we can hear from their

1 perspective the equation.

2 CHIEF HEALTH DIRECTOR MOULDS: Happy to do that.

3 CHAIRPERSON FECKNER: Thank you.

4 With that, we move on to 5c. Mr. Woodson, sorry  
5 to take some of your thunder, but I wanted to put that out  
6 there.

7 MR. WOODSON: Appreciate it.

8 Larry Woodson, California State Retirees again.

9 On Friday last week, as you mentioned, I sent  
10 emails to all Board members, CEO Frost, Mr. Moulds  
11 providing a report on CSR's findings regarding the dangers  
12 of Medicare direct contracting pilot, now rebranded as ACO  
13 REACH. It also reports the results of our meeting with  
14 Center for Medicare and Medicaid Services management  
15 staff.

16 Essentially, REACH has the same dangerous  
17 elements and will greatly expand the number of DCEs, now  
18 called ACOs, since CMS is allowing new Applications. My  
19 email included attachments, including, number one, CSR's  
20 letter to Secretary Becerra asking him to halt the  
21 program, two, the Washington Post article -- or opinion  
22 piece, which first made this known to the public, and then  
23 thirdly, a letter from one of our CSR CalPERS retirees  
24 that she received informing her that she was now part of a  
25 DCE. And then lastly, I sent the CMS list of 99 already

1 approved DCE's nationwide, a disproportionate 29 of which  
2 are in California.

3           And I recently discovered Sutter Health applied  
4 to become a DCE and was granted. And they have 11 -- 140  
5 primary care providers as DCE providers. They take all  
6 their patients with them against their -- well, without  
7 their knowledge.

8           CMS Center for Innovation implemented this  
9 program in 2020 in the last days of the Trump  
10 administration, which moves traditional Medicare enrollees  
11 into a direct contracting entity, DCE, without their  
12 knowledge or consent, and without Congressional oversight.  
13 The payment model for DCEs in REACH is similar to Medicare  
14 Advantage.

15           Instead of paying doctors and hospitals directly  
16 for care, Medicare gives the middleman, DCE or ACO,  
17 up-front money to cover a defined portion of each senior's  
18 medical expenses allowing the DCE to keep as profit what  
19 they don't pay for in care over the year. This  
20 incentivizes them to deny services, exaggerate diagnostic  
21 codes both in number and severity. This capitation  
22 practice has been identified in Medicare Advantage plans  
23 as resulting in billions of dollars, higher annual costs  
24 to the Medicare fund by MA plans over traditional Medicare  
25 fee for service.

1           Any type of company can and has applied to be a  
2 DCE, including commercial insurers, private equity  
3 companies, new start-ups, even dialysis centers. Thirteen  
4 of the 99 approved DCEs have little or no experience with  
5 Medicare beneficiaries. An analysis by two former doctors  
6 who are directors of CMS estimates that DCEs could spend  
7 as little as 60 percent on care and keep 40 percent  
8 overhead and profit. Both doctors oppose that program.

9           In conclusion, opposition to this program is  
10 gaining momentum. However, much more is needed since CMS  
11 is expanding it. A letter from CalPERS to present Biden  
12 and Secretary Becerra on behalf of CalPERS retirees on  
13 original Medicare could have a significant impact.

14           We hope you'll seriously consider this.

15           Thank you.

16           CHAIRPERSON FECKNER: Thank you.

17           All right. Seeing nothing else coming before the  
18 Committee, this meeting adjourned.

19           (Thereupon California Public Employees'  
20 Retirement System, Pension and Health Benefits  
21 Committee open session meeting adjourned  
22 at 2:18 p.m.)  
23  
24  
25

CERTIFICATE OF REPORTER

I, JAMES F. PETERS, a Certified Shorthand Reporter of the State of California, do hereby certify:

That I am a disinterested person herein; that the foregoing California Public Employees' Retirement System, Board of Administration, Pension and Health Benefits Committee open session meeting was reported in shorthand by me, James F. Peters, a Certified Shorthand Reporter of the State of California, and was thereafter transcribed, under my direction, by computer-assisted transcription;

I further certify that I am not of counsel or attorney for any of the parties to said meeting nor in any way interested in the outcome of said meeting.

IN WITNESS WHEREOF, I have hereunto set my hand this 21st day of June, 2022.

JAMES F. PETERS, CSR
