CalPERS

Artificial Intelligence in Health Insurance and Care Delivery

Summary of Discussion

This panel discussion will highlight Artificial Intelligence (AI) and the growing role it plays in health insurance and health care delivery. This discussion will present specific industry applications of AI and the potential benefits and risks they present to health care providers, CalPERS and its members. The presenters will also explore governance strategies for the responsible development and deployment of AI, as well as policy solution pathways for CalPERS to further consider and analyze.
