

One Voice, Big Impact: Strategic Alignment Across California's Public Purchasers

Summary of Discussion

The three large public purchasers in California together serve approximately 45% of Californians. This combined purchasing power has the potential to accelerate coordinated delivery system change to improve access, care, and affordability for our members and for all Californians. In this session, CalPERS Chief Medical Officer, Julia Logan will provide an overview of current and future opportunities for cross-purchaser alignment that helps to support our CalPERS strategic plan. The goal of the session is to update Board members about current alignment activities, including our aligned approach to quality and results on year one of our Quality Aligned Measure Set and to inform future CalPERS initiatives and strategies, including pharmacy and access.
