

Strengthening Your Cybersecurity Strategies in a New Age of Technology

Rachel Wilson, Wealth Management Chief Data Officer, Morgan Stanley

Rachel Wilson manages cybersecurity, fraud, data quality, and privacy risk for Morgan Stanley's Wealth Management business, with responsibility for protecting client data and preventing unauthorized access to client funds. She is a senior subject matter expert who regularly advises executive leadership and clients on the evolving cyber threat landscape and effective mitigation strategies. As Chief Data Officer, she leads Wealth Management's integrated approach to data governance, spanning information security, data quality, data privacy, and information management.

Prior to joining Morgan Stanley in 2017, Rachel spent 15 years at the National Security Agency (NSA) in senior executive leadership roles, including leading counterterrorism operations, serving as Chief of Operations in the United Kingdom, and directing high-risk cyber operations at scale. She has been recognized by Morgan Stanley as part of the MAKERS Class and was named a Top Woman in WealthTech by ThinkAdvisor.
