(PERF) Public Employees Retirement Fund. (ALM) Asset Liability Management. Affiliate Trusts: Legislators Retirement System, Judges Retirement System, Judges Retirement System II, Health Care Fund, Long-Term Care Fund, Supplemental Income Plans, California Employers Pension Prefunding Trust, California Employers Retirement Benefit Trust.

Affiliates ALM

Fund Overviews, Capital Market Assumptions, Candidate Portfolios and Management Recommendations

- Public Employees' Health Care Fund (HCF)
 - Legislators' Retirement System Fund (LRS)
 - Judges' Retirement System Fund (JRS)
 - Judges' Retirement System II Fund (JRS II)
- California Employers' Retiree Benefit Trust (CERBT)
 - California Employers' Pension Prefunding Trust (CEPPT)
 - Public Employees' Long-Term Care Fund (LTC)

Summary of ALM Recommendations

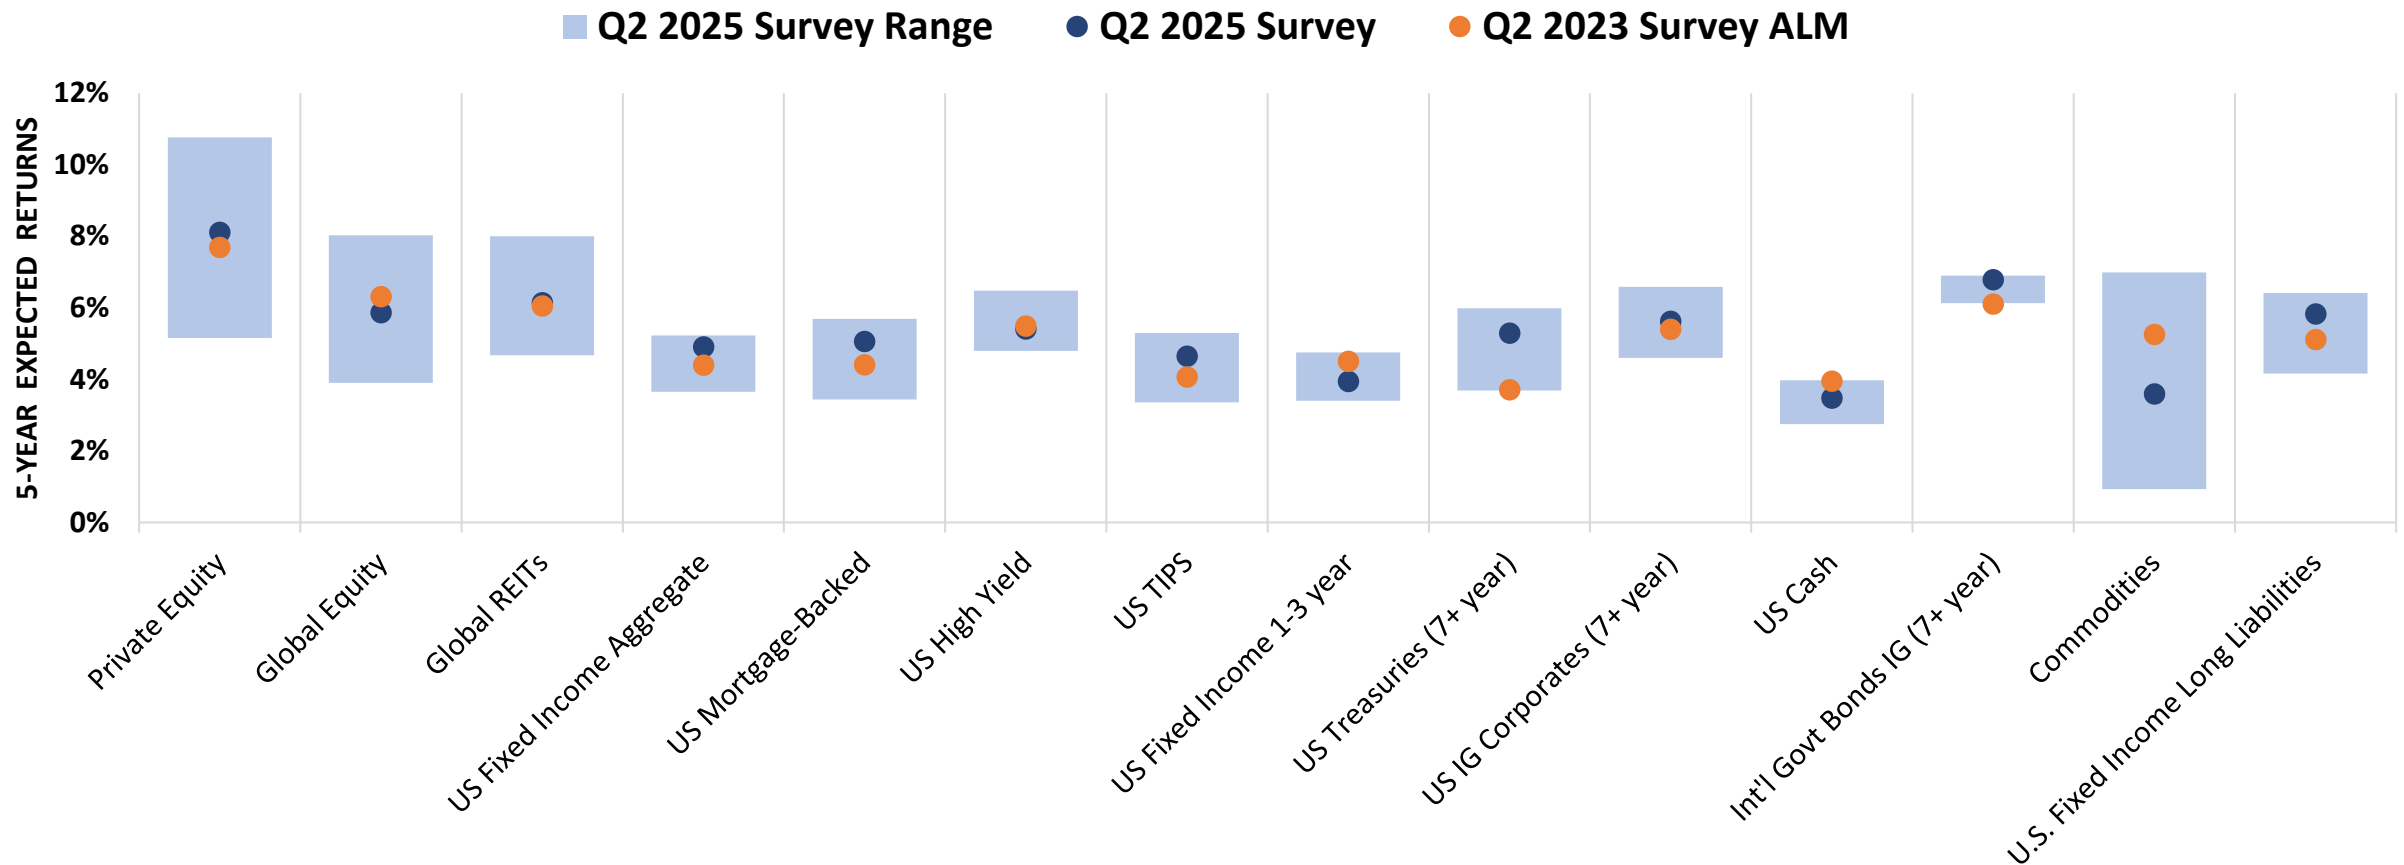

1. Adopt the Capital Market Assumptions
2. Approve the recommended portfolio for each Affiliate Fund as the Policy Portfolio:
 - HCF, JRS, JRS II, CERBT 1-3, CEPPT 1-2, & LTC: Current Portfolio
 - LRS: Candidate B (lower expected risk/return than Current Portfolio)
3. Approve the following benchmarks, as recommended by Wilshire:
 - Long-Term Care Fund: High Yield ex-CCC¹ & EM Debt ex-CCC¹
4. Approve inclusion of Private Equity for JRS II as an incubated investment strategy, not to exceed 5%²

¹ These benchmarks exclude lower quality credit bonds (CCC and below), which aligns with the portfolio implementation.

² Upon approval of private equity as an incubated investment, policy language will be presented in September and November (1st/2nd reads). No investments will be made until policy language is approved.

Capital Market Assumptions: 5-Year Returns

Modest increase across fixed income while equities have modestly decreased

Public Employees' Health Care Fund

Fund Overview

Established in 1997 as a reserve fund for CalPERS' self-funded health programs.

Conservative risk profile and investment strategy of 100% cash equivalents.

<p>AUM \$79 mn As of 12/31/25</p>	<p>Participants CalPERS As of 6/30/25</p>	<p>Status Open</p>
<p>20-year Performance 3.29%</p>	<p>5-year Performance (0.81)%</p>

Global REITs	-	
Commodities	-	
Liquidity	100%	2024 Midcycle
Expected Volatility	0.48%	0.44%
*Net Expected Return	3.45%	3.92%

Capital Market Assumptions: 20-Year Returns

Modest increase across fixed income while equities have modestly decreased

20-year CMA's are used for LRS, JRS, JRS II, CERBT, & CEPPT (details on page 24).
 CMA's are based on our quarterly survey of 15 CMA providers, including institutional consultants and asset managers.

Legislators' Retirement System Fund

Defined Benefit Fund Overview

Established in 1947 for members of the legislature elected prior to November 7, 1990, and elected constitutional and legislative statutory officers elected prior to December 31, 2012.

Conservative investment strategy and cash flow negative (~\$8mn per year)

*Net Expected Return	5.24%	4.65%	4.85%	5.05%	4.80%

Judges' Retirement System Fund

Defined Benefit Fund Overview

Established in 1937, this retirement system for eligible judges closed in November 1994. Unfunded 'pay-as-you-go' system from state's general fund with 2-3 months' reserve for benefit payments. Short-term cash investment strategy required.

<p>AUM \$56 mn <small>As of 12/31/25</small></p>	<p>Participants 1,573 <small>As of 6/30/25</small></p>	<p>Status Closed <small>1994</small></p>

Global REITs	20%
Commodities	3%
Liquidity	-
Expected Volatility	11.74%
*Net Expected Return	6.47%

Judges' Retirement System II Fund

Candidate Portfolios & Recommendation (Q2 2025 CMAs)

Recommendations:

- 1) Current portfolio - maintains a balanced allocation, supports long-term growth and the discount rate, and helps avoid portfolio turnover and associated costs;
- 2) Add private equity via incubation up to 5% (details on pages 16-19).

Asset Class	Current	Option A	Option B	Option C	Discount Rate 6.00%
Global Equity	43%	27%	38%	57%	
Fixed Income	29%	44%	33%	15%	
TIPS	5%	5%	5%	5%	
Global REITs	20%	20%	20%	20%	
Commodities	3%	4%	4%	3%	
Liquidity	-	-	-	-	2024 Midcycle
Expected Volatility	11.74%	10.09%	11.21%	13.41%	10.74%
*Net Expected Return	6.47%	6.35%	6.44%	6.54%	6.29%

Judges' Retirement System II Fund

Rationale for Adding Private Equity (PE)

PE exhibits a risk and return profile that is sufficiently different from existing public asset classes

Risk: Typically less liquid with higher idiosyncratic risk due to concentrated ownership and operational complexity

Return: Historically higher long-term returns than public equities, driven by active management, operational improvements, and access to unique growth opportunities

CMAAs (Q2 2025) show PE as the asset class with the highest expected return and Global Equity having the 2nd highest

Asset Class / Segment	5-Year Expected Return	20-Year Expected Return	20-Year Expected Volatility
Private Equity	8.1%	7.5%	22.7%
Global Equity	5.9%	6.6%	16.6%

Inclusion of PE can improve the expected risk and return of the total portfolio, potentially increasing long-term returns while reducing overall expected volatility through diversification

Judges' Retirement System II Fund

Adding Private Equity (PE) – Potential impact of 5% allocation

Optimizing the portfolio targeting the same risk achieves a slightly higher expected return by 8 basis points.

Asset Class	Current	Target Current Risk	Change from Current
Global Equity	43%	37%	-6%
Fixed Income	29%	30%	1%
TIPS	5%	5%	0%
Global REITs	20%	20%	0%
Commodities	3%	3%	0%
Private Equity	0%	5%	5%
Liquidity	0%	0%	0%
Expected Volatility	11.74%	11.74%	0%
*Net Expected Return	6.47%	6.55%	0.08%

Judges Retirement System II Fund

Rationale for Adding Private Equity

Diversification

New Exposures

Return Enhancement

Illiquidity Premium

Strategic Fit

Aligns with Fund Goals

Other Considerations

Young & Open Fund
Cash Flow Positive

Judges Retirement System II Fund

Private Equity Implementation via Incubation

When introducing a new asset class, incubation provides a flexible, controlled environment for innovation and risk management, as was done for Private Debt in the PERF.

The Process

Program Establishment

Establish opportunistic & innovation program in policy¹, then complete planning, strategy selection, contracting, operating model, and execution.

Implementation

Launch PE investments within an incubation fund, setting objectives, guidelines, and allocation limit (up to 5%).

Track Record Building

Leverage internal expertise, build manager relationships, establish performance history; assess impact on risk, return, and liquidity; refine processes.

Formal Allocation in ALM

Upon successful incubation, propose PE as a dedicated asset class in the ALM with Board approval.

California Employers' Retiree Benefit Trust

CERBT Fund Overview

Section 115 trust established in 2007 for employers to voluntarily pre-fund non-pension other post-employment benefits (OPEB). Employers can select from three strategies, depending on risk tolerance.

Current Allocation

Asset Class	Strategy 1 Moderately Aggressive	Strategy 2 Moderate	Strategy 3 Moderately Conservative

*Net Expected Return	5.80%	5.65%	5.75%	5.85%	5.36%

*Expected returns are geometric, based on 10-year returns (calculated from the surveyed 5-year and 20-year CMAs and compared to the 10-year survey returns for reasonability), and net of expenses of 0.25%. Expected volatility is the 10-year survey median.

California Employers' Pension Prefunding Trust

CEPPT Strategy 2: Conservative Candidate Portfolios & Recommendation

Recommendation: Current Portfolio - maintains a balanced allocation, supports strategy's conservative investment objective, and helps avoid portfolio turnover and associated costs.

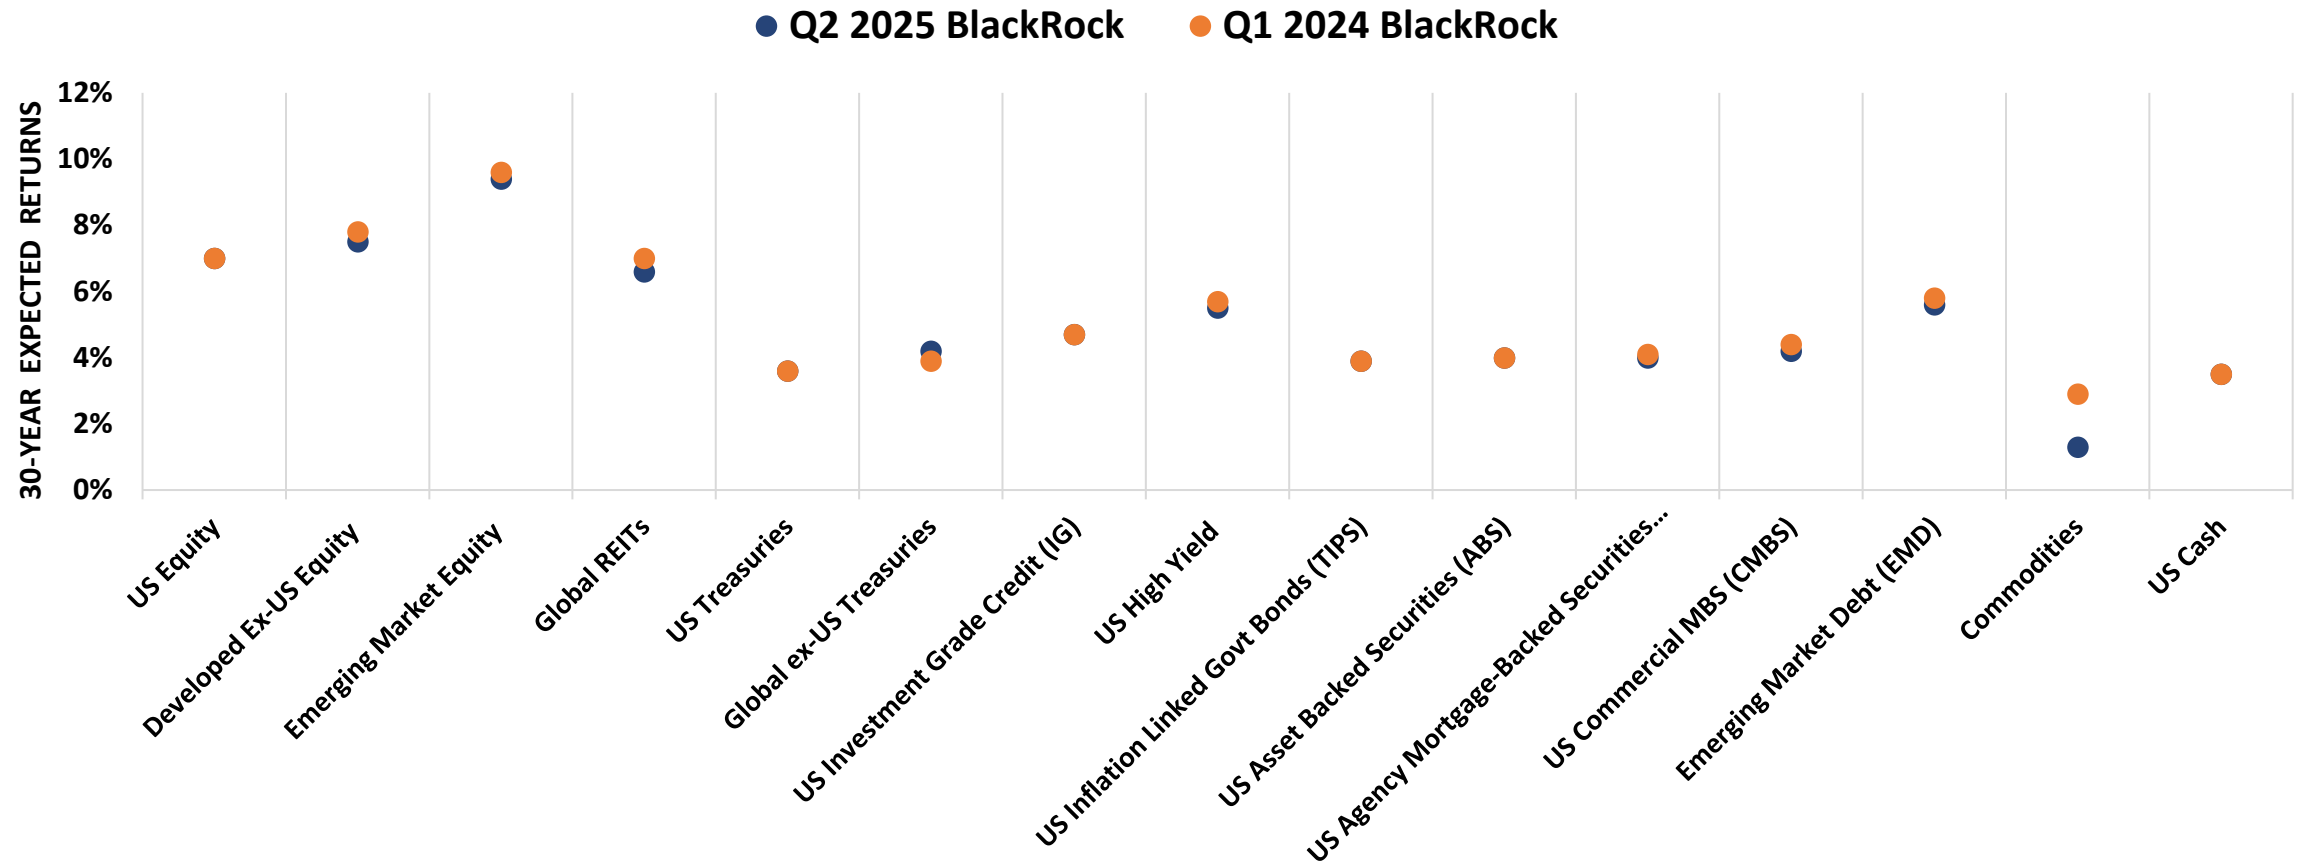

Asset Class	Current	Option A	Option B	Option C	
Global Equity	21%	-	2%	7%	
Fixed Income	61%	77%	73%	68%	
TIPS	9%	5%	5%	5%	
Global REITs	9%	18%	20%	20%	
Commodities	-	-	-	-	2024 Midcycle
Liquidity	-	-	-	-	
Expected Volatility	6.35%	5.52%	5.86%	6.25%	5.88%
*Net Expected Return	5.39%	5.23%	5.34%	5.44%	4.87%

*Expected returns are geometric, based on 10-year returns (calculated from the surveyed 5-year and 20-year CMAs and compared to the 10-year survey returns for reasonability), and net of expenses of 0.25%. Expected volatility is the 10-year survey median.

Capital Market Assumptions: 30-Year Returns

Fixed income and equities remain at similar levels

Public Employees' Long-Term Care Fund

Fund Overview

Established in 1992, this fund provides participants with coverage for long-term care expenses. Currently paused for new enrollments, cash flow negative (approx. ~\$115 million per year). Conservative investment strategy.

<p>AUM \$4.9 bn As of 12/31/25</p>	<p>Participants 75,769 As of 6/30/25</p>	<p>Status Paused 2020</p>
<p>Est. Funded Ratio 97% As of 6/30/25</p>	<p>Discount Rate 4.75%</p>	<p>20-year Performance 4.73%</p>

Current Allocation

Asset Class	%

Liquidity	-
Expected Volatility	6.40%
*Expected Return	5.62%

Public Employees' Long-Term Care Fund

Candidate Portfolios & Recommendation

Recommendations:

- 1) Current portfolio – maintains a balanced allocation, supports the discount rate, and helps avoid portfolio turnover and associated costs;
- 2) modify two benchmarks to better align with the investment strategy (details on page 37).

Asset Class	Current	Option A	Option B	Option C	Discount Rate 4.75%
Global Equity	28%	24%	27%	29%	
Fixed Income	69%	73%	70%	68%	
TIPS	-	-	-	-	
Global REITs	3%	3%	3%	3%	
Commodities	-	-	-	-	
Liquidity	-	-	-	-	2024 Midcycle
Expected Volatility	6.40%	5.90%	6.20%	6.50%	6.39%
*Expected Return	5.62%	5.45%	5.58%	5.68%	5.48%

Summary of ALM Recommendations

1. Adopt the Capital Market Assumptions
2. Approve the recommended portfolio for each Affiliate Fund as the Policy Portfolio:
 - HCF, JRS, JRS II, CERBT 1-3, CEPPT 1-2, & LTC: Current Portfolio
 - LRS: Candidate B (lower expected risk/return than Current Portfolio)
3. Approve the following benchmarks, as recommended by Wilshire:
 - Long-Term Care Fund: High Yield ex-CCC¹ & EM Debt ex-CCC¹
4. Approve inclusion of Private Equity for JRS II as an incubated investment strategy, not to exceed 5%²

¹ These benchmarks exclude lower quality credit bonds (CCC and below), which aligns with the portfolio implementation.

² Upon approval of private equity as an incubated investment, policy language will be presented in September and November (1st/2nd reads). No investments will be made until policy language is approved.

Next Steps

- Upon Adoption, Administratively Update Investment Policies with Allocation and Benchmark Changes
- Implement allocation changes
- First Reading of JRS II Policy Change for Private Equity in September, Second Reading in November
- First Reading of Supplemental Income Plan today and Second Reading in September

Appendix

Asset Classes - Constraints

Importance of Constraints:

- Constraints play a crucial role in portfolio design by helping to construct a balanced and diversified portfolio.
- Setting constraints assists in avoiding the risks associated with excessive concentration in a single asset class.
- There have been no changes to constraints since the 2024 ALM mid-cycle review.

Portfolio Depletion Probability Analysis: LTC

Each portfolio was evaluated using 5,000 possible investment return paths over a 30-year time horizon. All candidate portfolios have between a 28%-30% chance of depletion starting in 16 years.

Portfolio	Probability of Fund Depletion (without future course correction)	First Year Occurrence of Possible Depletion	Average Present Value of Liabilities at Depletion
Current Portfolio – 5.6%	29%	16	\$745M
Candidate A - 5.5%	30%	16	\$720M
Candidate B - 5.6%	29%	16	\$741M
Candidate C - 5.7%	28%	16	\$763M

Recommended Policy Portfolios: Allocation, Returns, Risk

Expected Return (gross)	3.5%	3.3%	5.2%	5.6%	6.3%	6.5%	6.6%	6.7%	5.6%	6.1%
Expected Volatility	0.5%	0.8%	6.3%	6.4%	9.0%	10.4%	11.7%	12.4%	6.4%	9.0%

Portfolio allocation % represented by bar charts (left axis).
 Portfolio expected volatility represented by diamonds connected by orange lines (right axis).
