Meet the CalPERS Retirement Estimate Calculator. It estimates what your pension will be based on the presences that you define.

Just tell it when you want to retire, how much money you plan on making when you retire, and a few other variables specific to you, then let the calculator crunch the numbers. Not happy with the results? Choose different numbers and run the calculator again to see how that impacts your pension. Planning for your retirement just got a whole lot simpler!

Whether you plan to retire a month from now, a year from now, or even twenty years from now, the Retirement Estimate Calculator is a great tool to help you prepare. And you can access it right now either in your my|CalPERS account or on the CalPERS website.
